

Digital Media/Multimedia Technology (2152) (A.S.)

ASSOCIATE IN SCIENCE RECOMMENDED ROADMAP

This academic roadmap is designed to help you select courses each term for your **Associate in Science Degree in Digital Media/Multimedia Technology (2152) (A.S.)**. This program provides students with a diverse foundation of skills and abilities on which to build a successful career through advancement in the workplace or furthering their education. Students will learn to integrate graphics, sound, video, animation, text and still images to create a variety of entertainment, graphic and creative productions. Areas such as web design, graphic design, and audio or video production will be introduced.

Students who complete this program will have satisfied the lower division coursework requirements, lower division elective coursework requirements, and all prerequisites to enroll in upper division coursework in the Bachelor of Applied Science in Digital Media (S500) (B.A.S.)

Full-time students will refer to the term-by-term recommendations, and part-time students will refer to the course-by-course recommendations. "Mile Markers and Notes" on the Roadmap refer to important guidelines for program completion.

This roadmap is intended to provide general guidance about recommended courses and mile markers. For specific guidance about your individual academic degree plan, please see a program advisor. Please also refer to the College Catalog for additional information.

Embedded Certificate(s)

Two technical certificates are available within this degree program: Digital Media/Multimedia Production (6402) (T.C.) and Graphic Design Production (6401) (T.C.). Students may pursue the A.S. degree and earn technical certificates while completing the requirements for the degree, or pursue one or more certificates to develop or upgrade their skills in a particular field. Contact an advisor to determine the career education path that is best for you.

Career Options: The Digital Media/Multimedia Technology program prepares graduates for numerous career opportunities, including such positions as graphic designers, multimedia artists/designers, photographers, and web designers. Job descriptions within the field may share many industry standard skill requirements for software and hardware; however, the digital media field emphasizes the importance of design and portfolio review. According to the Bureau of Labor Statistics, employment of multimedia artists and animators is projected to increase by 4% percent from 2019 to 2029.
