COLLEGE CREDIT
COURSE DESCRIPTIONS

The college credit courses listed in this section fall into three categories as identified by the following letter codes.

KEY TO LETTER CODES:

P-University Parallel — This course is intended for transfer to a university.

D-Dual Purpose — Any course identified by this symbol is a university parallel offering. As well, the course is also part of certain occupational programs. Hence, it serves both university parallel and occupational objectives.

O-Occupational — The level and content of this course is tailored for those who wish to enter the business or industrial world.

Courses in this college credit course listing with the first digit being zero (example: MTB 0013) are not intended to transfer to another college or university and will not count toward an associate degree at Florida Junior College at Jacksonville. All courses in the following list are not taught each term. Class schedules are published prior to each term that show the courses that will be offered. Many courses in this catalog have prerequisite courses listed in the course descriptions.

STATEMENT ON FLORIDA’S
STATEWIDE COURSE NUMBERING SYSTEM

The college credit course prefixes and numbers in this catalog are part of a Statewide system developed for use by all public postsecondary and participating private institutions in Florida. The major purpose of this system is to make transferring of courses to other State colleges easier by identifying courses which are equivalent, wherever they are taught in the State. All courses designated as equivalent in the State will carry the same prefix and last three digits.

The course numbering system is, by law, descriptive and not prescriptive. It in no way limits or controls what courses may be offered or how they are taught. It does not affect course titles or descriptions at individual schools. It seeks only to describe what is being offered in postsecondary education in Florida in a manner that is intelligible and useful to students, faculty, and other interested users of the system.

NOTE: A receiving institution may accept courses other than equivalent courses to satisfy certain requirements at their discretion.

Exceptions to the Rule for Equivalencies

The following are exceptions to the general rule for course equivalencies:

1. All internships, practicums, clinical experiences and study abroad courses, whatever numbers they carry, are not automatically transferable.

2. Performance or studio courses in Art, Dance, Theatre, and Music are not automatically transferable but must be evaluated individually by the receiving institution.

A cross reference of courses by previously used institutional prefix and number is included, beginning on page — of the Catalog, to aid in selecting the proper course, hereafter identified by the Statewide Common Course prefix and number.
COLLEGE CREDIT COURSE DESCRIPTIONS

ACC 1009 General Accounting I (D)  3 cr.
Prerequisite: None. A study of the sole proprietorship form of business organization with an emphasis on the following topics: the accounting cycle, journalizing and posting, adjusting and accruals, adjusting and closing procedures, the worksheet, preparing financial statements, and the use of special journals and subsidiary ledgers. The course includes special problems for both a service-oriented business and a merchandising concern and requires the completion of a practice set. Three contact hours.

ACC 1029 General Accounting II (D)  3 cr.
Prerequisite: ACC 1009. A further study of proprietorship accounting with an introduction to partnerships and corporations. Emphasis will be placed on the following topics: inventory valuation, depreciation and fixed asset valuation, an introduction to the voucher system, bank reconciliations, petty cash fund, payroll accounting, the use of data processing in accounting with an emphasis on internal control, and an introduction to partnership and corporate accounting. Including the basic characteristics and financial structure of these two business forms. Practice set is also included. The satisfactory completion of ACC 1009 and ACC 1029 is equivalent to the completion of ACC 2001. Three contact hours.

ACC 2001 Principles of Accounting I (D)  3 cr.
Prerequisite: None. A study of the principles of double entry records as related to the sole proprietorship form of organization. ACC 2001 includes all of the topics listed under ACC 1009 and ACC 1029 with the exception of partnership and corporate accounting. A practice set is included. ACC 1009 and ACC 1029 may be substituted for credit in ACC 2001. Three contact hours.

ACC 2021 Principles of Accounting II (D)  3 cr.
Prerequisite: ACC 2021. A study of accounting as related to partnership and corporations with emphasis on the following topics: formation, liquidation, and dissolution of partnerships and corporations; accounting for stocks, long term liabilities and investments; job order cost systems, budgeting, and standard cost systems; analysis of financial statements, consolidated statements, and tax considerations in business decisions. Completion of a practice set is required. Three contact hours.

ACC 2109 Intermediate Accounting I (D)  3 cr.
Prerequisite: ACC 2109. A continuation of accounting principles including a review of the accounting cycle with special attention given to: working capital, an in-depth study of financial statements, cash, receivables, current liabilities, inventories, plant and equipment assets and intangible assets. Three contact hours.

ACC 2129 Intermediate Accounting II (D)  3 cr.
Prerequisite: ACC 2129. A continuation of ACC 2021 with coverage of the following topics: a study of corporate contributed capital, retained earnings and dividends, stockholders equity, long term debt and investments, pension plans and leases, accounting for income taxes, accounting for price level changes, and further statement analysis. Three contact hours.

ACC 2409 Cost Accounting (D)  3 cr.
Prerequisite: ACC 2409. An introduction and analysis of cost into three major areas: (1) planning and controlling routine operations (break-even analysis), (2) inventory valuation and income determination (standard costing), (3) policy making and long-range planning (capital budgeting). Three contact hours.

ACC 2509 Federal Tax Course (Tax Accounting) (D)  4 cr.
Prerequisite: None. A study of the Federal internal Revenue Code regulations and cases which apply to the determination of income taxes for individuals, partnerships, corporations, estates and trusts. Topics considered: capital gains and losses, deductions and exemptions, tax credits, gross income, inventories, installment sales, depreciation and depletion, and bad debts. The scope is limited to basic fundamentals of the law and practical filing procedures. This course is recommended for terminal students and not for college transfer. Four contact hours.

ADV 2000 Advertising (D)  3 cr.
Prerequisite: None. Introduction to the field of advertising. Its purpose, institutions and functions, includes planning and advertising, local media and types of retailer advertising. Three contact hours.

AMH 2101 United States History I (P)  3 cr.
Prerequisite: None. United States history to 1865. Emphasizing the European background, Revolution, Articles of Confederation, the Constitution, problems of the new republic, sectionalism, manifest destiny, slavery and the War Between the States. Three contact hours.

AMH 2102 United States History II (P)  3 cr.
Prerequisite: None. A history of the United States from 1865 to the present. Includes the Reconstruction, growth of big business, the agrarian revolt, Latin American affairs, the Progressive Movement, the First World War, and political, economic, and world affairs since World War II. Three contact hours.

AMH 2420 History of Florida (P)  3 cr.
Prerequisite: None. History of Florida with emphasis on the explorations, U.S. acquisition, Convention of St. Joseph, Civil War and Reconstruction, and Florida's growth in the 20th Century. Three contact hours.

AMH 2571 Afro-American History and Culture I (P)  3 cr.
Prerequisite: None. A survey course dealing with the trends, institutions, events, and personalities among black people in the American past; a brief treatment of the African origin, the black people during the Revolutionary War, the development of slavery and the black people and the Civil War and Reconstruction is presented. The origin of racism, general minority problems, cultural appreciation, and black ideas are stressed. Three contact hours.

AMH 2572 Afro-American History and Culture II (P)  3 cr.
Prerequisite: None. A continuation of AMH 2571 with special emphasis on present and future projected developments among black people. The black people and the two World Wars and their aftermath are presented, as well as the roots and manifestations of the Civil Rights and Black Power movements. Three contact hours.

AML 2024 American Literature I (P)  3 cr.
Prerequisite: ENC 1136. A critical study of selections from American Literature: Colonial period to the late 19th century. Three contact hours.

AML 2025 American Literature II (P)  3 cr.
Prerequisite: ENC 1136. A critical study of selections from American Literature: late 19th century to the present. Three contact hours.
AML 2310 Introduction to the North American Indian 3 cr.
A survey of the North American Indian from the first appearance of Indians on this continent through their development into tribes. Three contact hours.

ANT 2410 Cultural Anthropology (P) 3 cr.
Prerequisite: none. The study of human, the concept of culture, and components of culture with emphasis on the different cultural adaptations of humanity worldwide. Three contact hours.

ANT 2511 Physical Anthropology (P) 3 cr.
Prerequisite: none. The study of the human as a biological and cultural animal including evolutionary adaptations, and the human place in the ecological system. Three contact hours.

ANT 2556 Introduction to Anthropology (P) 3 cr.
(Overseas Study)
Corequisite: PCB 203SC. An anthropology course offering students three weeks of classroom instruction and three weeks of study/travel in Mexico and Guatemala. The course will include field experiences, lectures, discussions and other experiences in the field of anthropology leading to an appreciation and understanding of the cultures of the peoples who created the past great civilizations of Central America. Eight contact hours.

APB 1150 Life in Its Biological Environment (P) 3 cr.
Prerequisite: None. An introduction to biological structure, function, processes, principles and concepts. This course is designed to fulfill the general education requirement. Three contact hours.

APB 1260 Cardiopulmonary Anatomy and Physiology (D) 3 cr.
Prerequisite: None. This course is designed to offer a thorough anatomical and physiological examination of the cardiopulmonary system. An introduction to electrocardiography and chest roentgenology is included. Additionally, a correlated examination of the renal system and circulatory system will be included where it is relevant. Four contact hours.

APB 2190C Human Anatomy and Physiology I (P) 3 cr.
The student will benefit by taking CHM 1020, CHM 1034C, APB 1150, BSC 1011C, ZOO 1010C, or High School Chemistry prior to enrolling in APB 2190C, which is a study of the gross morphology and physiology of the human. The course includes sections concerned with cells, tissues, musculo-skeletal system, circulation, the lymphatic system, the excretory system and fluids and electrolyte balance. Four contact hours: two hours lecture; one-two hour laboratory.

APB 2191C Human Anatomy and Physiology II (P) 3 cr.
Prerequisite: APB 2190C. A continuation of APB 2190C. Topics covered include the endocrine system, reproductive system, nervous system, special senses; respiratory system; digestive system and the integument. Four contact hours: two hours lecture; one two-hour laboratory.

APB 2293 Pulmonary Pathology (D) 3 cr.
Prerequisite: APB 1261. Pulmonary pathology gives an in-depth study of the more common diseases of the cardiopulmonary system including their etiology, pathophysiology, clinical picture and treatment. Five contact hours.

APB 2650 Pharmacology for the Respiratory Therapist (D) 2 cr.
Prerequisite: APB 1260. This course offers the student a detailed understanding and knowledge of the basic factors involved in the field of pharmacology for the respiratory therapist and the application of this field to pulmonary diseases. Two contact hours.

ARC 2120C Architectural Drafting (D) 3 cr.
Prerequisite: ETO 1100C. A survey of the theory and practices involved in the preparation of a set of architectural plans. Emphasis is placed on the floor plan design, details, elevations and perspectives. Consideration is also given to FHA standards, site selections, and common home construction techniques. Six contact hours: two class hours; four laboratory hours.

ARH 1000 Art Appreciation (P) 3 cr.
A course designed to supply the non-art major with a foundation for understanding the visual arts through introduction to different media of art expression. Three contact hours.

ARH 2050 Art History I (P) 3 cr.
A history and critical study of painting, sculpture, and architecture from prehistoric times to the Renaissance. Three contact hours.

ARH 2051 Art History II (P) 3 cr.
Prerequisite: ARH 2050. A continuation of the history and criticism of art from the Renaissance to the present. Three contact hours.

ART 1100C Crafts as an Element of Design (P) 3 cr.
The course is planned as an introduction to contemporary and traditional crafts. Weaving, macrame, batik, and leathercrafts will be included. Basic techniques will be taught and personal creativity will be encouraged. Six contact hours. This course may be repeated for additional credit for up to a combined total of three semesters with permission of the instructor. Nine semester hours total maximum.

ART 1101C Crafts as an Element of Design (Evening) (P) 2 cr.
While the scope of this evening studio course is the same as the day class (ART 1100C), the volume of work will be less due to fewer studio hours. This course is planned as an introduction to contemporary and traditional crafts. Weaving, macrame, batik and leathercrafts will be included. This course in combination with ART 1100C may be repeated for additional credit for up to a combined total of three semesters. Maximum: nine semester hours credit, total.) ART 1101C meets for four contact hours: one class hour, three studio hours.

ARTA 1201C Design I (P) 3 cr.
An analytical approach to the elements and principles of design. Emphasis on line, form, texture, and color in both two- and three-dimensional space organizations. Six contact hours: two class hours; four studio hours.

ARTB 1201C Design I (Evening) (P) 2 cr.
While the scope of this evening studio course is the same as the day class (ART 1201C) the volume of work will be less due to fewer studio hours. This course is planned as an analytical approach to the elements and principles of design. Both two- and three-dimensional space organizations are explored with emphasis on line, form, texture, and color. ARTB 1201C meets for four contact hours: one class hour, three studio hours.

ARTA 1202C Design II (P) 3 cr.
Prerequisite: ARTA 1201C. A continuation of ARTA 1201C. Six contact hours: two class hours; four studio hours.

ARTB 1202C Design II (Evening) (P) 2 cr.
Prerequisite: ARTB 1201C. While the scope of this studio course is the same as the day class (ARTA 1202C) the volume of work will be less due to fewer studio hours. This course is a continuation of ARTB 1201C. ARTB 1202C meets for four contact hours: one class hour, three studio hours.

ARTA 1300C Drawing I (P) 3 cr.
Introduction to the basic disciplines of drawing through the use of still life, landscape, and the figure. Six contact hours: two class hours; four studio hours.
ARTB 1300C Drawing I (Evening) (P) 2 cr.
While the scope of this evening studio course is the same as the day class (ARTA 1300C) the volume of work will be less due to fewer studio hours. This course is designed as an introduction to the basic disciplines of drawing and to varied media through the use of still life, landscape, and the figure. ARTB 1300C meets for four contact hours; one class hour, three studio hours.

ARTA 1301C Drawing II (P) 3 cr.
Prerequisite: ARTA 1300C. A continuation of ARTA 1300C. Six contact hours: two class hours; four studio hours.

ARTB 1301C Drawing II (Evening) (P) 2 cr.
Prerequisite: ARTB 1300C. While the scope of this evening studio course is the same as the day class (ARTA 1301C) the volume of work will be less due to fewer studio hours. This course is a continuation of ARTB 1300C. ARTB 1301C meets for four contact hours; one class hour, three studio hours.

ARTA 2110C Ceramics: Hand-Building I (P) 3 cr.
The student will benefit by taking ARTA 1300C and ARTA 1201C prior to enrolling in ARTA 2110C. This course introduces the basic methods of ceramic production in hand-building and glaze application. Six contact hours: two class hours; four studio hours.

ARTB 2110C Ceramics: Hand-Building I (Evening) (P) 2 cr.
The student will benefit by taking ARTB 1300C and ARTB 1201C prior to enrolling in ARTB 2110C. While the scope of this evening studio class is the same as the day class (ARTA 2110C) the volume of work will be less due to the basic methods of hand-building; coil and slab work. Some glazing is also included. ARTB 2110C meets for four contact hours; one class hour, three studio hours.

ARTA 2111C Ceramics: Hand-Building II (P) 3 cr.
Prerequisite: ARTA 2110C. This course is a continuation of ARTA 2110C. Emphasis on creativity and special problems. Kiln stacking and firing also included. Six contact hours: two class hours; four studio hours.

ARTB 2111C Ceramics: Hand-Building II (Evening) (P) 2 cr.
Prerequisite: ARTB 2110C or ARTA 2110C. While the scope of this evening studio class is the same as the day class (ARTA 2111C) the volume of work will be less due to fewer studio hours. This course is designed as a continuation of ARTB 2111C and ARTA 2111C. ARTB 2111C meets for four contact hours; one class hour, three studio hours.

ARTA 2112C Ceramics: Wheel Throwing I (P) 3 cr.
Prerequisite: ARTA 2110C. This course introduces the basic methods of wheel throwing along with kiln stacking and glazing techniques. Six contact hours: two class hours; four studio hours.

ARTA 2113C Ceramics: Wheel Throwing II (P) 3 cr.
Prerequisite: ARTA 2112C. This course is a continuation of ARTA 2112C. Emphasis is on perfecting the technique of wheel throwing and on creativity. Ceramic sculpture is included. Six contact hours: two class hours; four studio hours.

ARTA 2115C Glaze Exploration (P) 3 cr.
This course includes practice in the use of the nature of glazing techniques such as mishima and sgraffito, plus application and testing procedures. Six contact hours: two class hours; four studio hours.

ARTA 2400C Printmaking I (P) 3 cr.
Prerequisite: ARTA 1300C or ARTA 1301C. This course consists of experimentation with line, tone etching, intaglio and relief printing. Six contact hours: one class hour, five studio hours.

ARTA 2401C Printmaking II (P) 3 cr.
Prerequisite: ARTA 2400C. A more detailed study of intaglio materials and techniques. Six contact hours: two class hours; four studio hours. (This course may be repeated for additional credit for up to a combined total of three semesters with permission of the instructor. Nine semester hours total maximum.)

ARTA 2510C Painting I (P) 3 cr.
Prerequisite: ARTA 1301C. A comprehensive analysis of painting techniques and contemporary approach to still life, landscape, and figure compositions. Six contact hours: two class hours; four studio hours.
ARTB 2510C Painting I (Evening) (P)  2 cr.
Prerequisite: ARTB 1300C. While the scope of this evening studio class is the same as the day class (ARTA 2510C) the volume of work will be less due to fewer studio hours. This course is designed as an introduction of painting techniques with emphasis on still life, landscape, and figure compositions. ARTB 2510C meets for four contact hours; one class hour, three studio hours.

ARTA 2520C Painting II (P)  3 cr.
Prerequisite: ARTA 2510C. A continuation of ARTA 2510C with emphasis on exploratory work achieved by means of research, evaluation of traditional and contemporary compositions, and contributions of artists, past and present. Emphasis is placed upon the abstract and non-objective compositions. Six contact hours; two class hours, four studio hours.

ARTB 2520C Painting II (Evening)  2 cr.
Prerequisite: ARTB 2510C. While the scope of this evening studio class is the same as the day class (ARTB 2520C) the volume of work will be less due to fewer studio hours. This course is designed as a continuation of ARTB 2510C with emphasis on research evaluation of traditional and contemporary compositions and contributions of artists and present artists. ARTB 2520C meets for four contact hours; one class hour, three studio hours.

ARV 1200 Theory of Printing Processes (O)  5 cr.
Prerequisite: None. A lecture course designed to give an introduction to three of the major processes of the printing industry. Typesetting and form makeup (hand and machine composition), lockup and letterpress press operation, cold type and photo typesetting and mechanical art preparation are included in the course. Five contact hours.

ARV 1201 Printing Process—Laboratory (O)  4 cr.
Prerequisite: None. A laboratory course designed to be an introduction to and experience in the basic skills of three of the major processes of the printing industry. Typesetting and form makeup (hand and machine), lockup and letterpress press operation, cold type and phototypesetting, and mechanical art preparation are included in the course. Eight contact hours.

ARV 1203 Layout and Design (O)  3 cr.
A course designed to teach the technique of preparing layouts that will provide composing room instructions, as well as a comprehensive assimilation of work to be produced, for customer design approval. Constant design concepts will be employed. Three contact hours.

ARV 1207 Theory of Lithographic Processes (O)  5 cr.
A lecture course designed to give an introduction to three major processes of the lithographic industry. Negative stripping and platemaking, process camera operation, and offset press operation are included in the course. Five contact hours.

ARV 1209 Lithographic Processes Laboratory (O)  4 cr.
A laboratory course designed to give an introduction to the processes of three major processes of the lithographic industry. Negative stripping and platemaking, process camera operation, offset press operation, and related bindery functions are included in the course. Eight contact hours.

ARV 1260 Graphic Arts Estimating (O)  2 cr.
A lecture course designed to develop the basic technique of estimating the cost of printed matter and its production, from layout to finished product, employing the pricing methods of the industry-accepted Franklin Printing Catalog. Two contact hours.

ARV 2225 Cold Type Typesetting and Pasteup (O)  3 cr.
A laboratory course designed to teach the basic technique of setting type by strike-on and photo typesetting machines. The composition and preparation of mechanical art forms, pen ruled and machine forms, are included in the course. Six contact hours.

ARV 2226 Advanced Cold Type Typesetting and Pasteup (O)  6 cr.
Prerequisite: ARV 2225. An advanced laboratory course designed to provide for skill development in the operation of strike-on and phototypesetting equipment and form pasteup. Emphasis is placed upon the application of the basic techniques toward greater job complexity, increased quality, and increased productivity. Sixteen contact hours; one hour lecture; fifteen hours laboratory.

ARV 2230 Hand and Machine Composition and Form Makeup (O)  3 cr.
A laboratory course designed to teach the basic technique of setting type by hand and by Ludlow machine, along with form makeup (utilizing metal cutting devices and the brauch method of rule form makeup), including the pulling of galleys and reproduction proofs. Six contact hours.

ARV 2231 Advanced Composition and Makeup (O)  6 cr.
Prerequisite: ARV 2230. An advanced laboratory course designed to provide for skill development in the hand and machine composition and form makeup process of the printing industry. Emphasis is placed on application of the basic techniques toward greater job complexity, increased quality, and increased productivity. Sixteen contact hours; one hour lecture, fifteen hours laboratory.

ARV 2234 Camera Operation and Film Processing (O)  3 cr.
A laboratory course designed to teach the technique of operating the process camera for the reproduction of line and half-tone copy negative reproduction, contact printing, preparation of darkroom chemicals, and developing graphic arts film and papers. Six contact hours.

ARV 2241C Advanced Camera Operation and Film Processing (O)  6 cr.
Prerequisite: ARV 2234. An advanced laboratory course designed to provide for skill development in the operation of the process camera and the development of graphic arts film. Emphasis is placed on the application of the basic techniques toward greater job complexity, increased quality, and increased productivity. Sixteen contact hours; one hour lecture; fifteen hours laboratory.

ARV 2250 Negative Stripping and Offset Platemaking (O)  3 cr.
A laboratory course designed to teach the basic technique and stripping up offset negatives for proper press position, separation for color, and to expose and develop offset press plates. Six contact hours.

ARV 2251 Advanced Stripping and Offset Platemaking (O)  6 cr.
Prerequisite: ARV 2250. An advanced laboratory course designed to provide for skill development in negative stripping and platemaking process of the lithographic industry. Emphasis is placed on the application of the basic techniques toward greater job complexity, increased quality, and increased productivity. Sixteen contact hours.

ARV 2253 Offset Press Operation (O)  3 cr.
A laboratory course designed to develop the basic technique of setting up, operating, and maintaining duplicator and offset presses in the 10 x 15, 11 x 17, and 14 x 20 inch ranges. Six contact hours.

ARV 2254 Advanced Offset Press Operation (O)  6 cr.
Prerequisite: ARV 2253. An advanced laboratory course designed to provide for skill development in the operation of offset duplicator and presses. Emphasis is placed on application of the basic techniques toward greater job complexity, increased quality, and increased job productivity. Sixteen contact hours; one hour lecture; fifteen hours laboratory.
ARV 2256  Letterpress Press Operation and Lockup (O)  3 cr.
A laboratory course designed to teach the basic technique of setting up, operating and maintaining the letterpress, the automatic cylinder press. Six contact hours.

ARV 2257  Advanced Letterpress Operation and Lockup (O)  6 cr.
Prerequisite: ARV 2256. An advanced laboratory course designed to provide for skill development in the operation of letterpress presses and form lockup. Emphasis is placed on the application of the basic techniques toward greater job complexity, increased quality, and productivity. Sixteen contact hours: one hour lecture; fifteen hours laboratory.

ARV 2945  Practicum (O)  6 cr.
The student will be assigned to a business-industrial setting in a local printing or trade related firm. Here the student will be engaged in the performance of printing specialty duties, functioning under normal production conditions. This course will be directed by the professor. Eighteen contact hours.

ASC 1001  Introduction to Aviation/Aerospace (O)  3 cr.
The impact of aviation and space is stressed. An exploratory course of general interest to the novice and of special value for elementary and secondary school teachers due to its interdisciplinary approach. Aviation history, air and space age, careers in aviation and aerospace, nature of space, rocketry, science of flight, weather theory, cartography, airports, cross-country flying, and physiology of flight are introduced. Three contact hours.

ASH 2300  History of the Far East (P)  3 cr.
A history of the Far East from early modern times. Three contact hours.

AST 1002  Introduction to Astronomy (P)  3 cr.
The student will benefit by taking High School Algebra or MAT 1024 prior to enrolling in this course. This is a general education course and is not intended for the student who is going to major in astronomy or other sciences. The student will become acquainted with the solar system with emphasis on the student's own planet and its satellites, the moon, and the universe. The stars and planets will be discussed relevant to the most modern ideas. Three contact hours.

AST 1022L  Astronomy Laboratory (P)  1 cr.
Pre-or Corequisite: AST 1002. This is a laboratory course which is intended to supplement AST 1002, Introduction to Astronomy. It is recommended that the student have a working knowledge of mathematics at a level equivalent to MAT 1024. Observations of the moon, planets, stars, and other objects will be made. Students will learn to use various types of equipment and simple procedures for obtaining useful astronomical data. If the weather is unfavorable, indoor laboratory exercises will be scheduled. Two contact hours.

ATF 1010  Ground School—Private Pilot (D)  3 cr.
Classroom instruction. Preparation for FAA Private Pilot's Written Examination. Includes: science of flight, airplane systems and instruments; weight, balance and performance; meteorology, physiology of flight; basic navigation; radio navigation, air traffic control and communications; airman's information manual, and Federal Aviation Regulations. Three contact hours.

ATT 1110  Ground School III—Commercial Pilot (O)  3 cr.
Prerequisite: Private Pilot Certificate. Preparation for FAA Commercial Pilot Written Examination. Review of weight and balance; airplane performance; air traffic control and communication; airman's information manual; physiology of flight. Course concentrates on advanced flight computer, advanced meteorology, advanced VFR navigation and radio, and commercial pilot Federal aviation regulations. Three contact hours.

ATT 1120  Ground School IV—Instrument Pilot (O)  3 cr.
Prerequisite: Private Pilot Certificate. Preparation for FAA Instrument Pilot Written Examination. Review of airplane systems and instruments, advanced meteorology; basic radar and transponder. Course concentrates on IFR clearance searching, IFR flight charts, IFR planning and VOR flights, IFR regulations and procedures, and instrument approaches. Three contact hours.

BAN 1100  The Banking Starter Series (O)  3 cr.
This is a series of three short orientation seminars at the entry level for new bank employees. In order to earn three credits, all three seminars must be completed. Your Place in Banking—This three-hour training unit is designed to give new employees information on the functions of the various parts of a bank and the financial services offered by the commercial bank. Your Personal Finances—This three-hour training unit is designed to show new employees the best methods of managing their personal income—how to spend it, save it, and borrow against it. Your Personal Image—This nine-to-twelve-hour training unit is designed to teach new employees office courtesies, telephone etiquette, and personal grooming. Three contact hours.

BAN 1110  Principles of Bank Operation (D)  3 cr.
This course presents the fundamentals of bank functions in a descriptive fashion so that the beginning banker may view the chosen profession in a broad (and operational) perspective. The descriptive orientation is intentional. Banking is increasingly dependent upon personnel who have the broad perspective so necessary for career advancement. Three contact hours.

BAN 1160  Bank Letters and Reports (O)  3 cr.
This course is designed for those bank officers, supervisors, and employees who dictate or review correspondence. Since bank letters are actually public relations documents, all persons should be familiar not only with the mechanical forms of bank letters but also with the psychological principles that help the letter writer achieve best results. The course reviews letter forms, emphasizes fundamental principles underlying modern correspondence, and examines different kinds of bank letters. Three contact hours.

BAN 1210  Analyzing Financial Statements (O)  3 cr.
This course is organized into two main sections: Characteristics of Financial Statements and Financial Statement Analysis. The first section serves as a useful review of basic accounting principles for those students who have studied accounting. For those who have not, this section provides the minimum accounting background necessary for profitable study of financial statement analysis. Three contact hours.

BAN 1700  Financing Business Enterprise (O)  3 cr.
The student may benefit by taking ACC 1003 or ACC 2001 before enrolling in BAN 1700. Stress is placed on the difference between lending and investing, and on the fact that investing in a corporation and financing a corporation are different aspects of the same subject. In this course, the material is presented from the viewpoint of the corporate treasurer who must safeguard the financial future of the corporation. Three contact hours.

BAN 2150  Bank Public Relations and Marketing (O)  3 cr.
This course discusses the basic of public relations, both internal and external, and seeks simply to explain the why, the what, and some of the how of public relations and marketing. It is intended as an overview for all bankers in terms of what everyone in banking should know about the essentials of bank public relations and marketing. Three contact hours.

BAN 2200  Credit Administration (O)  3 cr.
This course, directed toward the executive level, concerns itself partially with a statement and a discussion of factors influencing and determining loan policy. Methods of credit investigation and analysis, credit techniques, specific credit problems and regulations as well as unusual types of loans are discussed. Three contact hours.
BAN 2230 Bank Investments (O) 3 cr.
Because the bank's needs for primary reserves and loanable funds limit the funds available for investment, this course describes the nature of such funds and how their uses are determined. It also analyzes the primary and secondary reserve needs of commercial banks, the sources of reserves, and their random and cyclical fluctuations, showing the influence of these factors on investment policy. This analysis is followed by a study of yield changes as they affect a bank's long-term holdings. Three contact hours.

BAN 2240 Installment Credit (O) 3 cr.
In this course, the techniques of installment lending are presented concisely. Emphasis is placed on establishing the credit, obtaining and checking information, servicing the loan, and collecting the amounts due. Each phase of a bank's installment credit operation should be carefully scrutinized to be certain that the most efficient methods are employed, for only through an efficient operation can a bank maximize its profits on this particular kind of credit. Other topics discussed are inventory financing, special loan programs, business development and advertising, and the public relations aspect of installment lending. Three contact hours.

BAN 2303 Savings and Time Deposits (D) 3 cr.
This course reflects a knowledge of the historical development of savings institutions and an awareness of the basic economic functions of the savings process in order to clarify important differences between financial savings by individuals or organizations and real savings that appear as capital formation. Different types of financial savings are reviewed in order to describe the system of financial flows of income to capital investment. Three contact hours.

BAN 2400 Trust Functions and Services (O) 3 cr.
This course presents a complete picture of the services rendered by institutions engaged in trust business. It endeavors to keep clear the distinction between business and legal aspects of trust functions. Three contact hours.

BAN 2500 International Banking (O) 3 cr.
The text is an introduction to a vast field for those working in international departments, as well as for those involved in the domestic activities of their banks. The essential objective of this course is to present the basic framework and fundamentals of international banking, how money is transferred from one country to another, how trade is financed, how the international agencies are and how they supplement the work of commercial banks, and how money is changed from one currency to another. Three contact hours.

BAN 2720 Bank Management (O) 3 cr.
This course presents new trends which have emerged in the philosophy and practice of management. The study and application of the principles outlined provide new and experienced bankers with a working knowledge of bank management. Since case study is becoming well established as an effective management learning technique, the text introduces the use of cases as a new element. Three contact hours.

BCN 1001C Building Construction (D) 3 cr.
Prerequisite: ETD 1100G, ETC 1321C, MTB 1321. A study of the qualitative aspects of structural design involved in the materials and types of construction used in various parts of buildings. Analysis and evaluation of work methods, equipment and specifications employed in the construction of residential, commercial and industrial buildings. Four contact hours: two class hours; two laboratory hours.

BCN 2614C Planning and Estimating (D) 3 cr.
Prerequisites: BCN 1001C, ETI 1421C. Analysis and determination of job requirements and costs of construction operations, including direct and indirect costs and preparation of bid proposals for construction projects. Four contact hours: two class hours; two laboratory hours.

BOT 1010C Botany (P) 4 cr.
An evolutionary survey of the plant kingdom. Emphasis will be placed on principles which are applicable to all forms of plant life. Six contact hours: three class hours; three laboratory hours.
CCJ 2220  State and Local Law—Criminal Law (D)
Studies in the State Constitution and the statutory and case law of the State of Florida. Three contact hours.

CCJ 2230  Evidence (D)
Study and evaluation of evidence and proof; kinds, degrees, and admissibility, competence, and weight; specifically deals with rules of evidence and procedure of particular importance at the operational level in law enforcement. Three contact hours.

CCJ 2250  Constitutional Law—Criminal Law I (D)

CCJ 2310  Correctional Custody, Jails and Detention (D)
The duties and functions of the correctional officer, supervision of prisoners, discipline in a correctional institution, security, correctional treatment programs, and the handling of unusual prisoners are discussed and studied in practical application. Three contact hours.

CCJ 2330  Probation, Pardons and Parole (D)
Probation as a judicial process and parole as an executive function are examined as community-based correctional programs and the use of pardons is reviewed. Three contact hours.

CCJ 2340  Introduction to Behavior Modification (D)
The basic principles of human behavior and some of the techniques of changing attitude and behavior are evaluated, and the individual and group approaches to counseling are reviewed. Three contact hours.

CCJ 2360  Introduction to Contemporary Practices in Corrections (D)
Modern trends in corrections, such as the community-based programs in work-release, halfway houses, contact program planning, as well as the therapeutic community and treatment team concept in institutions are described and evaluated. Three contact hours.

CCJ 2500  Juvenile Delinquency (D)
Study of the major issues of crime causation, rehabilitation, and juvenile delinquency participation among the lower, middle, and upper social classes. The process of handling juvenile delinquents from confrontation with authorities, to detention, to release and aftercare is covered. Three contact hours.

CCJ 2530  Seminar in Police Problems (D)
Research, writing, and discussion of selected subject areas including foreign police agencies, industrial and retail security, duties of various governmental regulatory agencies, and analysis of contemporary law enforcement problems. Three contact hours.

CCJ 2933  Introduction to Special Problems in Corrections (D)
Research writing and discussion of selected subject areas related to corrections, such as correctional planning for short term offenders and misdemeanants, handling of "unusual" prisoners, classification of offenders, authority and responsibility of correctional officers, professional and legal standards, and analysis of contemporary correctional problems. Three contact hours.

CHD 1220  Child Growth and Development I (D)
This course is an introductory study of the physical, social, emotional, and intellectual development of the young child. Guidance, behavior problems, feelings, attitudes, and values are discussed. Three contact hours.
CHD 1230 Child Growth and Development II (D) 3 cr.
Prerequisite: CHD 1220. This course is designed to further the student’s understanding of the physical, social, emotional, and intellectual development of the young child. Special children (handicapped, minorities, behavior problems, children in crisis), nutrition and development, and safety and emergency procedures are also studied. Three contact hours.

CHM 1020 Chemistry for Liberal Arts (P) 3 cr.
The student will benefit by taking High School Algebra or MAT 1024 prior to enrolling in this course. This course is designed to meet the general education requirement for the non-science major. It is designed especially for the student who wishes to gain an understanding of the fundamental nature of physical science from the chemical point of view. The treatment utilizes an approach to scientific concepts and methods: stressing and illustrating principles rather than merely listing phenomena. Three contact hours.

CHM 1034C Introductory Chemistry (P) 4 cr.
The student will benefit by taking High School Algebra or MAT 1024 prior to enrolling in this course. Introduction to the principles of modern inorganic chemistry, including topics in structure of matter, gas laws, solutions, ionization, chemical equations, atomic theory, and ionic and non-ionic. This course is designed for those students who have had no previous chemistry, and for those planning to major in physical education, health related fields, technology, and home economics. Six contact hours; three class hours; one-three hour laboratory.

CHM 1035C Introductory Chemistry (P) 4 cr.
Prerequisite: CHM 1034C. This course is a continuation of CHM 1034C with an introduction to organic chemistry. Six contact hours; three class hours; one-three hour laboratory.

CHM 1041C General Chemistry and Qualitative Analysis I (P) 4 cr.
Prerequisite: One year of high school chemistry and two years of high school algebra or grade of C or better in CHM 1035C. This course is designed to introduce the student to modern chemical concepts. Subject matter includes modern atomic structure and periodicity, chemical bonding, states of matter, gas laws and solutions. The laboratory work will be quantitative in nature, stressing accurate laboratory techniques. This course is designed to meet the first-year college requirements for those majoring in science, engineering, premedicine and pharmacy. Six contact hours: three class hours; one-three hour laboratory.

CHM 1042C General Chemistry and Qualitative Analysis II (P) 4 cr.
Prerequisite: Grade of C or better in CHM 1041C. This course is a continuation of CHM 1041C and will stress chemical equilibrium, chemical kinetics, electrochemistry, oxidation-reduction, and selected families of metals and non-metals. Laboratory work will include studies of ionic equilibria in aqueous solutions and semi-micro qualitative analysis. Six contact hours: three class hours; one-three hour laboratory.

CHM 2210C Organic Chemistry I (P) 4 cr.
Prerequisite: CHM 1042C. This course emphasizes the general principles and theories of organic chemistry with emphasis on classification, nomenclature, methods of preparation, characteristic reactions, stereo-chemistry and structure determination of organic compounds. Six contact hours: three class hours; one-three hour laboratory.

CHM 2211C Organic Chemistry II (P) 4 cr.
Prerequisite: CHM 2210C. A continuation of CHM 2210C. Includes mechanisms of organic reactions, rearrangements, substitution reactions, carbohydrates and macromolecules. Six contact hours: three class hours; one-three hour laboratory.

CIS 2100 Data Management & Utility Programs (O) 3 cr.
Prerequisite: CAP 1001. A study of file organizations, access methods, job control statements, and the use of utility programs as components of an application system. Students will be required to build and maintain files. Topic will include an introduction to data bases and data base management systems. Four contact hours.

CIS 2321 Systems Development and Design (D) 3 cr.
Prerequisite: CAP 1001. This course is designed to provide the student with knowledge and skills that are basic to system analysis for business data processing. Emphasis will center around life-cycle concept, and will amplify the study, design, development and implementation phases of the systems approach. This course also presents the analyst’s role, tools, techniques and case studies for consideration. Four contact hours.

CJD 2310 Police Supervision (D) 3 cr.
Techniques and theory of police supervision, including problems of policy, rank and procedure, interpersonal and disciplinary methods, motivation, supervision investigations and reports, and performance ratings. Three contact hours.

CJT 2100 Criminal Investigation (D) 3 cr.
Fundamental course of the most important phases of criminal investigation. Branches of crime detection dealt with are methods of investigation, note taking, report writing, handling the crime scene, interrogations, admissions and confessions, missing persons, undercover assignments and such specific offenses as arson, narcotics, larceny, burglary, robbery, and forgery. Three contact hours.

CJT 2110 Introduction to Criminalistics (D) 3 cr.
Basic course of general investigation and special criminalistic matters, including such topics as homicide, rules of evidence, testimony in court, observation and description, hairs and fibers, invisible radiation, documentary evidence, arrest, searches of persons and raids. Three contact hours.

CNM 1001 Computer-Oriented Mathematics (P) 3 cr.
Prerequisite: MAC 1104. The course presents basic ideas and methods of mathematics as oriented to the computer. It is designed to utilize a classroom computer, electronic calculators, and logic trainer in use in the mathematics laboratory. Students will, after studying number systems, logic, binary Boolean Algebra, numerical methods and computer mathematics, write programs in machine language for problems compatible with their own interest and areas of study for the Math-Master. While the emphasis will be on the mathematics of computers, the course will provide a foundation for further study in programming and computer science. (This course does not contain the more common computer languages.) Three contact hours.

CNM 1005 Data Processing Mathematics (D) 3 cr.
Corequisite: COC 1300. An essential course for Data Processing majors who do not have a strong background in mathematics. Topics include the real number system, approximations, accuracy and precision, scientific notation and floating-point numbers, binary, octal, and hexadecimal numbers; binary-coded decimals, logical forms and operations; algorithms and flowcharts; and basic algebraic concepts. Three contact hours.

COA 1100 Consumer Decisions (D) 3 cr.
A study of practical money management applied to the family with emphasis on expenditures for food, clothing, housing, transportation, and health care. The course includes a study of credit retirement protection, taxes, consumer protection, and the consumer movement. Three contact hours.

COC 1300 Introductory Computer Concepts (D) 3 cr.
The course is intended for students with no previous experience in data processing. It introduces the student to the field of data processing and includes a brief history of the development of computers, a review of pertinent number systems, a study of the basic components of the computer and how they work in the system, elementary problem solving, a look at the "cast of characters" in data processing, and a discussion of advanced computer systems. Four contact hours.

COC 2307 Computer Concepts (D) 3 cr.
Prerequisite: MTB 1321 or consent of director. Introduction to the computer with emphasis on the computer as a tool in the solution of engineering problems. An overview of the computers in production and fabricating processes. Fundamentals of machine programming using the mini-computer. Three contact hours.
COE 1000  Cooperative Education Seminar (P)  1 cr.
The seminar is designed to prepare the student for entry into the Cooperative Education Program. During the seminar, the student will receive career counseling, job orientation and placement. One contact hour.

Prefix will be assigned according to student work experience.

_____ 1949  Cooperative Education Work Experience I (P)  3 cr.
The first work experience in Cooperative Education is designed to provide the student with meaningful experiences that will enhance the student's college education through career exploration and job training. Forty contact hours.

Prefix will be assigned according to student work experience.

_____ 2949  Cooperative Education Work Experience II (P)  3 cr.
The second work experience in Cooperative Education is designed to provide the student with further meaningful experiences that will enhance the student’s college education through career exploration and job training. Forty contact hours.

COP 1160  RPG Programming (D)  3 cr.
RPG (Report Program Generator) is a problem oriented programming language designed essentially to obtain data from single or multiple files, perform calculations and table lookup as required and write reports and/or update files. Students will solve elementary to moderately complex business problems by (A) writing RPG programs, (B) submitting programs for compilation and running on the College's computer system, and (C) thoroughly debugging programs until the output is perfect. Four contact hours.

COP 1400  Basic Assembly Language Programming (D)  3 cr.
Prerequisites: COC 1300 and CNM 1005. This course introduces basic concepts in computer programming using a low-level, machine-oriented language. It may also be referred to as GAL/360-370 Programming, EBCDIC ALC, or Beginning ALP. Students will analyze business problems involving sequential files (cards, magnetic disks and tapes, and printed reports); develop logic flowcharts; translate flowcharts into IBM System/360-370 DOS Assembler Language codes, incorporate job control statements to form a program deck; and test, debug, and document their computer solutions to business problems. Those desiring to specialize in systems programming are strongly urged to continue with COP 2401 Advanced Assembly Language Programming. Four contact hours.

COP 2110  FORTRAN Programming (D)  3 cr.
Prerequisites: COC 1300 and one of the following: MTB 1321, CNM 1005, MAT 1033. A comprehensive study of a scientific programming language which is also used in business applications in batched-job processing environments. Emphasis will be placed on file manipulation, including disk, files, and efficient programming techniques, interactive programming and simulation. Lab problems will include business, engineering, and scientific applications. Four contact hours.

COP 2120  Basic COBOL Programming (D)  3 cr.
Prerequisite: COC 1300 or equivalent experience. COBOL (Common Business Oriented Language) is the programming language specifically designed to solve business problems. Students will solve elementary to moderately complex business problems by (A) writing COBOL programs, (B) submitting programs for compilation and running on the College's computer system, and (C) thoroughly debugging programs until the output is perfect.

COP 2121  Advanced COBOL Programming (D)  3 cr.
Prerequisite: COP 2120, or equivalent experience. COBOL (Common Business Oriented Language) is the programming language designed to solve business problems. Students will solve moderately complex to complex business problems by (a) writing COBOL programs, (b) submitting programs for compilation and running on the College's computer system, and (c) thoroughly debugging programs until the output is perfect. Four contact hours.

COP 2130  PL/I Programming (D)  3 cr.
Prerequisites: COP 1400 and COP 2120. This course will include the study and application of PL/I as applied to business operations. Included within the curriculum will be six weeks of application programming where the student will write and run programs on the college computer system. Four contact hours.

COP 2170  Basic Programming (D)  3 cr.
Prerequisites: COC 1300 or COC 2307 and one of the following: MTB 1321, CNM 1005, MAT 1033. A beginning-level computer programming course using a popular general-purpose language in an interactive or time-sharing environment. The primary machine will be the Prime 300 minicomputer system with the central computer in the FJC Data Center used as back-up in a remote, batched processing environment. Students will solve problems involving business applications, engineering computations, mathematical games and simulation. Four contact hours.

COP 2401  Advanced Assembly Language Programming (D)  3 cr.
Prerequisite: COP 1400. This course is an extension of COP 1400. Topics include file labels, direct-access storage devices, modular concepts in programming, physical I/Os, macro definitions, subroutines, core dumps, program libraries, floating-point arithmetic, and efficient programming in virtual storage environments. Four contact hours.

COP 2610  Advanced Computing and Programming Systems (D)  3 cr.
Prerequisite: COP 2120 and proficiency in computer programming. This course will include the study of computer architectures, operating systems, language translators, and data communication/teleprocessing. Lectures, discussions, demonstrations, and lab problems will be based primarily on the software currently implemented on the EGP-18, Prime 300 and the central computer system in the Florida Junior College at Jacksonville Center. Four contact hours.

CPO 2002  Introduction to Comparative Government (P)  3 cr.
An introductory study of political systems in various countries, showing institutions and stressing some economic characteristics of particular systems compared with institutions and economic systems in other countries. This comparison will be related to specific countries. Three contact hours.

CRM 1039  Data Processing Workshop (D)  3 cr.
Prerequisite: CAP 1001. This course provides the opportunity for students to gain actual work experience within operational data processing centers. Primary emphasis will be placed on the operation of equipment in the Florida Junior College at Jacksonville Data Center and the Data Processing Lab., including the Prime 300 computer system. Efforts will be made to familiarize students with the operation of computer systems and special peripheral devices in other data processing shops. Eight contact hours.

CRW 2020  Imaginative Writing (P)  3 cr.
Prerequisite: ENC 1136. A course to develop the student’s capacity for imaginative writing in prose and/or poetry. Critical discussion of student’s work and of selected literary techniques, individual conferences. Three contact hours.

CTE 1310  Basic Clothing Construction (D)  3 cr.
This course includes the selection and use of commercial patterns; simple alterations; selection, use, and care of modern sewing and pressing equipment; planning and construction of garments, and developing basic construction skills. The selection of suitable accessories will also be included. Four contact hours: two hours lecture; two hours laboratory.
CTE 1340 Advanced Clothing Construction (D) 3 cr.
Prerequisite: CTE 1310. This course presents to the participant the problems encountered in fitted garment construction. Skill in figure analysis, pattern alteration, and advanced clothing construction techniques will be exhibited by the student. Four contact hours: two hours lecture; two hours laboratory.

CTE 1350 Tailoring I (D) 3 cr.
Prerequisite: CTE 1310 or the equivalent. This course is designed for the student who is interested in creating individual fashions which meet the student's special preferences and requirements. Emphasized is an individualized approach to custom design, fit, advanced construction, and tailoring techniques. Four contact hours: two hours lecture; two hours laboratory.

CTE 1401 Basic Textiles (D) 3 cr.
A study of fabrics used for clothing and house furnishings with emphasis on fibers, yarns, construction, designs and finishes that determine qualities and the performance of a fabric. Use and care of fabrics and cost factors will be included. Four contact hours: two hours lecture; two hours laboratory.

CTE 1402 Advanced Textiles (D) 3 cr.
Prerequisite: CTE 1401. A study of recent developments in textiles for apparel and home furnishings with emphasis on man-made fibers, new construction techniques, finishes, and care. End use performance standards and legislation will also be included. Four contact hours: two hours lecture; two hours laboratory.

DAA 1000 Recreational Dance (P) 1 cr.
The introduction and practice of the basic dance skills for enjoyment and recreation. Course content includes round, folk, square, social, and current "Teen-age" dancing. Two contact hours.

DAA 1340 Folk Dance (P) 1 cr.
Exploration and enjoyment of the fundamental steps, positions, and formations of the popular American and ethnic folk and round dances. Two contact hours.

DEA 1000 Introduction to Practice (O) 1 cr.
This course provides a knowledge of the Code of Ethics for dental assistants and the laws which govern the practice of dentistry. An understanding of the functions of other auxiliary dental personnel and their legal limitations. One contact hour.

DEA 1020 Preclinical Orientation (O) 2 cr.
This course covers the nomenclature and anatomy of the human dentition and all supporting structures, plus a detailed microscopic study of the deciduous and the permanent teeth. A study of home care, patient counseling, oral health problems, and delivery of dental health material to the patient. Four contact hours.

DEA 1100 Science for Dental Assistants (O) 2 cr.
This course will be preceded by Anatomy and Physiology. Oral Pathology—A knowledge of etiology of dental caries control. A familiarity with common periodontal diseases. Pharmacology—A knowledge of the drugs commonly used in the dental treatment and the responsibilities in the use of such drugs. A knowledge of the standards set forth by the Food and Drug Administration of the Department of Health, Education and Welfare. First Aid—A knowledge of and ability to administer first aid treatment or combat emergency situations which may occur. Three contact hours.

DEA 2210 Office Management (O) 2 cr.
This course is designed to develop the student's ability to receive and dismiss patients; understand the behavior patterns of people, including parental attitudes; make appointments and maintain appointment books, communicate by telephone with patients and salesmen; respond to emergencies and patients with a grievance, keep financial records, maintain an efficient recall and patient record file, keep books and records for tax purposes, do banking, write business letters, and purchase and maintain supplies. Three contact hours.

DEA 2800 Clinical Practice I (O) 2 cr.
This course is designed to give the dental assisting student a knowledge of chairside assisting, equipment, and its installation, basic maintenance and care of equipment. A knowledge of names, design, use of, and the understanding of sterilizing agents for the proper care and maintenance of all instruments commonly employed in a dental office. The ability to select and prepare properly all instruments for operative, prosthetic, endodontic, orthodontic, and surgical procedures in accordance with instructions from the dentist. The ability to properly maintain a clear operating field. Eight contact hours.

DEA 2801 Clinical Practice II (O) 2 cr.
Clinical and dental office chairside assisting. Twelve contact hours.

DEA 2802 Clinical Practice III (O) 2 cr.
Continuation DEA 2801. Fourteen contact hours.

DEA 2803 Clinical Practice IV (O) 3 cr.
Extern program. Twenty contact hours.

DEH 1000C Principles of Dental Hygiene (O) 4 cr.
Principles of Dental Hygiene is a basic introductory course to teach the theories and practices in dental hygiene, and a prerequisite to DEH 1001C. As such, it is offered during the student's first term of the first year of clinical studies. Through lectures, demonstrations, laboratories, and clinical experiences, and task assignments, the student gains knowledge and comprehension of dental hygiene services, and a proficiency in coordination in technical skills necessary to prepare the student to begin preventive and periodontic patient services the following semester. Eight contact hours: two lecture, six laboratory.

DEH 1001 Dental Hygiene I (O) 5 cr.
This course is a continuation of the Principles of Dental Hygiene. It is a didactic and clinical course comprised of lectures, laboratory exercises, and actual clinical experience on patients. The purpose of this course is to provide the students with clinical hygiene practice for continuing refinement of technical skills and an opportunity to gain extensive experience in the areas of dental hygiene education. Ten contact hours: two lecture, eight clinic.

DEH 1701 Dental Health Education (O) 3 cr.
This course incorporates the principles, practices, methods, and visual aids used in teaching dental health education to the public who may be in dental offices, school, public health institution, club, or industry. It is a study of teaching concepts and practices of preventive dentistry. Practical experience is gained through teaching dental health education in elementary and secondary schools in the community during the entire National Children's Dental Health Week. Three contact hours (lecture).

DEH 1802C Clinical Dental Hygiene II (O) 5 cr.
This course is a continuation of the practical application of the competencies and skills acquired in Principles of Dental Hygiene, DEH 1000C, and Clinical Dental Hygiene I, DEH 1001. The time is devoted to providing oral prophylaxis care for patients, who present varying classifications of prophylaxis needs. Emphasis is on continued refinement of the techniques and skills in performing an oral prophylaxis including Gracey curettes in root planing, periodontal and dental charting, radiographic techniques and interpretation; dietary analysis, and efficiency and care in the management of patients, including those with special needs. Sixteen contact hours; (clinic).

DEH 2101 Oral Histology and Embryology (O) 2 cr.
A detailed microscopic study of normal human embryology and histology of facial and oral structures is presented. Laboratory work is coordinated with the lectures, utilizing histological slides. Four contact hours: one lecture, three laboratory.
DEH 2303  Pharmacology (O)  2 cr.
This course is designed to give the student a detailed study of the principles, characteristics, actions, reactions, and uses of anesthetics, drugs, medicaments, and preparations used to prevent, control and treat diseases. Two contact hours, (lecture).

DEH 2401  Oral Pathology (O)  2 cr.
This course is designed to give the student a detailed understanding and knowledge of the causes and mechanisms of oral disease, oral trauma and oral developmental anomalies. It relates this knowledge to the systematic physiology of the body. Two contact hours.

DEH 2600  Advanced Periodontics (O)  2 cr.
This course is designed to give the student a detailed study of the factors involved in periodontal pathology and its etiology. The anatomy, physiology, and histology of the periodontium is reviewed in detail. Diagnosis, prognosis and treatment of patients with periodontal involvement, and management of patients returning for maintenance care is emphasized. Procedures and techniques for soft tissue curettage, periodontal dressing placement and removal, and suture removal are also taught. Four contact hours: one lecture, three laboratory.

DEH 2702  Community Dental Health (O)  2 cr.
This course is a comprehensive study of oral health problems of groups of people in the community. The students plan approaches to groups, assemble resources, deliver health material, survey, and prepare statistical analysis on these groups. The student receives concentrated field experience in public health centers, Title I schools, hospitals and nursing homes, and centers for the handicapped. Four contact hours: one lecture, three field work.
DEH 2804C  Clinical Dental Hygiene III (O)  5 cr.
This course is a continuation of DEH 1802. Emphasis is on continuing refinement and increased efficiency of clinical skills including complete prophylaxis procedures, radiographs, tact and management of patients, individual responsibilities, achievement in responsibility toward the community, the profession, and dentistry in general. The student is expected to achieve an advanced level degree of proficiency. Sixteen contact hours; (clinic).

DEH 2806C  Clinical Dental Hygiene IV (O)  5 cr.
This course is a continuation in refinement of practical application of the competencies and the proficiencies in skills learned in all of the past clinical didactic courses. Emphasis is in speed and quality improvement, and upon exposure to community dentistry participating in offices of general dentists, dental specialists, and hospital dentistry. The student is expected to achieve an exit level degree of proficiency. Sixteen contact hours; (clinic).

DEH 2930  Dental Hygiene Seminar I (O)  1 cr.
This course is designed to provide a more comprehensive content coverage in all specialties of dentistry, and to enable the dental hygiene student to become more cognizant of techniques and procedures in dentistry, outside the perimeters of dental hygiene. Discussions are designed to assist the dental hygiene student to understand and appreciate the several aspects of dentistry to which dental hygiene services are closely allied. Two contact hours, seminar discussion.

DEH 2931  Dental Hygiene Seminar II (O)  1 cr.
This course is designed to provide a study of professional ethics and commitments, professional organizations, state dental practice acts, and practical consideration of methods and problems associated with operating and maintaining a dental practice. Emphasis is placed on the dental hygiene student's role as a professional person in the community, in private practice, and as an integral part of the dental auxiliary team. One contact hour.

DEP 2004  Human Growth and Development (P)  3 cr.
A study of the development of the individual throughout the life cycle, including child, adolescent and adult patterns of behavior. Attention is given to physical, intellectual, cognitive, personality, and social development. Three contact hours.

DEP 2102  Child Psychology (P)  3 cr.
Prerequisite: PSY 1012. A developmental study is made of the normal child, from birth to the adolescent years. Practical applications are stressed, with their implications for the parent and teacher, as well as for the evolving individual. Three contact hours.

DEP 2302  Adolescent Psychology (P)  3 cr.
Prerequisite: PSY 1012. Development in the adolescent years with emphasis on psychological problems. Three contact hours.

DES 1000C  Oral Anatomy (O)  3 cr.
This course is a comprehensive study of macroscopic anatomy of the primary and permanent dentitions. Students learn the anatomy of the individual teeth and their investing structures, and the human dentition in conceptual and clinical anatomy and physiology of head and neck structures are included. Four contact hours: two lecture, two laboratory.

DES 1100C  Dental Materials and Assisting (O)  3 cr.
This course is designed to familiarize the dental hygiene student with the properties of the various materials used in dentistry with reference to the restorative and laboratory aspects of patient treatment. The student is exposed to the preparation of various dental materials, and the clinical techniques and methodologies for four-handled dentistry, with practical application of assisting in laboratory experiences. Seven contact hours: one lecture, six laboratory.

DES 1102  Dental Materials and Laboratory (O)  2 cr.
A series of lecture-demonstrations is designed to acquaint the dental assistant student with the nomenclature, proper manipulation, and application of the materials used in the laboratory and clinical practice of dentistry. The procedures for purchasing and storage of supplies will be considered. Four contact hours.

DES 1200C  Dental Radiology (Dental Assisting) (O)  2 cr.
This course is designed to acquaint the student with the nature, physical behavior, biological effects, methods of control, safety precautions and the techniques for exposing, processing, and mounting dental x-rays. Laboratory procedures will include the application of these techniques in clinical practice. Four contact hours.

DES 1201C  Dental Radiology (Dental Hygiene) (O)  3 cr.
This course is designed to teach the proper use of dental x-ray equipment, including radiation safety, the taking, processing, and mounting of dental radiographs, both intra-oral and extra-oral. It includes evaluation techniques, identifying landmarks and deviations from the normal, and the filing of dental radiographs. Four contact hours: two lecture, two laboratory.

DIE 1201  Therapeutic Nutrition (O)  3 cr.
The student will acquire knowledge and skills in applying the principles of dietary modifications for specific physiological disorders. The course is closely related to the practices of local hospitals and extended care facilities. Three contact hours.

ECO 2000  Foundations of the American Economy (P)  3 cr.
A survey of the American economic system and its development. The course is designed to guide the student in a practical examination of the contemporary operation of regulated capitalism in the United States. Consideration is given to business organizations, the market system, gross national product, banking and finance, problems in employment, and various other aspects of the Government’s relation to the national economy. Three contact hours.

ECO 2013  Principles of Economics I (P)  3 cr.
Macroeconomics: The foundations of economic analysis; theory of economic growth and stabilization; monetary theory, international trade and economic development. Three contact hours.

ECO 2023  Principles of Economics II (P)  3 cr.
Prerequisite: ECO 2013 or consent of prof. Microeconomics. This course includes a study of the tools for economic analysis, the market system price theory, theory of the firm, and theories of production and distribution. Three contact hours.

EDF 1005  Introduction to Education (P)  3 cr.
An introductory course in education designed to assist the student in understanding the American educational system in terms of its development and the present organization. The student is acquainted with the problems and the rewards of the profession. Three contact hours.

EDG 2940  Observing & Recording Child Behavior (D)  6 cr.
Prerequisites: CHD 1220 and EEC 1001. This course is designed to increase the student’s objectivity and proficiency in observing and interpreting children’s behavior in addition to participating in supervised experiences with the child in the laboratory. Lecture, observation, and participation facilities are provided for the study of young children. Ten contact hours: two class hours; eight laboratory hours.

EDG 2941  Supervised Student Participation (D)  6 cr.
Prerequisite: EDG 2940. This course is designed for participation, under qualified supervision, in the Child Care Laboratory. Ten contact hours: two class hours; eight laboratory hours.

EDP 2002  Education Psychology (P)  3 cr.
Prerequisite: PSY 1012. An in-depth study of the relationships between sound psychology and educational process which will lead to the establishment of proper teaching techniques and understanding of personality dynamics of students. Three contact hours.
ECC 1001 Introduction to Early Childhood Education (D) 3 cr.
This course is an introduction intended to acquaint the student with the basic principles involved in guiding the young child. History of the field of early childhood, objectives of early childhood programs, parent and community involvement, minimum licensing standards, and job opportunities are also included. Three contact hours.

ECC 1201 Overview of Early Childhood Curriculum I (D) 3 cr.
This course is designed to acquaint the student with the basic principles involved in guiding the young child in the areas of Music, Art, Language Arts, and Social Studies. Language Development and Lesson Planning as related to the above curriculum areas are included. Three contact hours.

ECC 1202 Overview of Early Childhood Curriculum II (D) 3 cr.
This course is designed to acquaint the student with resources and basic principles involved in guiding the young child in the areas of Math, Science, and Movement Education. Language Development and Lesson Planning as related to the above curriculum areas are included. Three contact hours.

EXX 1000 Introduction to Exceptional Child Education (D) 3 cr.
An introductory course surveying the characteristics and needs of exceptional children. Three contact hours.

EGN 1130C Descriptive Geometry (D) 3 cr.
Prerequisite: ETD 1100C. Theory and practice in solving problems involving point, line, and space relationships. Six contact hours: two class hours; four laboratory hours.

EMT 1101 Basic Emergency Medical Technology (D) 6 cr.
This course is designed to serve as a basic guide for emergency medical technicians. It provides an introduction to EMT-1105. On successful completion of this course one is qualified to take the State Registry Examination for EMT-A administered by the Health Department. Twelve contact hours.

EMT 1185C Fundamentals of Emergency Medical Care I (D) 6 cr.
This course is designed to provide basic emergency medical care training to conform to the guidelines provided by the American Medical Association and the American Association of Junior Colleges and approved by the State of Florida for Emergency Medical Technicians. Twelve contact hours.

EMT 2208 Fundamentals of Emergency Medical Care II (D) 6 cr.
This course provides the final necessary education required by the Florida Board Examination for EMT-II. Must have successfully completed EMT-I, hold State Certification. Nine contact hours.

EMT 2228 Advanced Emergency Medical Technology (D) 6 cr.
Prerequisite: A C or better in APB 210C, EMT 2208. Corequisites: MCB 2013C, Provides additional education in the care of the emergency patient. Course conforms to guidelines provided by the A.M.A. and the American Association of Junior Colleges. Eight contact hours.

EMT 2806 Practicum In Emergency Medical Technology (D) 6 cr.
Prerequisite: EMT 2287. A course of study to allow the emergency medical technician a better understanding of the long-term care of the sick and injured. Rotations include: Medical, Surgical, Neonatal, Pediatrics, and systematic planning and evaluation of patient care. Twenty-four contact hours.

ENC 1005 Introduction to Composition (P) 3 cr.
This is a course designed to develop the student's skills in grammar, spelling, and vocabulary through writing. The primary emphasis is on writing and short communications. Three contact hours.

ENC 1103 English Composition I (P) 3 cr.
A comprehensive course which embodies the fundamentals of effective expression, with emphasis on expository writing, logical and imaginative thinking, and reading for understanding and appreciation. Three contact hours.

ENC 1136 English Composition II (P) 3 cr.
Prerequisite: ENC 1103. A continuation of ENC 1103. This course includes study and practice in research writing. Three contact hours.

ENC 2315 Technical Report Writing (D) 3 cr.
Prerequisite: ENC 1103. A course of study in the proper arrangement, format, and analysis of technical data, specifications, and findings for presentation in report form. Methods and techniques for display of raw data by use of graphs and charts are emphasized. Three contact hours.

ENG 2160 Children's Literature (P) 3 cr.
Chronological survey of literature for children ages one to twelve, organized by format, subject, reading and interest levels. Reading, selection and evaluation of materials, sources of materials, and use of materials with children. Three contact hours.

ENL 2013 English Literature I (P) 3 cr.
Prerequisite: ENC 1136. An introduction to the main literary traditions from Beowulf through the Restoration and Eighteenth Century. A study of the best and most characteristic writings of these periods. Three contact hours.

ENL 2023 English Literature II (P) 3 cr.
Prerequisite: ENC 1136. An introduction to the main literary traditions from the Romantic and Victorian periods to the present. Study of the best and most characteristic writings of these periods. Three contact hours.

ETC 1321L Surveying (D) 3 cr.
Prerequisites: MTB 1322, ETD 1100C. A study of the fundamentals of basic surveying together with related field work in the use of instruments and tables. Investigation and calculations regarding land area, traverses, standard deviations and errors will be emphasized. Four contact hours: two class hours; two laboratory hours.

ETC 2410 Fabrication Processes (D) 3 cr.
Prerequisite: ETG 2504C. Analysis of the methods and materials involved in the assembly of machines and structures. The study includes evaluation of the specifications and standards, stress analysis, quality control, material properties and engineering principles involved. Four contact hours: two class hours; two laboratory hours.

ETD 1100C Engineering Drawing (D) 3 cr.
A survey course of the principles and practices involved in making and reading engineering drawings. Emphasis is placed on lettering, industrial symbolism, orthographic projection, and multiview representation. Six contact hours: two class hours; four laboratory hours.

ETD 1645C Mechanical and Electrical Drafting (D) 3 cr.
Prerequisite: ETD 1100C, suggested corequisite EGN 1130C. A course in mechanical and electrical drafting. Emphasis is on assembly and detail drawings of mechanical parts. Included is an introduction to electrical drafting. Six contact hours: two class hours; four laboratory hours.

ETD 2121C Civil Drafting (D) 3 cr.
Prerequisite: ETD 1100C. A survey course covering structural and topographical drafting. Samples of drafting for buildings, bridges, towers, and other structures will be included, teaching structural design principles. The topographical unit will include drawing maps from information obtained in a survey, by aerial photography, etc. The making of contour maps, the meaning of various symbols, and the conventions peculiar to topography will be taught. Six contact hours: two class hours; four laboratory hours.
ETE 1001 Fundamentals of General Electricity (D) 3 cr.
A survey course of the electrical field covering both direct current and alternating current theory, and basic electrical elements. It is designed for the non-electrical engineering technician to provide a general knowledge of electrical phenomena. Three contact hours.

ETE 1010 D/C Theory and Circuits (D) 3 cr.
Prerequisite: MTB 1321. A study of the basic nature of electricity, direct current circuits, batteries, measuring instruments, magnetism, inductance and capacitance. Laboratory sessions are devoted to the application of acquired theory with emphasis on the proper use of modern electronics equipment. Four contact hours.

ETE 1020 A/C Theory and Circuits (D) 3 cr.
Prerequisite: MTB 1322. A study of sinusoidal waveforms and the analysis of steady-state electrical circuits. Topical units of instruction include resistance, impedance, resonant circuits, transformer action and coupled networks. A laboratory course designed to reinforce the student's understanding of important theoretical concepts. Four contact hours.

ETE 2101 Electronics I (D) 3 cr.
Prerequisite: ETE 1020. An introductory course covering the principles of operation of semiconductor (solid-state) devices and circuits. Major emphasis is on PN junction theory, junction diodes, tunnel diodes, and photo-electric devices. Four contact hours.

ETE 2111 Electronics II (D) 3 cr.
Prerequisite: ETE 2101. Major emphasis is placed on bipolar transistors and transistor amplifiers. Graphical and piecewise-linear analysis of transistor circuits. T parameters and hybrid linear models. Four contact hours.

ETE 2112 Electronics III (O) 3 cr.
Prerequisite: ETE 2111. Introduction to solid state digital circuits and the diode and transistor as logic gates and switching devices. Course includes flip-flop, signal generating circuits, comparator circuits, frequency dividers, and associated digital circuits. Four contact hours.

ETE 2121 Advanced Electronic Circuit Analysis (D) 3 cr.
Prerequisite: ETE 1020. The study of network theories. D.C. circuit analysis, filters, plot, and gain. Phase-shift networks, parallel series circuit conversions, resonance, anti-resonance, bandwidth, selectivity, input and output impedance, universal resonance curve, transient analysis, and transformers. Three contact hours.

ETE 2141 Semiconductor Circuit Design (D) 3 cr.
Prerequisite: ETE 2111. The study of field effect transistors and integrated circuits includes basic design procedures for the design of solid state and integrated circuits, digital integrated circuits, and other non-linear circuits. Four contact hours.

ETE 2527 Electrical-Electronic Control Systems (D) 4 cr.
Prerequisites: ETE 2101, ETE 2111. A study of the operation and control of industrial equipment and processes including motors and the controlling systems involved in their operation and protection. Four contact hours.

ETE 2633C Computer Logic Circuits (O) 3 cr.
A study of computer circuits and systems, gates, counters, binary numbers, codes and code conversion counters, arithmetical operations, and digital measuring instruments. Four contact hours.

ETG 2201C X-Ray Technology I (O) 3 cr.
Prerequisite: MTB 1321. A study of the basics of X-ray technology, the X-ray beam, and other equipment used in the examination of materials and processes. Study of the effects of the X-ray beam on materials and the application of X-ray procedures. Study of the X-ray beam in production of radiographs. Three contact hours.

ETG 2202C X-Ray Technology II (D) 3 cr.
Prerequisite: ETG 1201C, ETE 1010. Detailed studies of X-ray transformers and rectifiers, and safety handling procedures. Detailed studies of X-ray controls, including timers, stabilizers, auto-rotation, and filament controls. Detailed studies of combination X-ray tables, X-ray tubes, X-ray tubes, and X-ray exposure devices. Six contact hours.

ETG 2203C X-Ray Technology III (O) 3 cr.
Prerequisite: ETG 2202C, Corequisite: ETE 2101. A study of the structure of matter, radioisotopes, medical applications, instrumentation, sources of error in counting, radiotransfer scanning, physics of X-ray protection, safety measures, permissible dosage, radiation hygiene, X-ray equipment, techniques of application and building requirements. Six contact hours.

ETG 2204C X-Ray Technology IV (O) 3 cr.
Prerequisite: ETG 2203C, Corequisite: ETE 2111. A study of the application of X-ray machines, radiography, and X-ray machines, radiography, and X-ray machines, and nuclear medicine apparatus. A study of the use of radiation in non-destructive testing in the industrial field. Field trips to actual installations. Three contact hours.

ETG 2205C X-Ray Technology V (O) 3 cr.
Prerequisite: ETG 2204C, Corequisite: ETE 2112. Study of television and videotape recording in radiology, emphasis on field work on actual installations. Studies in hospital procedures, industrial studies in measurement and quality control, medicine apparatus, and nuclear medicine equipment. A study of the use of radiation in non-destructive testing in the field. Field trips to actual installations. Six contact hours.

ETG 2504C Engineering Mechanics (D) 4 cr.
Prerequisites: MTB 1322, ETE 1421C. Introduction to the basic laws and principles of mechanics. A study of force systems, principles of moments, forces, and static equilibrium. In this development, friction, centripetal, moment of inertia, and the concept of work, energy, and power are presented. The application of these fundamental concepts to practical engineering problems as used in structural members and machine elements is emphasized. Five contact hours.

ETG 2535C Testing and Strength of Materials (D) 4 cr.
Prerequisite: ETG 2504C. The study of the basic concepts involved in determining the resistance of engineering materials to various loads with emphasis on the applied use of various formulas for a systematic analysis. Five contact hours: three class hours; two laboratory hours.

ETI 1121 Introduction to Non-destructive Testing (O) 3 cr.
This course reviews the basic principles underlying non-destructive testing. It is anticipated that interested students will be stimulated by this course and seek additional information in more extensive work on non-destructive testing. Course will cover types of inspection, to include visual, radiographic, magnetic particles, ultrasonic, dye penetrant, eddy current, acoustical holographic, thermal, as well as new research and development in non-destructive testing. Three contact hours.

ETI 1122 Non-destructive Testing: Liquid Penetrants and Magnetic Particles (O) 3 cr.
Prerequisite: ETI 1121, or permission of professor. The study of the use of liquid penetrants as they pertain to non-destructive testing to include development, application, compatibility and tests of penetrant materials. A study of magnetic particles theory and test of materials and equipment. Four contact hours.

ETI 1421C Engineering Materials and Processes (D) 4 cr.
A survey of the basic materials used in industry, metallic and non-metallic, and the processes used to form, fabricate, and finish these materials. Three contact hours: three class hours; two laboratory hours.
ETI 1700  Industrial Safety (D)  3 cr.
This course is designed to impart the knowledge essential to safe practices in industry. It covers all aspects of Federal Government regulations promulgated by the U.S. Department of Labor, Occupational Safety & Health Administration. Three contact hours.

ETI 2440  Industrial Design (D)  3 cr.
Prerequisite or corequisite: EGN 113GC. A course designed to give the student knowledge and practice in common industrial design methods. Emphasis is on elements of good design and functional and proper presentation of design. Six contact hours: two class hours; four laboratory hours.

ETI 2681  Industrial Supervision (D)  3 cr.
The purpose of this course is to prepare the student for a role in the world of work as the student assumes responsibilities leading toward supervisory positions and management. Three contact hours.

ETM 2221  Elements of Applied Energy (D)  3 cr.
Prerequisites: MTB 1322, ETI 1421C. An introduction to applied thermodynamics. The study of the transformation of energy to useful work through mechanical elements, heat engines, I.C. engines, compressors, turbines, and ancillary equipment. Three contact hours.

ETM 2310  Fluid Mechanics (D)  3 cr.
Prerequisites: MTB 1322, ETI 1421C. A general survey of the laws involving the flow of fluids, and their application to the processes, equipment and machines that are used in the energy-to-work transformation. Three contact hours.

ETM 2610C  Air Conditioning & Heating (D)  3 cr.
Prerequisites: MTB 1321, 1322, ETI 1421C. An introductory course to environmental control of buildings and houses with emphasis on equipment performance and system design. Four contact hours: two class hours; two laboratory hours.

EUH 1000  Western Civilization (P)  3 cr.
A survey of the cultural beginnings of civilization and the diffusion and accretion of culture through 1715: Ancient Egypt, Mesopotamia, Greece, Rome, Byzantium, Islam, the Medieval Period, the Renaissance, and the Protestant Revolt. Three contact hours.

EUH 1001  Western Civilization (P)  3 cr.
Modern western institutions from 1715 to the present day. Includes the developing capitalist system, absolutism, the Enlightenment; the era of revolutions; the Constitution of the United States, the development of democracy, the industrial revolution, nationalism, the two world wars, and the cold war. Three contact hours.

FAD 1230  Dynamics of Modern Living (D)  3 cr.
A study of the interpersonal relationship to include personal and family problems: analyses of the basic elements involved in courtship, mate selection, engagement, marriage, parenthood, and child development. Also covered are topics such as principles of good manners and acceptable standards of social behavior, personal appearance, social customs, personality development, human relations and consideration of the various occupational opportunities within the broad field of home and family life education. Three contact hours.

FFP 1000  Introduction to Fire Science (D)  3 cr.
A study of the philosophical and historical backgrounds of fire protection services; the role and responsibilities of the fire service; the organization and function of federal, state, county, and private fire protection agencies; review of municipal fire defenses, fire prevention principles, techniques of fire control, codes and ordinances; problems of the fire administrator, and survey of professional fire protection career opportunities. Three contact hours.

FFP 1100  Fire Company Organization and Procedures (D)  3 cr.
Principles of organization and administration in fire protection service; a study of company personnel management and training, fire equipment, communications, maintenance, budgeting, records and reports, insurance rating systems, and public relations. Three contact hours.

<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FFP 1110</td>
<td>Fire Operations (D)</td>
<td>3 cr.</td>
<td>The structure and function of battalion and company as components of municipal organizations, and duties and responsibilities of the company officer. Three contact hours.</td>
</tr>
<tr>
<td>FFP 1203</td>
<td>Fundamentals of Fire Prevention (D)</td>
<td>3 cr.</td>
<td>Structure and function of the fire prevention organization; interpreting and applying code regulations; a study of the procedures and techniques of fire prevention, to include inspection, surveying and mapping, recognition and elimination of fire hazards, problems of public relations, and coordination with other governmental agencies. Three contact hours.</td>
</tr>
<tr>
<td>FFP 2240</td>
<td>Fire Investigation (D)</td>
<td>3 cr.</td>
<td>A study of the principles of fire investigation: methods of determining area of fire origin, fire cause, and fire spread; location and preservation of evidence, interrogation of witnesses, arson detection, arson laws, case preparation and court procedures, and reports and records. Three contact hours.</td>
</tr>
<tr>
<td>FFP 2310</td>
<td>Fire Codes and Building Construction (D)</td>
<td>3 cr.</td>
<td>A study of federal, state, and local laws applicable to the fire services, a survey of Fire Codes and Standards of the National Fire Protection Association and the Fire Prevention Code of the National Board of Fire Underwriters; role of the State Fire Marshal; principles and practices used in building construction. Three contact hours.</td>
</tr>
<tr>
<td>FFP 2400</td>
<td>Fire Fighting Tactics and Strategy (D)</td>
<td>3 cr.</td>
<td>Basic concepts involved in fire fighting, including fire behavior, size-up, attack principles, and utilization of available manpower and equipment; preparing fire problems. Emphasis will be on developing thinking skills in relation to crises. Three contact hours.</td>
</tr>
<tr>
<td>FFP 2500</td>
<td>Flammable Hazardous Materials (D)</td>
<td>3 cr.</td>
<td>This course presents the basic fundamentals of chemistry used in fire science; types of chemicals and processes; and laws at federal, state, and local levels pertaining to use, storage, and transportation of chemicals. Also, topics covered include hazards of radioactives, precautions to observe in fighting fires involving hazardous materials, and laboratory demonstrations of incompatibilities. Three contact hours.</td>
</tr>
<tr>
<td>FFP 2524</td>
<td>Explosive and Toxic Hazardous Materials (D)</td>
<td>3 cr.</td>
<td>This course is divided into two sections. The first of these deals with why materials explode, why they are unstable, and how they react with water, air, and each other. The second section explores toxicity. Three contact hours.</td>
</tr>
<tr>
<td>FFP 2600</td>
<td>Fire Fighting Equipment and Apparatus (D)</td>
<td>3 cr.</td>
<td>Principles of pumping, construction and operation of pumps and pumping accessories, driving and pumping practices, principles and operation of aerial ladders, hydraulic systems, water supply, trouble shooting, and related subjects. Also covered are principles of the care, maintenance, and operation of fire department vehicles. Subjects covered include theory of internal combustion engines, power development and transmission, torque and horsepower, electrical and brake systems, carburetion, engine tune-up and trouble shooting, characteristics of fuels and lubricants, and other related principles of automotive vehicles. Three contact hours.</td>
</tr>
<tr>
<td>FFP 2660</td>
<td>Rescue Practices (D)</td>
<td>3 cr.</td>
<td>Instruction is given in life saving practices pertaining to the fire company. Training for rescusillator squads and rescue equipment, the fire department's role in civil defense and other disaster acts, chemicals and diseases that affect breathing, law on first aid, and the use of breathing apparatus are included. Three contact hours.</td>
</tr>
<tr>
<td>FIL 1605</td>
<td>Film as Art (P)</td>
<td>3 cr.</td>
<td>Introductory study of history and methods of motion picture production. Emphasis on the appreciation of artistic methods of significant motion pictures. Four contact hours.</td>
</tr>
<tr>
<td>FIN 2000</td>
<td>Principles of Finance (D)</td>
<td>3 cr.</td>
<td>Prerequisites: CMB 1001, ACC 1009 or ACC 2001, or consent of professor. Investment characteristics of stocks and bonds, securities market, introduction to securities analysis, commercial banks and the federal reserve system; inflation, deflation, and the money supply; history and nature of money, and financial management. Three contact hours.</td>
</tr>
<tr>
<td>FIN 2100</td>
<td>Personal Finance (D)</td>
<td>3 cr.</td>
<td>A study of economic and personal goals including personal budgeting, credit buying, borrowing money, banking facilities, the nature of investments, life insurance, casualty insurance, medical insurance, home ownership, stocks and bonds, and retirement plans. Three contact hours.</td>
</tr>
<tr>
<td>FIN 2230</td>
<td>Money and Banking (D)</td>
<td>3 cr.</td>
<td>This course stresses the practical aspects of money and banking and emphasizes the basic monetary theory needed by the banking student to apply the student's knowledge to the particular job. Historical treatment has been kept to a minimum. Emphasis is also placed on such problems as economic stabilization, types of spending, the role of gold, limitations of central bank control, government fiscal policy, balance of payments, and foreign exchange, showing their repercussions on the banking industry in affecting yield curves and the structuring of portfolios. It is recommended that BAN 1110—Principles of Bank Operations—be taken prior to enrolling for FIN 2230. Three contact hours.</td>
</tr>
<tr>
<td>FOS 1201</td>
<td>Sanitation and Safety (O)</td>
<td>2 cr.</td>
<td>The student will explore the scientific rationale for sanitation and safety practices which are enforced for group protection in institutions and food service facilities. The student will identify causative agents of food-borne illnesses and demonstrate preventive techniques by adhering to sanitation standards. Emphasis is placed on methods of accident and fire prevention. Two contact hours.</td>
</tr>
<tr>
<td>FRE 1100</td>
<td>Beginning French I (P)</td>
<td>3 cr.</td>
<td>This course consists of pronunciation, grammar, conversation, exercises, reading and composition. Visual and auditory aids are employed. Four contact hours: three class hours; one laboratory hour.</td>
</tr>
<tr>
<td>FRE 1101</td>
<td>Beginning French II (P)</td>
<td>3 cr.</td>
<td>Prerequisite: FRE 1100. A continuation of FRE 1100. Four contact hours: three class hours; one laboratory hour.</td>
</tr>
<tr>
<td>FRE 2200</td>
<td>Intermediate French I (P)</td>
<td>3 cr.</td>
<td>Prerequisite: FRE 1101. Reading from modern and classic French authors, grammar review, and conversation. Four contact hours: three class hours; one laboratory hour.</td>
</tr>
<tr>
<td>FRE 2201</td>
<td>Intermediate French II (P)</td>
<td>3 cr.</td>
<td>Prerequisite: FRE 2200. A continuation of FRE 2200. Four contact hours: three class hours; one laboratory hour.</td>
</tr>
<tr>
<td>FSS 1004</td>
<td>Orientation to Food Service Technology (O)</td>
<td>3 cr.</td>
<td>The student will explore employment opportunities in the food service industry, including job opportunities in hospitals, extended care facilities, restaurants, hotels, motels, fast food operations, and private clubs. Emphasis is placed on the analysis and the acquisition of educational and personal competencies required for job success. Three contact hours.</td>
</tr>
<tr>
<td>FSS 1100</td>
<td>Menu Design and Food Merchandising (O)</td>
<td>3 cr.</td>
<td>The student will acquire knowledge and demonstrate skills in menu planning, costing and pricing menu items, and designing menu format. Effective merchandising methods in food display, advertising, and interior decorating will be utilized. Positive public relations techniques will be emphasized. Three contact hours.</td>
</tr>
<tr>
<td>FSS 1120</td>
<td>Food and Beverage Purchasing (O)</td>
<td>3 cr.</td>
<td>The student will acquire the fundamentals involved in purchasing food and beverages in quantity. Emphasis is placed on standardizing, grading, estimating, accepting, receiving, and storing foods and beverages. Practical application in writing specifications and in developing purchasing techniques is emphasized. Three contact hours.</td>
</tr>
</tbody>
</table>
FSS 1201 Basic Food Preparation (O) 4 cr.
The student will acquire knowledge and skill in the preparation of food including basic principles and techniques of food preparation, management of resources, use of recipes, use and care of equipment, and evaluation of food products. Safety and sanitation practices are emphasized. Five contact hours: three lecture, two laboratory.

FSS 1221 Quantity Food Production (O) 3 cr.
Prerequisite: FSS 1201. The student will acquire the principles of quantity food preparation and service for cafeterias, restaurants, and institutions. Major emphasis will be placed on equipment use and care, standardized recipes, portion control, work plans and schedules. Five contact hours: two lecture, three laboratory hours.

FSS 1246 Baking (O) 3 cr.
The student will acquire knowledge of the composition and properties of baking ingredients. The proper equipment and tools will be utilized to prepare baked products. Using standardized recipes, yeast breads, quick breads, rolls, pastries, and cakes will be produced in the food service laboratory. The products prepared will be evaluated by established food service standards. Five contact hours: one lecture, four laboratory hours.

FSS 1248 Garde-Manger I (O) 3 cr.
The student will acquire knowledge and demonstrate skills in the application of special garde-manger techniques used in ice and tallow sculpturing. Dexterity in the proper use of tools to produce dinner and ice sculptured showpieces will be demonstrated. Four contact hours: two lecture, two laboratory hours.

FSS 1249 Garde-Manger II (O) 3 cr.
Prerequisite: FSS 1248. The student will acquire advanced skills and techniques in the creation of aspic-pates, chaud-froids, terrines, galantines, and sauces for buffet table arrangements. Emphasis is placed on proper manipulation of tools to produce showpieces. Four contact hours: two lecture, two laboratory hours.

FSS 1250 Food and Beverage Service (O) 3 cr.
The student will acquire knowledge of various types of service appropriate to coffee shops, dining rooms, luncheons, banquets and buffets. The relationship of menu, equipment, supplies, merchandising and personnel to create good patron acceptance is demonstrated. Three contact hours.

FSS 1251 Restaurant Operation (O) 3 cr.
The basic principles of analysis of food management problems, job analysis methods, selection, control and supervision of personnel, facilities layout, labor and food cost control, purchasing, legal problems, furniture and decor for clubs, restaurants and related institutions. Three contact hours.

FSS 1410 Food Service Equipment/Facility Planning (O) 3 cr.
The student will evaluate the various types of food service equipment relative to cost, structure, function, and maintenance. A layout for a food service operation will be designed to include equipment specifications, energy conservation measures, diversity of function, cost control and consideration toward future adaptability. Three contact hours.

FSS 1940 Food Service Practicum I (O) 3 cr.
Prerequisite: FSS 1201. Prerequisite or Corequisite: FSS 1221. The student will apply knowledge and skills in quantity food production including purchasing, preparing, merchandising and serving in an actual food service operation. The food will be prepared in the food service laboratory and merchandised to college personnel. The student will be evaluated on performance in various jobs which the student will fill on a rotation basis. Fifteen contact hours.

FSS 1941 Food Service Practicum II (O) 3 cr.
Prerequisite: FSS 1940. The student will continue to apply knowledge and skill in the production of quantity food in the food service laboratory. The student will also exhibit knowledge in the area of management and supervision and will be evaluated on performance. Fifteen contact hours. (Laboratory)
FSS 2300 Supervision and Personnel Management (O) 3 cr.
The student will develop and demonstrate skills necessary to the managerial procedures and functions of a food service operation. Emphasis will be placed on personnel selection, interviewing techniques, supervision, organization, and planning and evaluation. Three contact hours.

FSS 2501 Food and Beverage Control (O) 3 cr.
Introduces the basic principles and procedures of effective food and beverage cost control. Includes food and beverage purchasing, receiving, and issues; calculation of actual food and beverage cost, establishment and calculation of standards, production, planning and special control. Three contact hours.

FSS 2945 Food Service Internship (O) 9 cr.
The student will work on-the-job as an intern under the supervision of qualified personnel in food service establishments within the community. Course theories and skills will be applied in this work experience. The internship program requires a minimum of twelve weeks for a total of 450 hours. A two-hour classroom seminar will be held bi-weekly on campus. A passing grade of “C” or better is required for graduation with an Associate in Science degree. Thirty-eight contact hours.

GEA 1000 World Geography (P) 3 cr.
an introductory course dealing with humanity's relationship to the natural environment in the various climatic, regional, and economic areas of the world, their interrelationships and problems of conservation of natural resources. Three contact hours.

GEB 1011 Introduction to Business (D) 3 cr.
an introduction to business organization and procedure, enabling the student to more intelligently pursue advanced business courses and to choose a business career. Three contact hours.

GEO 2370 Conservation of Resources (P) 3 cr.
a survey of natural and human resources of the world. Special emphasis will be placed on the United States with an intensive study of the wise use and wasteful practices in the exploitation and utilization of these resources. Three contact hours.

GER 1100 Beginning German I (P) 3 cr.
This course consists of pronunciation, elements of grammar, simple conversation, exercises, reading, and composition. Visual and auditory aids are employed. Four contact hours: three class hours; one laboratory hour.

GER 1101 Beginning German II (P) 3 cr.
Prerequisite: GER 1100. A continuation of GER 1100. Four contact hours: three class hours; one laboratory hour.

GER 2200 Intermediate German I (P) 3 cr.
Prerequisite: GER 1101. Reading from standard German authors; careful review of grammar, conversation, and composition. Four contact hours.

GER 2201 Intermediate German II (P) 3 cr.
Prerequisite: GER 2200. A continuation of GER 2200. Four contact hours.

GLY 1000 Earth and Space Science (P) 3 cr.
Prerequisite: None. This course is designed to acquaint the student with the development of science with the integrating principles and theories in the earth sciences, with the practice of the scientific method, and with a useful knowledge of selected areas of geology, astronomy, and meteorology. Presentation involves lectures, demonstrations, and films. The course is for general education and is not designed essentially as an introductory or preparatory course for any of the specific sciences. Three contact hours.

GLY 1010 Physical Geology (P) 3 cr.
The student will benefit by taking High School Algebra or MAT 1024 prior to enrolling in this course. Physical Geology is the study of the earth. Topics covered are structure and land forms, modifying agents and processes, characteristic rocks and minerals and a brief study of the surrounding atmosphere and the earth as a planet. For majors and non-majors. Three contact hours.

GLY 1100 Historical Geology (P) 3 cr.
Prerequisite: GLY 1010. A study of the geologic history of the earth dealing with the major physical events as recorded in rock formations and with the constantly evolving changes in animals and plants through time. Three contact hours.

HES 1000 Personal and Community Health (P) 3 cr.
A study of health problems which are of major importance to our society. Emphasis is placed on drugs, tobacco, alcohol, sex, and general principles involved in our present understanding of health related areas. Three contact hours.

HES 1400 Standard First Aid (P) 1 cr.
This course prepares an individual to handle most common emergencies by stressing accident prevention, early medical care, common injuries and life-saving skills. The American National Red Cross Standard First Aid Certificate is earned upon successful completion of the course. One contact hour.

HES 2400 Standard First Aid & Personal Safety (P) 2 cr.
This course is designed to meet the needs of individuals who have an opportunity to give first aid care frequently within their daily routine and/or special responsibilities. The American National Red Cross Standard First Aid & Personal Safety Certificate is earned upon successful completion of the course. Two contact hours.

HFT 1000 Introduction to Hospitality Management (O) 3 cr.
An introduction to the hospitality industry and management of hotels, motels, and restaurants. An orientation course designed to give the student an opportunity to learn about the industry, problems, and opportunities in the hotel, motel and restaurant industry. Three contact hours.

HFT 1250 Hotel/Motel Operation (O) 3 cr.
This course is designed to acquaint the student with the operation of a hotel or motel. It includes front office procedures in registering, accounting for and checking out guests, promotional and sales practices, housekeeping, interior decoration, purchase of furniture, carpeting, linens and supplies, maintenance and engineering of a practical nature, facilities specifications, purchasing and storage. Three contact hours.

HFT 1270 Apartment Management (O) 3 cr.
This course outlines the procedures to be followed in the day-to-day problems encountered in the management and operational effectiveness applied to apartment management. It is designed to cover all facets of apartment management including leases, termination, collection forms, maintenance, purchasing, insurance, accounting records, selection of personnel and agreements, public and human relations and recreational aspects. Three contact hours.

HFT 1410 Front Office Management—Hotel/Motel (O) 3 cr.
This course is designed to take the student in successive stages from an orientation in a hotel/motel front office through all of the skills needed to manage properly the front office to the end of having a knowledgeable manager capable of directing the activities and solving the complex problems of hotel/motel front office management. It will acquaint the student with the operation of all the departments as they apply to the student's primary responsibility of handling rooms and serving guests. Three contact hours.

HFT 2221 CusPersonnel Relations (O) 3 cr.
This course explores the various successful techniques involved in establishing effective communications and functional relationships with the customer and personnel at all levels. Three contact hours.

HFT 2700 Tourism (O) 3 cr.
Prerequisite: HFT 1000. Tourism, which is travel, is defined as including the whole hospitality field — hotels, motels, resorts, restaurants, camping and all the supportive services for travelers and vacationers. This course is designed to develop an understanding of the travel modes and to make the student knowledgeable and responsive to the developments and the economic approaches that are necessary in order to become a travel manager. Three contact hours.
HFT 2941 Internship (O) 3 cr.
On-the-job work experience supplied by the hotel, motel and restaurant industries. Job placement will be dependent upon the student's preference and availability of participating hospitality institutions. The course consists of 15 hours per week of on-the-job instruction accompanied by one seminar each week. Students employed in the industry will be paid the on-going rate for part-time work. Eight contact hours.

HFT 2942 Internship (O) 3 cr.
Prerequisite: HFT 2941. This course is an extension of HFT 2941. It consists of on-the-job work experience supplied by the hotel, motel, and restaurant industries. Job placement will be dependent upon the student's preference and availability of participating hospitality institutions. The course consists of 15 hours per week of on-the-job instruction accompanied by one seminar each week. Students employed in the industry will be paid the on-going rate for part-time work. Eight contact hours.

HIS 1907 Honors Survey of History (P) 3 cr.
Prerequisites: Outstanding performance in AMH 2010, 2020, EUH 1000, 1001. Recommendation by the Department. An independent study in one or more selected fields of history which incorporates extensive research and in-depth readings. Designed to develop interest and skill in the preparation of historical analysis and presentation in anticipation of further studies at the senior college level in history or related fields. Three contact hours.

HME 1200 Home Management (D) 3 cr.
The student is introduced to problems in Home Management, including values and goals in the management process; the efficient use of time, money, and human resources; and earning and spending the family income. The student is given a decision-making orientation in order to sharpen problem solving skills in managing home and physical resources. Three contact hours.

HSC 1000 Introduction to the Health Professions (O) 1 cr.
An introduction to the Allied Health Professions. The course will provide the student with an overview of the Health Professions emphasizing differences and similarities in specialized health fields. It is intended that the course will afford the student more flexibility in selecting a health specialty as a chosen career. One contact hour.

HSC 1002 Integrated Health Science (O) 3 cr.
No pre- or corequisites. A course to provide basic manipulative and theoretical background skills that are necessary to successfully complete the required Science and Health courses within the Occupational Health Program. Five contact hours.

(Hours designated HUM need not be taken in any numerical order.)

HUM 2211 Western Humanities I (P) 3 cr.
Western culture and its creative expressions from its origins in prehistoric times through the middle ages as surveyed through the media of visual arts, music, literature, philosophy and social history. Three contact hours.

HUM 2231 Western Humanities II (P) 3 cr.
Western culture and its creative expressions from the Medieval Renaissance through the Napoleonic Era as surveyed through the media of visual arts, music, literature, philosophy and social history. Three contact hours.

HUM 2250 Western Humanities III (P) 3 cr.
Western culture and its creative expressions from the nineteenth-century Romantic Movement through the twentieth century as surveyed through the media of visual arts, music, literature, philosophy and social history. Three contact hours.

HUM 2410 Asian Humanities (P) 3 cr.
Asian cultures and their creative expressions as surveyed through the media of visual arts, music, literature, and philosophic thought. Three contact hours.

HUM 2450 American Humanities (P) 3 cr.
Life and creative expressions in the Americas as surveyed through the media of visual arts, music, literature, philosophy and social history. Three contact hours.

HUM 2460 Latin American Humanities (P) 3 cr.
Life in the Latin American countries surveyed from its beginning to the present. Creative expressions in the visual arts, music, literature and philosophic thought will be studied in the context of archaeology, anthropology, sociology, history, geography and religion. Three contact hours.

HUM 2477 Mediterranean Humanities (P) 3 cr.
Life and creative expressions in the Mediterranean regions of Asia, Africa and Europe as surveyed through the media of visual arts, music, literature, philosophy, and social history. Three contact hours.

HUM 2478 Northern European Humanities (P) 3 cr.
Life and creative expressions in the non-Mediterranean regions of Europe as surveyed through the media of visual arts, music, literature, philosophy, and social history. Three contact hours.

HUM 2710 Fine Arts Field Trip (P) 1 cr.
This course involves a cultural enrichment tour of New York City or other locales, and is designed as a supplement for students currently enrolled in one of the more Fine Arts courses. The trip will include visits to art galleries, museums, and musical and dramatic productions. A paper based on a cultural aspect, of aspects, of the trip is required. Such paper will be due one month from the return date of the trip. Orientation material will be presented to the students well in advance of the trip, and topics for a paper will be discussed and arranged before leaving. One contact hour.

HUM 1001 Principles of Nutrition (D) 3 cr.
The student will acquire the basic principles of nutrition and develop skill in applying the recommended dietary allowances to all age groups. Emphasis is placed on key food nutrients, consumer information regarding food economy, quality food purchasing and maximum nutrition for the life cycle. Three contact hours.

HUM 1415 Child Nutrition (O) 3 cr.
A study of the nutritional needs of infants and children and the effects of food nutrients on growth and development up to age 18. Includes dietary modifications for childhood diseases. HUM 1001 is prerequisite. Three contact hours.

HUM 2511 Advanced Nutrition (O) 3 cr.
An advanced nutrition course designed to give updated scientific nutrition information and products, programs, and services affecting its application in the community. A basic nutrition course is prerequisite. Three contact hours.

IDS 1935 Interdisciplinary Studies Seminar (P) 3 cr.
The IDS seminar provides a structured opportunity for students and professors to participate in special programs, to work together in the development of IDS projects, and to interact in an interdisciplinary environment. May be repeated. Two contact hours.

IND 1010 Housing and Interior Design (O) 3 cr.
This course includes a study of selection of housing and furnishings, housing values, needs, renting, buying a home, and characteristics of and plans for desirable housing. It emphasizes selection and arrangement of furnishings through the use of color, principles and elements of design. Three contact hours.

INR 2002 International Relations (P) 3 cr.
A study of the nature of the international political system with emphasis on the concepts of national interest and power with respect to the relations of nation-states; examination of the function and role of international organizations. Three contact hours.
ISC 1000 Unified Science (P) 3 cr.
This course is designed to allow students to study selected topics relating to processes of science, concepts of science, natural phenomena, and/or current problem areas. Selected topics will be selected on the basis of their relationship and significance to the various science disciplines. This course is not designed essentially as an introductory or preparatory course for any specific physical science. Three contact hours.

JOU 1001 Introduction to Journalism (P) 3 cr.
Prerequisite: Ability to use typewriter. An introduction to Journalism and Mass Communications. This course will include the history and development of journalism with emphasis on newspaper, radio, television and magazines. Effective personal communications will also be taught as the basis of effective mass communications. Five contact hours.

LAH 2000 History of the Americas (P) 3 cr.
A study of the nations of the Western Hemisphere, including Canada, from colonial times to the present with emphasis on Latin America. Three contact hours.

LEA 1001 Introduction to Legal Technology (O) 3 cr.
This course provides overview of training and purpose of legal assistants. It will explain roles of lawyers and legal assistants along with ethical and professional standards applicable to each. The structure of federal and related court systems, the State of Florida court system, and various substantive fields of law will be covered. Three contact hours.

LEA 1013 Legal Writing and Research I (O) 3 cr.
Prerequisite: LEA 1001, or consent of director. This course is designed to introduce the student to legal bibliography and basic legal research methods. Practice research problems will be a large part of this course. Students will also learn how to write legal memora- nda and briefs for both trial and appellate work. Three contact hours.

LEA 1014 Legal Writing and Research II (O) 3 cr.
Prerequisite: LEA 1013. This course is a continuation of LEA 1013. The course will continue into intermediate and advanced legal research with increased emphasis on the writing of legal memo- randa and briefs. Three contact hours.

LEA 1101 Litigation (O) 3 cr.
Prerequisite: LEA 1001, or permission of professor. This course focuses on the litigation process as it relates to the Florida court system. Attention is given to duties of law, the role of the attorney, basic substantive law, pleadings, discovery, trial, settlement, and appeal. The role of the legal assistant including client interviews, investigation, and compiling facts, drafting of pleadings, assembling of briefs, etc., will be studied. Three contact hours.

LEA 1151 Torts (O) 3 cr.
A study of the basic law relating to civil wrong as applied to personal and property damage. Topics studied include intentional torts, negligence, strict liability, products liability, nuisance, liability of owners and occupiers of land, fraud, defamation, invasion of privacy, intentional interference with contractual relations, abuse of process, torts in the family, civil conspiracy and immunities. Three contact hours.

LEA 1201 Real Property Law (O) 3 cr.
Prerequisite: LEA 1001, or consent of professor. This course will involve the study of the law of real property and an in-depth survey of the more common types of real estate transactions and conveyances, such as deeds, contracts, leases, deeds of trust, etc.; drafting problems involving these various instruments; special research projects related to the subject matter, and a study of the system of recording and search of public documents. Three contact hours.

LEA 1211 Wills, Trusts, and Probate (O) 3 cr.
Prerequisite: LEA 1001, or permission of professor. An overview of the law of wills, descent and distribution, probate administration and trusts together with practical application in the preparation of wills, trusts and the various pleadings used in the State of Florida. Three contact hours.

LEA 1311 Corporate Law (O) 3 cr.
Prerequisite: LEA 1001, or permission of the professor. A study of the formation and operation of corporations, partnerships, limited partnerships, business trusts and other business vehicles, including a survey of the fundamental principles of law applicable to each, and specialized research projects related to the subject matter. Three contact hours.

LEA 1401 Law Office Management (O) 3 cr.
This course will instruct the legal assistant in the fundamentals of law office organization, bookkeeping and accounting. Attention will be given to fees and billings, scheduling, personnel management, file preparation and organized procedures for specialized areas of the law. Three contact hours.

LEA 1501 Laws of Domestic Relations (O) 3 cr.
Prerequisite: LEA 1001, or permission of professor. This course involves the study of such topics as divorce, separations, custody, legitimacy, adoption, name change, guardianship, support, court procedures, separation agreements, etc. Three contact hours.

LEA 1601 Criminal Law (O) 3 cr.
Prerequisite: LEA 1001, or permission of professor. This course covers the theory, history and purpose of criminal law, the role of the U.S. Supreme Court and the Constitution in law enforcement. The law and procedure from incident through arrest. The course also covers the structure, definitions and most frequently used sections of the Florida Statutes dealing with crimes against persons and property. Three contact hours.

LEA 1721 State and Federal Tax Law (O) 3 cr.
Prerequisite: LEA 1001, or permission of the professor. This course will give students a basic fundamental knowledge of income taxation and will demonstrate how these fundamentals apply to individuals, decedents, estates, trusts, partnerships and corporations. The student will also learn to assist the attorney with income tax returns, tax procedures, tax planning and resolution of tax controversies. Three contact hours.

LEI 1200 Introduction to Recreational Activities (P) 1 cr.
A course designed to acquaint the student with the variety of recreational activities available in the community. Guest expert lectures in activities such as scuba and skin diving, surfing, equitation, hunting, judo, archery, water skiing, and ice-skating will discuss the fundamental skills and techniques associated with enjoyable participation. Two contact hours.

LEI 2330C Camp Counseling (P) 3 cr.
A course designed to develop leadership qualities for working with young people in a recreational situation and also to provide knowledge and skill necessary for living in, enjoying, and preserving the outdoors. Three contact hours and two overnight camping trips. The American Camping Association Advanced Campcraft certification is earned upon successful completion of the course.

LIS 2001 Use of Books and Libraries (P) 1 cr.
Organization of the FJC Learning Resources. Introduction to the library's classification system, how to use the card catalog, periodical indexes and other basic indexes. Suggestions for notetaking. Emphasis will be placed upon developing an analytical and systematic approach to the use of reference sources. This course will be helpful to all students who wish to make better use of library facilities at FJC, universities and public libraries. Three contact hours.

LIT 2021 Introduction to Literature (P) 3 cr.
Prerequisite: ENC 1136. Emphasis on reading selections for understanding and appreciation. Consideration is given to the major literary forms and their distinctive characteristics and conventions, principal literary themes, and different critical approaches. Designed both for increasing personal satisfaction in literature and as preparation for further literary study. Three contact hours.
LIT 2211 Great Ideas in World Literature I (P) 3 cr.
Prerequisite: ENC 1136. A critical study of selections of ancient, medieval, and early Renaissance literature. Three contact hours.

LIT 2221 Great Ideas in World Literature II (P) 3 cr.
Prerequisite: ENC 1136. A critical study of selections of literature from the middle Renaissance period through the twelfth century.
Three contact hours.

LIT 2310 The Bible as Literature (P) 3 cr.
A study of the development of the Bible in both its natural and its supernatural aspects, its influence upon literature and humanity, emphasis on the Bible's role in the modern world. Three contact hours.

LIT 2332 Afro-American Literature (P) 3 cr.
A survey course that treats the major periods of Afro-American literature from its beginnings in Africa to the present. Attention will be given to the African background. Concentration centers on the writers' views of themselves and the political, economic, and social forces that operate upon them. Thematically, the course considers the cyclic patterns of assimilation, self-awareness, and the desire for self determination in the literature. Three contact hours.

MAC 1104 College Algebra (P) 3 cr.
Prerequisite: MAT 1033 with a grade of C or better; or two years of high school algebra. Techniques of algebra are studied with the emphasis on exact vocabulary. An analysis of the real number system is introduced to increase the depth of understanding algebra. Topics include linear and quadratic functions; systems of equations, inequalities, logarithms, and induction. This course is intended for students who need more preparation for trigonometry and the calculus. If a student takes MAC 1104 and MAC 1132, only the credits earned in MAC 1132 will be applied toward an Associate in Arts degree. Three contact hours.

MAC 1114 College Trigonometry (P) 3 cr.
Prerequisite: MAC 1104, with a grade of C or better. This course treats trigonometric functions as functions of real numbers with trigonometric functions of angles and vectors. It includes identities, inverse circular functions, solution of trigonometric equations, complex numbers, and solutions of triangles. If a student takes MAC 1114 and MAC 1132, only the credits earned in MAC 1132 will be applied toward an Associate in Arts degree. Three contact hours.

MAC 1132 College Algebra and Trigonometry (P) 4 cr.
Prerequisite: MAT 1033, with a grade of C or better. (High school trigonometry recommended.) This is an accelerated course for the well-prepared student. The course content is consistent with that of MAC 1104, College Algebra, and MAC 1114, College Trigonometry. The concept of functions is the basis for the integration of the two, with the trigonometric functions developed as functions of real variables. If a student takes either MAC 1104 and MAC 1132 or MAC 1114 and MAC 1132, only the credits earned in MAC 1132 will be applied toward an Associate in Arts degree. Four contact hours.

MAC 1311 Calculus with Analytic Geometry I (P) 4 cr.
Prerequisite: MAC 1114 or MAC 1132 or two years of high school algebra, one year of plane geometry, one-half year trigonometry. A course designed for the major in mathematics, science or engineering, having a good foundation in algebra and trigonometry but no analytic geometry. This is an integrated differential and integral calculus course with analytic geometry and places emphasis upon the theoretical approach to mathematical analysis. Covered in the course are the following topics: differential calculus, integration of algebraic expressions with applications of the derivative, and integration of transcendental functions, plane analytic geometry topics, methods of integration and the algebraic calculus of vectors in the plane. Four contact hours.

MAC 2312 Calculus with Analytic Geometry II (P) 4 cr.
Prerequisite: MAC 1311. A continuation of the calculus-analytic geometry sequence. The course includes differentiation and integration of transcendental functions, plane analytic geometry topics, methods of integration and the algebraic calculus of vectors in the plane. Four contact hours.

MAC 2313 Calculus with Analytic Geometry III (P) 4 cr.
Prerequisite: MAC 2312. A continuation of the calculus-analytic geometry sequences. Topics include infinite series, improper integrals, polar coordinates, infinite series, solid geometry and its vectors, partial differentiation, and multiple integrals. Four contact hours.

MAE 2810 Modern Mathematics for Teachers (P) 3 cr.
An in-service course designed to acquaint teachers with modern topics in mathematics. No prior knowledge of mathematics will be assumed and many topics of modern mathematics concepts will be presented, including set theory, structures of systems of numeration, properties of numbers, operations in bases other than ten, geometry and introduction to probability. Three contact hours.

MAF 2200 Marriage and Family (P) 3 cr.
A study of marriage selection, courtship, marriage and child rearing, with special attention to the contemporary American family. Three contact hours.

MAN 1392 Postal Management-Customer Service I (O) 3 cr.
This course deals with the movement of the various types of mail through the delivery service systems. Also topics to be covered are forecasting future needs, operational control, and analysis of unit operations. Three contact hours.

MAN 1394 Postal Management-Finance I (O) 3 cr.
An introductory course covering postal accounting, auditing, mail classification, revenue, cost analyses and their interrelationships within the Postal Service. Three contact hours.

MAN 2000 Principles of Management (O) 3 cr.
A detailed analysis of the management functions of planning, organizing, staffing, directing and controlling as related to business enterprise. The orderly presentation of fundamental knowledge in management provides the student with the framework for further study in the field or the background for practical application of management principles in business and industry. Three contact hours.

MAN 2050 Transportation Management and Theory (D) 3 cr.
This course is primarily designed for students advancing to the management stage in the transportation field. It covers financial management, business law, management's relation to government, marketing management, management theory and philosophy, and broad management perspective. Three contact hours.

MAN 2300 Personnel Management (D) 3 cr.
Problems, practices and policies in the management of people; leadership, motivation and direction of employees toward management-employee-oriented goals. Employment practices. Three contact hours.

MAN 2393 Postal Management-Customer Service II (O) 3 cr.
Prerequisite: MAN 1392. This course is a continuation of MAN 1392. Delivery systems will be investigated in greater depth through a study of analysis and adjustments of combination services routes, collection routes, inspections and the responsibilities of carriers. Three contact hours.

MAN 2394 Postal Management-Finance II (O) 3 cr.
Prerequisite: MAN 2398. A continuation of MAN 1394. Among the topics covered are the Origin Destination Information System (ODIS), Revenue Pieces and Weight (RPW) and a further study of all phases of accounting principles as they apply to the Postal Service. Three contact hours.

MAN 2395 Postal Management-Mail Processing I (O) 3 cr.
An introduction to the various systems used in processing the U.S. mail. Topics studied include logistics, mail processing and flow, schemes, bulk mail, mail preparation and plant maintenance. Three contact hours.
MAN 2396 Postal Management-Mail Processing II (O) 3 cr.
Prerequisites: MAN 2395. A continuation of MAN 2395. The course further investigates systems approaches used by the Postal Service. Also included will be such topics as modifications, engineering and quality control, edit testing, budgets, and future trends in mail processing. Three contact hours.

MAN 2397 Postal Management-Employee Relations (Personnel) (O) 3 cr.
A study of personnel management as it applies to people at work in the United States Postal Service. The course deals with hiring procedures, salary structures, job descriptions, promotional policies, employee benefits, employee safety and health, unemployment compensation and retirement. Three contact hours.

MAN 2398 Postal Services Management-Labor Relations (O) 3 cr.
This course is an introduction to labor relations as they apply to the Postal Service. The course is descriptive of the roles and processes of both management and craft employees as they interpret policies and regulations. The course will also take up effective human relations in postal employment. Three contact hours.

MAP 2302 Differential Equations (P) 3 cr.
Prerequisites: MAC 2312. A study of the procedure and the theory of various methods of solving ordinary differential equations, which includes a development of Laplace Transforms and applications. Three contact hours.

MAR 1011 Principles of Marketing (D) 3 cr.
Prerequisite: GEB 1011. The study of matching products of markets. Discussion of basic marketing functions. Emphasis will be placed on those interacting determinates of demand which make up the marketing environment — the economic, psychological, sociological, and political factors. The legal restraints that make up the forces beyond management control, but are needed in the marketing decision-making process, are introduced. Three contact hours.

MAR 1101 Salesmanship (D) 3 cr.
An introduction to the art of effective salesmanship. An analysis of types and problems of psychology of sales situations. Buying motives, customer approach, and sales techniques are studied. Three contact hours.

MAR 1151 Retail Merchandising (O) 4 cr.
The functions of the merchandising department, inventory control systems, stock turnover, the buying function, and sales promotions are covered. Also covered are appliances, furniture, household accessories, and other display techniques. Three contact hours.

MAR 1301 Sales Promotion (O) 4 cr.
Designed for all types of sales personnel, covers basic methods and techniques used in sales promotion program developments, research advertising, merchandising, display, direct mail advertising, development of effective sales talks, and demonstrations. Three contact hours.

MAR 2012 Marketing Practices (O) 3 cr.
Prerequisite: MAR 1011. A continuation of MAR 1011. Emphasis is placed on the study of marketing problems of the manufacturers, wholesaler, retailer, and other marketing agencies. Three contact hours.

MAR 2131 Principles of Purchasing I (O) 3 cr.
A comprehensive course in modern procurement practices and policies used by purchasing agents. Analysis of the fundamental purchasing principles with analytical descriptions of the latest developments and techniques. Three contact hours.

MAR 2132 Principles of Purchasing II (O) 3 cr.
A continuation of MAR 2131 with emphasis on quality assurance, price analysis, planning and forecasting, and buying capital equipment. Three contact hours.

MAR 2220 Wholesaling (O) 3 cr.
Survey of the wholesaling structure, past and present. Analysis of the planning, operation, and management of the various types of wholesaling institutions in our economy. Three contact hours.
MIS 2630C Application of Military Skills (P) 1 cr.
Available to full-time students only. In-depth study of two major topics: land navigation and methods of instruction. The land navigation covers study and application of basic map principles; terrain appreciation, grid reference systems, orientation by intersection and resection; and use of terrestrial compass. Methods of instruction provide guidance on proper teaching procedures, use of instructional resources, and requires student presentation on selected basic military subjects. One contact hour.

MKA 1303 Retail Practicum (O) 4 cr.
Occupational experiences are provided with cooperating businesses. Twenty contact hours per week.

MKA 1313 Retail Practicum (O) 4 cr.
A continuation of MKA 1303. Twenty contact hours per week.

MKA 1402 Fashion Merchandising I (O) 3 cr.
An introduction to the clothing and textiles industry which includes the exploration of career opportunities, consumer behaviors, the historical development of fashion, the environmental influences on fashion demand, and the marketing of fashion. Three contact hours.

MKA 1403 Fashion Merchandising II (O) 3 cr.
Prerequisite: MKA 1402. An in-depth study of retail operation which includes an analysis of store organization, buying functions and techniques, and sales promotion as related to the clothing and textiles industry. Three contact hours.

MKA 2323 Retail Practicum (O) 4 cr.
A continuation of MKA 2323. Twenty contact hours.

MKA 2333 Retail Practicum (O) 4 cr.
A continuation of MKA 1313. Twenty contact hours.

MKA 2364 Fashion Merchandising Practicum/Seminar I (O) 4 cr.
Corequisite: MKA 1402. A minimum of 20 hours per week of practical work experience approved by the student's advisor. The students will acquire knowledge of the merchandise with which they are working and an understanding of on-the-job problem solving as related to selling. A seminar designed to assist the students with developing merchandising skills, selling techniques, and methods of problem solving as related to work experiences will meet one hour per week on campus. Twenty-one contact hours.

MKA 2366 Fashion Merchandising Practicum/Seminar II (O) 4 cr.
Prerequisites: MKA 1402, MKA 2364. Corequisite: MKA 1403. A minimum of 20 hours per week of practical work experience approved by the student's advisor. Students will make practical applications of knowledge in solving on-the-job problems as related to selling and analyze their store's organization and operation. A seminar designed to assist students in exploring store organization, operation, and planning, and additional problem solving related to work experiences will meet one hour per week on campus. Twenty-one contact hours.

MKA 2367 Fashion Merchandising Practicum/Seminar III (O) 4 cr.
Prerequisites: MKA 1402, MKA 1403, MKA 2364, 2366. A minimum of 20 hours per week of practical work experience approved by the student's advisor. The student will demonstrate the ability to handle advanced selling techniques and evaluate job responsibilities for retail supervision. A seminar designed to assist students in exploring supervisory problem solving techniques and analyzing managerial responsibilities related to work experiences will meet for one hour per week on campus. Twenty-one contact hours.

MLS 1010C Hematology (O) 6 cr.
Given instruction in the theories and techniques of hematology, the student will develop accuracy and precision in hematologic technique. The learner will identify and count the formed elements of the blood, assay blood for coagulation factors, state normal values for hematologic techniques, classify and categorize blood diseases, and recognize and recall the application of hematologic procedures to clinical diagnoses. Eight contact hours.
MLS 1022C Introduction to Health Technology (D) 3 cr.
The course is designed to enable the student to master basic mathematical concepts, medical laboratory ethics, and basic medical laboratory techniques. Given instruction in integrated health sciences and their application to medical science, the student will practice the manipulative skills of medical laboratory technology. Four contact hours.

MLS 1400C Medical Microbiology (D) 6 cr.
Given instruction in the theories, taxonomy and techniques of medical bacteriology, parasitology and mycology, the learner will perform step-by-step microbiological techniques precisely and accurately. The student will isolate and identify microorganisms from clinical specimens, classify the organisms associated with disease in man, perform sensitivity tests and correlate this information for its application to clinical diagnoses. Eight contact hours.

MLS 2530 Serology and Blood Banking (D) 6 cr.
Prerequisite: MLS 1010C. Presented basic principles, theories and related serologic methods, the student will perform techniques precisely and accurately, will state the principles and normal values of each and relate test results to clinical diagnoses. Presented the concepts of immunohematology, the student will practice the technical methods and procedures of blood banking and recognize their application to patient care and blood transfusion. Eight contact hours.

MLS 2600C Principles of Clinical Instrumentation (D) 5 cr.
Corequisite: MLS 2602L. Given instruction in the principles of analytic methodology and the principles of clinical instrumentation, the learner will apply this information to the procedures of medical laboratory technology in the clinical phase of the student’s education. Five contact hours.

MLS 2610C Clinical Chemistry (D) 6 cr.
Presented the basic concepts and techniques of clinical chemistry, the student will develop the technical competencies required to analyze body fluids accurately and precisely. The learner will relate the results of chemical measurements to the assessment of the body’s metabolic state. Eight contact hours.

MLS 2802L Clinical Practicum I (D) 9 cr.
Corequisite: MLS 2600C. Having been assigned to a clinical laboratory for directed experience, the learner will develop accuracy and precision in performing medical laboratory techniques. The Program Director coordinates the student’s clinical experiences, including supervision, scheduling and evaluation. Thirty-five contact hours.

MLS 2803 Clinical Diagnosis (D) 5 cr.
Prerequisites: MLS 2600C and MLS 2802L. Corequisite: MLS 2804. Presented the clinical aspects of disease and the normal values of the constituents of body fluids, the learner will recognize abnormal values as these relate to disease and will judge the reliability of test results by applying quality control techniques. Five contact hours.

MLS 2804 Clinical Practicum II (D) 12 cr.
Prerequisites: MLS 2600C and MLS 2802L. Corequisite: MLS 2803. Continuing in a clinical laboratory for directed experience, the learner will develop accuracy and precision in performing medical laboratory techniques. The Program Director coordinates the student’s clinical experiences, including supervision, scheduling and evaluation. Thirty-five contact hours.

MMC 2100 Writing for Mass Communications (P) 3 cr.
Prerequisite: ENC 1103. A communications course designed to provide fundamental instruction and practice in developing basic written and oral communications skills with emphasis on straight news reporting, interpretive news reporting, editorial writing, feature writing and developing copy for radio and television. Three contact hours.

MTB 0013 Introduction to Technical Math (O) 3 cr.
A review of high school mathematics for students who lack the background necessary for enrollment in MBT 1321. The course includes review of number theory, fractions, decimals, ratio and proportion, percentages, areas, volumes and basic algebra as applied to engineering calculations. Three contact hours.

MTB 1303 Engineering Calculations (O) 1 cr.
Slide rule basic operations, multiplication, division, finding squares, cubes, square roots, cube roots, reciprocals, and common logarithms. Some trigonometric operations. One contact hour.

MTB 1321 Technical Math I (D) 3 cr.
Prerequisite: Two years of high school algebra or MTB 0013. Applied mathematics involving the principles and laws of basic algebra, solution of linear equations, and basic analytical geometry. In each presentation, the work is supplemented with solutions to problems of technical nature. Three contact hours.

MTB 1322 Technical Math II (D) 3 cr.
Prerequisite: MTB 1321 or MAT 1024. A continuation of MTB 1321, which covers the laws and principles of trigonometry, vector analysis, complex numbers and geometric consideriation of trig functions. Practical work in solution of engineering problems is emphasized. Three contact hours.

MTB 2323 Technical Math III (D) 3 cr.
Prerequisite: MTB 1322 or MAC 1114. A course designed to give the student an introduction into elementary differential and integral calculus with emphasis on their application to engineering problems. Analytical geometry will be introduced where needed to clarify the calculus. Three contact hours.
MUC 1301  Introduction to Electronic Music (P)  2 cr.
Prerequisite. Approval of professor. A beginning course in the history and practice of electronic music including laboratory work with tape recorders and synthesizers. Three contact hours.

MUE 1440  String Techniques (P)  1 cr.
Teaches basic performance skills on violin, viola, violin-cello, or double bass. Open to music majors. Two laboratory hours.

MUE 1450  Woodwind Techniques (P)  1 cr.
Teaches basic performance skills on clarinet or flute. Open to music majors. Two laboratory hours.

MUE 1460  Brass Techniques (P)  1 cr.
Teaches basic performance skills on trumpet or trombone. Open to music majors. Two laboratory hours.

MUE 1470  Percussion Techniques (P)  1 cr.
Teaches basic performance skills on percussion instruments with emphasis on rudimental snare drumming. Open to music majors. Two laboratory hours.

MUG 1201  Basic Conducting (Choral) (P)  2 cr.
Prerequisite: MUT 1121 and/or consent of professor. Provides the student with an introduction to basic techniques used in directing choral rehearsals and performances. Three contact hours.

MUH 2211  Survey of Music History (P)  3 cr.
A study of the development of music from the early Medieval period to the present day with an emphasis upon the stylistic trends of each period. This course is recommended for music majors only. Three contact hours.

MUL 1011  Music Appreciation (P)  3 cr.
A course designed for students with little or no musical training. Combines a limited amount of training in music terminology with extensive listening. Three contact hours.

MUN 1130  Symphonic Band (P)  1 cr.
Open to all students of the College with permission of the professor. All students who have had previous band experience are urged to participate. Traditional and contemporary band literature are included in the repertoire. Required of all woodwind, brass, and percussion majors. May be elected for credit each semester. Six rehearsal periods.
MUN 1280  Community Orchestra (P)  1 cr.
The Community Orchestra provides instrumentalists in the College and community an opportunity to perform works representative of a broad spectrum of orchestral literature, to refine techniques of ensemble playing, and present concerts each term. Membership by permission of the director and/or audition; participation by string majors is required. May also be taken as a non-college credit Adult Education course. Two-hour rehearsal period.

MUNA 1310  College Chorus (P)  1 cr.
Choral organization open to all college students. Many styles of choral music are included in the repertoires. Can be elected for credit each semester. Three rehearsal periods.

MUNB 1310  College Chorale (P)  1 cr.
Prerequisite: Permission of director. Before entering course: Previous choral experience and/or audition with professor.
The repertoire of the College Chorale includes the more difficult sacred and secular compositions accompanied and unaccompanied. May be elected for credit each semester. Five rehearsal periods.

MUN 1380  Community Chorus, Jacksonville 1 cr.
Evening chorale organization open by audition to members of the community. Repertoire includes secular and sacred major works for chorus and orchestra, as well as shorter compositions. May be elected each semester for credit; or non-college credit under Adult Education. Two-hour rehearsal period.

MUN 1410  String Ensemble (P)  1 cr.
Prerequisite: Permission of the professor. All students who have experience as players of bowed string instruments are urged to audition. The standard literature for string ensembles will be performed both independently and in conjunction with other music performing organizations. Can be elected for credit each semester. Three rehearsal periods.

MUN 1710  Jazz-Rock Ensemble (P)  1 cr.
Prerequisite: Permission of the director. The repertoire includes various styles from jazz and popular literature. May be selected for credit each semester. Three rehearsal periods.

MUO 1001  Music Theatre Workshop (P)  1 cr.
Open by audition to persons interested in theatre and music in the areas of performance and technical operation. May be selected for credit each semester. One major production each term. Three rehearsal hours.

MUS 1000  Student Recital (P)  1 cr.
Required for all music majors. In conjunction with the one class meeting each week, the student is also required to attend an announced number of FJC related concerts. Each music major enrolled for two hours of applied music is required to perform in student recital at least once during the academic year. Meeting hour may be charged to coincide with special performance time. One contact hour.

MUT 1001  Introduction to Music Theory (P)  3 cr.
A course designed for students whose background and Theory Placement Test scores indicate further preparation is needed for MUT 1121. Includes work with elementary music terminology, notation, intervals, scales, chords, rhythm, sight singing, dictation, and keyboard skills. Three contact hours.

MUT 1121  Music Theory I (P)  4 cr.
An elementary course in music theory and the principles underlying all music. A basic course including music terminology, notation, harmony, melody, and rhythm. Sight singing and ear training are included. Five contact hours: three class hours; two laboratory hours.

MUT 1122  Music Theory II (P)  4 cr.
Prerequisite: MUT 1121. A continuation of MUT 1121. A basic course including music terminology, notation, harmony, melody, rhythm, and form. Sight singing and ear training are included. Five contact hours: three class hours; two laboratory hours.

MUT 2126  Music Theory III (P)  4 cr.
Prerequisite: MUT 1122. Techniques of analysis and part writing in vocal, keyboard and instrumental styles. Advanced tertian harmony, modulation, sequence, and phrase, and part forms. Sight singing and ear training included. Five contact hours: three class hours; two laboratory hours.

MUT 2127  Music Theory IV (P)  4 cr.
Prerequisite: MUT 2126. Altered and chromatic chords, extension of tonality, 20th century harmonic, melodic, and rhythmic styles. Advanced sight singing and ear training included. Five contact hours: three class hours; two laboratory hours.

MUT 2231  Keyboard Harmony (P)  1 cr.
Prerequisite: MUT 2127. Development of skills at the piano. Emphasis upon harmonization of melodies, modulation, transposition, and improvisation. Required of all music majors. Two laboratory hours.

MUT 2232  Keyboard Harmony (P)  1 cr.
Prerequisite: MUT 2231. A continuation of MUT 2231. Two laboratory hours.

MVKA 1111  Class Piano I (P)  1 cr.
For beginning piano students meeting in groups. Emphasis placed on music reading and elementary techniques. Required of all music majors unless exempted. Two contact hours (laboratory).

MVKB 1111  Class Piano II (P)  1 cr.
Prerequisite: MVKA 1111. A continuation of MVKA 1111. Required of all music majors. Two laboratory hours.

MVKA 2121  Class Piano III (P)  1 cr.
Prerequisite: MVKB 1111. A continuation of MVKB 1111. Two contact hours (laboratory).

MVKB 2121  Class Piano IV (P)  1 cr.
Prerequisite: MVKA 2121. A continuation of MVKA 2121. Two contact hours (laboratory).

MVKA 2621  Basic Piano Pedagogy I (P)  2 cr.
A class designed to prepare students for private and class piano teaching at the levels of beginner, intermediate and advanced. Three contact hours.

MVKB 2621  Basic Piano Pedagogy II (P)  2 cr.
A class in which students will teach piano under supervision. Students will teach piano pupils who are in the beginning, intermediate and early advanced level. Three contact hours.
MVSA 1116 Class Guitar I (P) 1 cr.
A basic course designed for students who are interested in studying
Classic Guitar. Includes a study of the development of the instru-
ment, past and present guitar masters, and the music literature for
the guitar and technique. Two contact hours. (Laboratory).

MVSA 2126 Class Guitar IV (P) 1 cr.
Prerequisite: MVSA 2126. A continuation of MVSA 2126, per-
fecting and advancing skills learned therein. Two contact hours.
(Laboratory).

MVVA 1111 Class Voice I (P) 1 cr.
For singers wishing to further their vocal skills and instrumentalists
wishing a fundamental vocal knowledge. Emphasis on correct dic-
tion and tone production. Individual aid given. Two contact hours.
(laboratory).

MVVB 1111 Class Voice II (P) 1 cr.
Prerequisite: MVVA 1111. A continuation of MVVA 1111. Two
contact hours. (Laboratory).

MVVA 2121 Class Voice III (P) 1 cr.
Prerequisite: MVVA 2121. For singers wishing to develop vocal
skills beyond elementary level of correct diction and tone produc-
tion. Open also to instrumentalists wishing more than a basic vocal
knowledge and competency level. Meets as a class, although indi-
vidual attention is emphasized. Two contact hours.

MVVA 2121 Class Voice IV (P) 1 cr.
Prerequisite: MVVA 2121. A continuation of MVVA 2121. Two
contact hours.

APPLIED MUSIC COURSES

BARITONE

MVBA 1014 Applied Preparatory Baritone I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty.
Private lessons designed for music majors whose background in-
dicates a need for further preparation. One hour lesson a week.

MVBB 1014 Applied Preparatory Baritone II (P) 2 cr.
Prerequisite: MVBA 1014. Second semester of private lessons de-
digned for music majors whose background indicates a need for
further preparation. One hour lesson per week.

MVBA 1314 Applied Principal Baritone I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. First
semester of private lessons designed for the student majoring in
any area of music except performance. (e.g. music education, mu-
sic therapy etc.) Two half-hour lessons a week.

MVBB 1314 Applied Principal Baritone II (P) 2 cr.
Prerequisite: MVBA 1314. Second semester of private lessons de-
digned for the student majoring in any area of music except per-
formance. (e.g. music education, music therapy etc.) Two half-hour
lessons a week.

MVBA 2324 Applied Principal Baritone III (P) 2 cr.
Prerequisite: MVBB 1314. Third semester of private lessons de-
digned for the student majoring in any area of music except per-
formance. (e.g. music education, music therapy etc.) Two half-hour
lessons a week.

MVBB 2324 Applied Principal Baritone IV (P) 2 cr.
Prerequisite: MVBA 2324. Fourth semester of private lessons de-
digned for the student majoring in any area of music except per-
formance. (e.g. music education, music therapy etc.) Two half-hour
lessons a week.

MVBA 1214 Applied Secondary Baritone I (P) 1 cr.
Prerequisite: Placement by audition before the music faculty. First
semester of private lessons designed for music majors needing to gain
proficiency on an instrument other than their principal or major.
One half-hour lesson per week.

MVBB 1214 Applied Secondary Baritone II (P) 1 cr.
Prerequisite: MVBA 1214. Second semester of private lessons de-
digned for music majors needing to gain proficiency on an instru-
ment other than their principal or major. One half-hour lesson per
week.

MVBA 2224 Applied Secondary Baritone III (P) 1 cr.
Prerequisite: MVBB 1214. Third semester of private lessons de-
digned for music majors needing to gain proficiency on an instru-
ment other than their principal or major. One half-hour lesson per
week.

MVBB 2224 Applied Secondary Baritone IV (P) 1 cr.
Prerequisite: MVBA 2224. Fourth semester of private lessons de-
digned for the student majoring in any area of music except per-
formance. (e.g. music education, music therapy etc.) Two half-hour
lessons a week.

MVBA 1414 Applied Major Baritone I (P) 3 cr.
Prerequisite: Placement by audition before the entire full-time music
faculty. First semester of private lessons designed for the student
majoring in performance. Two half-hour lessons a week.

MVBB 1414 Applied Major Baritone II (P) 3 cr.
Prerequisite: MVBA 1414. Second semester of private lessons de-
digned for the student majoring in performance. Two half-hour
lessons a week.

MVBA 2424 Applied Major Baritone III (P) 3 cr.
Prerequisite: MVBB 1414. Third semester of private lessons de-
digned for the student majoring in performance. Two half-hour
lessons a week.

MVBB 2424 Applied Major Baritone IV (P) 3 cr.
Prerequisite: MVBA 2424. Fourth semester of private lessons de-
digned for the student majoring in performance. Two half-hour
lessons a week.

MVBA 1414 Applied Major Baritone II (P) 3 cr.
Prerequisite: MVBA 1414. Second semester of private lessons de-
digned for the student majoring in performance. Two half-hour
lessons a week.

MVBA 2424 Applied Major Baritone III (P) 3 cr.
Prerequisite: MVBB 1414. Third semester of private lessons de-
digned for the student majoring in performance. Two half-hour
lessons a week.

MVBB 2424 Applied Major Baritone IV (P) 3 cr.
Prerequisite: MVBA 2424. Fourth semester of private lessons de-
dsigned for the student majoring in performance. Two half-hour
lessons a week.
BASSOON

MVWA 1014 Applied Preparatory Bassoon I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.

MVWB 1014 Applied Preparatory Bassoon II (P) 2 cr.
Prerequisite: MVWA 1014. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVWA 1314 Applied Principal Bassoon I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVWB 1314 Applied Principal Bassoon II (P) 2 cr.
Prerequisite: MVWA 1314. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVWA 2324 Applied Principal Bassoon III (P) 2 cr.
Prerequisite: MVWB 1314. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVWB 2324 Applied Principal Bassoon IV (P) 2 cr.
Prerequisite: MVWA 2324. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVWA 1214 Applied Secondary Bassoon I (P) 1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVWB 1214 Applied Secondary Bassoon II (P) 1 cr.
Prerequisite: MVWA 1214. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVWA 2224 Applied Secondary Bassoon III (P) 1 cr.
Prerequisite: MVWB 2224. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVWB 2224 Applied Secondary Bassoon IV (P) 1 cr.
Prerequisite: MVWA 2224. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVWA 1414 Applied Major Bassoon I (P) 3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVWB 1414 Applied Major Bassoon II (P) 3 cr.
Prerequisite: MVWA 1414. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVWA 2424 Applied Major Bassoon III (P) 3 cr.
Prerequisite: MVWB 1414. Third semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVWB 2424 Applied Major Bassoon IV (P) 3 cr.
Prerequisite: MVWA 2424. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

CELLO

MVSA 1013 Applied Preparatory Cello I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.

MVSB 1013 Applied Preparatory Cello II (P) 2 cr.
Prerequisite: MVSA 1013. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVSA 1313 Applied Principal Cello I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVSB 1313 Applied Principal Cello II (P) 2 cr.
Prerequisite: MVSA 1313. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVSA 2323 Applied Principal Cello III (P) 2 cr.
Prerequisite: MVSB 1313. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVSB 2323 Applied Principal Cello IV (P) 2 cr.
Prerequisite: MVSA 2323. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVSA 1213 Applied Secondary Cello I (P) 1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVSB 1213 Applied Secondary Cello II (P) 1 cr.
Prerequisite: MVSA 1213. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVSA 2223 Applied Secondary Cello III (P) 1 cr.
Prerequisite: MVSB 1213. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVSB 2223 Applied Secondary Cello IV (P) 1 cr.
Prerequisite: MVSA 2223. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVSA 1413 Applied Major Cello I (P) 3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVSB 1413 Applied Major Cello II (P) 3 cr.
Prerequisite: MVSA 1413. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.
MVSA 2423 Applied Major Cello III (P) 3 cr.
Prerequisite: MVSB 1413. Third semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVSB 2423 Applied Major Cello IV (P) 3 cr.
Prerequisite: MVSA 2423. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

CLARINET

MVWA 1013 Applied Preparatory Clarinet I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVWB 1013 Applied Preparatory Clarinet II (P) 2 cr.
Prerequisite: MVWA 1013. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVWA 1313 Applied Principal Clarinet I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVWB 1313 Applied Principal Clarinet II (P) 2 cr.
Prerequisite: MVWA 1313. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVWA 2323 Applied Principal Clarinet III (P) 2 cr.
Prerequisite: MVWB 1313. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVWB 2323 Applied Principal Clarinet IV (P) 2 cr.
Prerequisite: MVWA 2323. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVWA 1213 Applied Secondary Clarinet I (P) 1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVWB 1213 Applied Secondary Clarinet II (P) 1 cr.
Prerequisite: MVWA 1213. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVWA 2223 Applied Secondary Clarinet III (P) 1 cr.
Prerequisite: MVWB 1213. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVWB 2223 Applied Secondary Clarinet IV (P) 1 cr.
Prerequisite: MVWA 2223. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVWA 1413 Applied Major Clarinet I (P) 3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVWB 1413 Applied Major Clarinet II (P) 3 cr.
Prerequisite: MVWA 1413. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVWA 2423 Applied Major Clarinet III (P) 3 cr.
Prerequisite: MVWB 1413. Third semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVWB 2423 Applied Major Clarinet IV (P) 3 cr.
Prerequisite: MVWA 2423. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

FLUTE

MVWA 1011 Applied Preparatory Flute I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVWB 1011 Applied Preparatory Flute II (P) 2 cr.
Prerequisite: MVWA 1011. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVWA 1311 Applied Principal Flute I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVWB 1311 Applied Principal Flute II (P) 2 cr.
Prerequisite: MVWA 1311. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVWA 2321 Applied Principal Flute III (P) 2 cr.
Prerequisite: MVWB 1311. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVWB 2321 Applied Principal Flute IV (P) 2 cr.
Prerequisite: MVWA 2321. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVWA 1211 Applied Secondary Flute I (P) 1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVWB 1211 Applied Secondary Flute II (P) 1 cr.
Prerequisite: MVWA 1211. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVWA 2221 Applied Secondary Flute III (P) 1 cr.
Prerequisite: MVWB 1211. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVWB 2221 Applied Secondary Flute IV (P) 1 cr.
Prerequisite: MVWA 2221. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.
MVWA 1411  Applied Major Flute I (P)  3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVWA 1411  Applied Major Flute II (P)  3 cr.
Prerequisite: MVWA 1411. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVWA 2421  Applied Major Flute III (P)  3 cr.
Prerequisite: MVWA 2421. Third semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVWA 2421  Applied Major Flute IV (P)  3 cr.
Prerequisite: MVWA 2421. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

**FRENCH HORN**

MVBA 1012  Applied Preparatory French Horn I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.

MVBB 1012  Applied Preparatory French Horn II (P)  2 cr.
Prerequisite: MVBA 1012. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVBA 1312  Applied Principal French Horn I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVBB 1312  Applied Principal French Horn II (P)  2 cr.
Prerequisite: MVBA 1312. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVBA 2322  Applied Principal French Horn III (P)  2 cr.
Prerequisite: MVBB 1312. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons per week.

MVBB 2322  Applied Principal French Horn IV (P)  2 cr.
Prerequisite: MVBA 2322. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVBA 1212  Applied Secondary French Horn I (P)  1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBB 1212  Applied Secondary French Horn II (P)  1 cr.
Prerequisite: MVBA 1212. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBA 2222  Applied Secondary French Horn III (P)  1 cr.
Prerequisite: MVBB 1212. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBB 2222  Applied Secondary French Horn IV (P)  1 cr.
Prerequisite: MVBA 2222. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVBA 1412  Applied Major French Horn I (P)  3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVBB 1412  Applied Major French Horn II (P)  3 cr.
Prerequisite: MVBA 1412. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVBA 2422  Applied Major French Horn III (P)  3 cr.
Prerequisite: MVBB 2422. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVBB 2422  Applied Major French Horn IV (P)  3 cr.
Prerequisite: MVBA 2422. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

**GUITAR**

MVSA 1016  Applied Preparatory Guitar I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.

MVSB 1016  Applied Preparatory Guitar II (P)  2 cr.
Prerequisite: MVSA 1016. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVSA 1316  Applied Principal Guitar I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVBA 1316  Applied Principal Guitar II (P)  2 cr.
Prerequisite: MVSA 1316. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons per week.

MVBA 2326  Applied Principal Guitar III (P)  2 cr.
Prerequisite: MVBB 1316. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons per week.

MVBB 2326  Applied Principal Guitar IV (P)  2 cr.
Prerequisite: MVBA 2326. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVSA 1216  Applied Secondary Guitar I (P)  1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.
MVS B 1216  Applied Secondary Guitar II (P)  1 cr.
Prerequisite: MVS A 1216. Second semester of private lessons
designed for music majors needing to gain proficiency on an instru-
ment other than their principal or major. One-half hour lesson per
week.

MVS A 2226  Applied Secondary Guitar III (P)  1 cr.
Prerequisite: MVS A 1216. Third semester of private lessons de-
signed for music majors needing to gain proficiency on an instru-
ment other than their principal or major. One-half hour lesson per
week.

MVS B 2226  Applied Secondary Guitar IV (P)  1 cr.
Prerequisite: MVS B 2226. Fourth semester of private lessons de-
signed for the student majoring in any area of music except per-
formance. (e.g. music education, music therapy etc.) Two half-hour
lessons a week.

MVS A 1416  Applied Major Guitar I (P)  3 cr.
Prerequisite: Placement by audition before the entire full-time music
faculty. First semester of private lessons designed for the student
majoring in performance. Two half-hour lessons a week.

MVS B 1416  Applied Major Guitar II (P)  3 cr.
Prerequisite: MVS A 1416. Second semester of private lessons de-
signed for the student majoring in performance. Two half-hour les-
sions a week.

MVS A 2426  Applied Major Guitar III  3 cr.
Prerequisite: MVS B 1416. Third semester of private lessons de-
signed for the student majoring in performance. Two half-hour les-
sions a week.

MVS B 2426  Applied Major Guitar IV (P)  3 cr.
Prerequisite: MVS A 2426. Fourth semester of private lessons de-
signed for the student majoring in performance. Two half-hour les-
sions a week.

OBOE

MVWA 1012  Applied Preparatory Oboe I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty.
Private lessons designed for music majors whose background in-
dicates a need for further preparation. One hour lesson a week.

MVWB 1012  Applied Preparatory Oboe II (P)  2 cr.
Prerequisite: MVWA 1012. Second semester of private lessons de-
signed for music majors whose background indicates a need for
further preparation. One hour lesson per week.

MVWA 1312  Applied Principal Oboe I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. First
semester of private lessons designed for the student majoring in
any area of music except performance. (e.g. music education, mu-
ic therapy etc.) Two half-hour lessons a week.

MVWB 1312  Applied Principal Oboe II (P)  2 cr.
Prerequisite: MVWA 1312. Second semester of private lessons de-
signed for the student majoring in any area of music except per-
formance. (e.g. music education, music therapy etc.) Two half-hour
lessons a week.

MVWA 2322  Applied Principal Oboe III (P)  2 cr.
Prerequisite: MVWB 1312. Third semester of private lessons de-
signed for the student majoring in any area of music except per-
formance. (e.g. music education, music therapy etc.) Two half-hour
lessons a week.

MVWB 2322  Applied Principal Oboe IV (P)  2 cr.
Prerequisite: MVWA 2322. Fourth semester of private lessons de-
signed for the student majoring in any area of music except per-
formance. (e.g. music education, music therapy etc.) Two half-hour
lessons a week.

MVWA 1212  Applied Secondary Oboe I (P)  1 cr.
Prerequisite: Placement by audition before the music faculty. First
semester of private lessons designed for music majors needing to
gain proficiency on an instrument other than their principal or major.
One half-hour lesson a week.

MVWB 1212  Applied Secondary Oboe II (P)  1 cr.
Prerequisite: MVWA 1212. Second semester of private lessons de-
signed for music majors needing to gain proficiency on an instru-
ment other than their principal or major. One half-hour lesson per
week.

MVWA 2222  Applied Secondary Oboe III (P)  1 cr.
Prerequisite: MVWB 1212. Third semester of private lessons de-
signed for music majors needing to gain proficiency on an instru-
ment other than their principal or major. One half-hour lesson a week.

MVWB 2222  Applied Secondary Oboe IV (P)  1 cr.
Prerequisite: MVWA 2222. Fourth semester of private lessons de-
signed for the student majoring in any area of music except per-
formance. (e.g. music education, music therapy etc.) Two half-hour
lessons a week.

MVWA 1412  Applied Major Oboe I (P)  3 cr.
Prerequisite: Placement by audition before the entire full-time music
faculty. First semester of private lessons designed for the student
majoring in performance. Two half-hour lessons a week.

MVWB 1412  Applied Major Oboe II (P)  3 cr.
Prerequisite: MVWA 1412. Second semester of private lessons de-
signed for the student majoring in performance. Two half-hour les-
sions a week.

MVWA 2422  Applied Major Oboe III (P)  3 cr.
Prerequisite: MVWB 1412. Third semester of private lessons de-
signed for the student majoring in performance. Two half-hour les-
sions a week.

MVWB 2422  Applied Major Oboe IV (P)  3 cr.
Prerequisite: MVWA 2422. Fourth semester of private lessons de-
signed for the student majoring in performance. Two half-hour les-
sions a week.

ORGAN

MVKA 1013  Applied Preparatory Organ I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty.
Private lessons designed for music majors whose background in-
dicates a need for further preparation. One hour lesson a week.

MVKB 1013  Applied Preparatory Organ II (P)  2 cr.
Prerequisite: MVKA 1013. Second semester of private lessons de-
signed for music majors whose background indicates a need for
further preparation. One hour lesson per week.

MVKA 1313  Applied Principal Organ I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. First
semester of private lessons designed for the student majoring in
any area of music except performance. (e.g. music education, mu-
ic therapy etc.) Two half-hour lessons a week.

MVKB 1313  Applied Principal Organ II (P)  2 cr.
Prerequisite: MVKA 1313. Second semester of private lessons de-
signed for the student majoring in any area of music except per-
formance. (e.g. music education, music therapy etc.) Two half-hour
lessons a week.

MVKA 2323  Applied Principal Organ III (P)  2 cr.
Prerequisite: MVKB 1313. Third semester of private lessons de-
signed for the student majoring in any area of music except per-
formance. (e.g. music education, music therapy etc.) Two half-hour
lessons a week.
MVKB 2323 Applied Principal Organ IV (P) 2 cr.
Prerequisite: MVKA 2323. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVKA 1213 Applied Secondary Organ I (P) 1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVKB 1213 Applied Secondary Organ II (P) 1 cr.
Prerequisite: MVKA 1213. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVKA 2223 Applied Secondary Organ III (P) 1 cr.
Prerequisite: MVKB 1213. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVKB 2223 Applied Secondary Organ IV (P) 1 cr.
Prerequisite: MVKA 2223. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVKA 1413 Applied Major Organ I (P) 3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVKB 1413 Applied Major Organ II (P) 3 cr.
Prerequisite: MVKA 1413. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVKA 2423 Applied Major Organ III (P) 3 cr.
Prerequisite: MVKB 1413. Third semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVKB 2423 Applied Major Organ IV (P) 3 cr.
Prerequisite: MVKA 2423. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVOA 2320 Applied Principal Other III (P) 2 cr.
Prerequisite: MVOB 1310. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons per week.

MVOB 2320 Applied Principal Other IV (P) 2 cr.
Prerequisite: MVOB 2320. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons per week.

MVKA 1210 Applied Secondary Other I (P) 1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVOB 1210 Applied Secondary Other II (P) 1 cr.
Prerequisite: MVOB 1210. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVOB 2220 Applied Secondary Other III (P) 1 cr.
Prerequisite: MVOB 1210. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVOB 2220 Applied Secondary Other IV (P) 1 cr.
Prerequisite: MVOB 2220. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVOA 1410 Applied Major Other I (P) 3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVOB 1410 Applied Major Other II (P) 3 cr.
Prerequisite: MVOA 1410. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVOA 2420 Applied Major Other III (P) 3 cr.
Prerequisite: MVOB 1410. Third semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVOB 2420 Applied Major Other IV (P) 3 cr.
Prerequisite: MVOA 2420. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

OTHER

MVOB 1010 Applied Preparatory Other I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.

MVKB 1010 Applied Preparatory Other II (P) 2 cr.
Prerequisite: MVOA 1010. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVOA 1310 Applied Principal Other I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVOB 1310 Applied Principal Other II (P) 2 cr.
Prerequisite: MVOA 1310. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

PERCUSSION

MVPA 1011 Applied Preparatory Percussion I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.

MVPB 1011 Applied Preparatory Percussion II (P) 2 cr.
Prerequisite: MVPA 1011. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVPA 1311 Applied Principal Percussion I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.
MVPB 1311 Applied Principal Percussion II (P) 2 cr.
Prerequisite: MVPB 1311. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVPB 2321 Applied Principal Percussion IV (P) 2 cr.
Prerequisite: MVPB 2321. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVPA 1211 Applied Secondary Percussion I (P) 1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVPA 1211 Applied Secondary Percussion II (P) 1 cr.
Prerequisite: MVPA 1211. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVPA 2221 Applied Secondary Percussion III (P) 1 cr.
Prerequisite: MVPA 1211. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVPA 2221 Applied Secondary Percussion IV (P) 1 cr.
Prerequisite: MVPA 2221. Fourth semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVPA 1411 Applied Major Percussion I (P) 3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVPA 1411 Applied Major Percussion II (P) 3 cr.
Prerequisite: MVPA 1411. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVPA 2421 Applied Major Percussion III (P) 3 cr.
Prerequisite: MVPA 1411. Third semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVPA 2421 Applied Major Percussion IV (P) 3 cr.
Prerequisite: MVPA 2421. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVKA 1011 Applied Preparatory Piano I (P) 2 cr.
Prerequisite: By audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.

MVKA 1011 Applied Preparatory Piano II (P) 2 cr.
Prerequisite: MVKA 1011. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVKA 1311 Applied Principal Piano I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVKA 1311 Applied Principal Piano II (P) 2 cr.
Prerequisite: MVKA 1311. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVKA 2321 Applied Principal Piano III (P) 2 cr.
Prerequisite: MVKA 2321. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVKA 2321 Applied Principal Piano IV (P) 2 cr.
Prerequisite: MVKA 2321. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVKA 1211 Applied Secondary Piano I (P) 1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVKA 1211 Applied Secondary Piano II (P) 1 cr.
Prerequisite: MVKA 1211. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVKA 2221 Applied Secondary Piano III (P) 1 cr.
Prerequisite: MVKA 2221. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVKA 2221 Applied Secondary Piano IV (P) 1 cr.
Prerequisite: MVKA 2221. Fourth semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVKA 1411 Applied Major Piano I (P) 3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVKA 1411 Applied Major Piano II (P) 3 cr.
Prerequisite: MVKA 1411. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVKA 2421 Applied Major Piano III (P) 3 cr.
Prerequisite: MVKA 2421. Third semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVKA 2421 Applied Major Piano IV (P) 3 cr.
Prerequisite: MVKA 2421. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

SAXOPHONE

MVWA 1015 Applied Preparatory Saxophone I (P) 2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.
MVSA 1014  Applied Preparatory String Bass I (P)  2 cr.
Prerequisite: MVSA 1014. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One-hour lesson per week.

MVSA 1014  Applied Preparatory String Bass II (P)  2 cr.
Prerequisite: MVSA 1014. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One-hour lesson per week.

MVWA 1214  Applied Secondary Saxophone I (P)  1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for students majoring in an area of music except performance. (E.g., music education, music therapy, etc.) Two-half-hour lessons per week.

MVWA 1214  Applied Secondary Saxophone II (P)  1 cr.
Prerequisite: MVWA 1214. Second semester of private lessons designed for the student majoring in an area of music except performance. (E.g., music education, music therapy, etc.) Two-half-hour lessons per week.

MVWA 1214  Applied Secondary Saxophone III (P)  1 cr.
Prerequisite: MVWA 1214. Third semester of private lessons designed for the student majoring in an area of music except performance. (E.g., music education, music therapy, etc.) Two-half-hour lessons per week.

MVWA 1214  Applied Secondary Saxophone IV (P)  1 cr.
Prerequisite: MVWA 1214. Fourth semester of private lessons designed for the student majoring in an area of music except performance. (E.g., music education, music therapy, etc.) Two-half-hour lessons per week.

MVWA 1415  Applied Major Saxophone I (P)  3 cr.
Prerequisite: Placement by audition before the entire full-time faculty. First semester of private lessons designed for the student majoring in performance. Two-half-hour lessons a week.

MVWA 1415  Applied Major Saxophone II (P)  3 cr.
Prerequisite: MVWA 1415. Second semester of private lessons designed for the student majoring in performance. Two-half-hour lessons a week.

MVWA 2425  Applied Major Saxophone III (P)  3 cr.
Prerequisite: MVWA 1415. Third semester of private lessons designed for the student majoring in performance. Two-half-hour lessons a week.

MVWA 2425  Applied Major Saxophone IV (P)  3 cr.
Prerequisite: MVWA 2425. Fourth semester of private lessons designed for the student majoring in performance. Two-half-hour lessons a week.
MVBA 2424  Applied Major String Bass IV (P)  3 cr.
Prerequisite: MVSA 2424. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

TRUMPET

MVBA 2423  Applied Major Trombone III (P)  3 cr.
Prerequisite: MVBA 1413. Third quarter of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVBB 2423  Applied Major Trombone IV (P)  3 cr.
Prerequisite: MVBA 2423. Fourth quarter of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVBA 1013  Applied Preparatory Trombone I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.

MVBB 1013  Applied Preparatory Trombone II (P)  2 cr.
Prerequisite: MVBA 1013. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVBA 1313  Applied Principal Trombone I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance (e.g., music therapy etc.) Two half-hour lessons a week.

MVBB 1313  Applied Principal Trombone II (P)  2 cr.
Prerequisite: MVBB 1313. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVBA 2323  Applied Principal Trombone III (P)  2 cr.
Prerequisite: MVBB 1313. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVBB 2323  Applied Principal Trombone IV (P)  2 cr.
Prerequisite: MVBB 2323. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVBA 1213  Applied Secondary Trombone I (P)  1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBB 1213  Applied Secondary Trombone II (P)  1 cr.
Prerequisite: MVBA 1213. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBA 2223  Applied Secondary Trombone III (P)  1 cr.
Prerequisite: MVBB 1213. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBB 2223  Applied Secondary Trombone IV (P)  1 cr.
Prerequisite: MVBB 2223. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVBA 1413  Applied Major Trombone I (P)  3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVBA 1413  Applied Major Trombone II (P)  3 cr.
Prerequisite: MVBA 1413. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

TRUMPET

MVBA 1011  Applied Preparatory Trumpet I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.

MVBB 1011  Applied Preparatory Trumpet II (P)  2 cr.
Prerequisite: MVBA 1011. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVBA 1211  Applied Principal Trumpet I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVBB 1211  Applied Principal Trumpet II (P)  2 cr.
Prerequisite: MVBA 1211. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVBA 2321  Applied Principal Trumpet III (P)  2 cr.
Prerequisite: MVBB 1211. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVBB 2321  Applied Principal Trumpet IV (P)  2 cr.
Prerequisite: MVBB 2321. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVBA 1211  Applied Secondary Trumpet I (P)  1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBB 1211  Applied Secondary Trumpet II (P)  1 cr.
Prerequisite: MVBA 1211. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBA 2221  Applied Secondary Trumpet III (P)  1 cr.
Prerequisite: MVBB 1211. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBB 2221  Applied Secondary Trumpet IV (P)  1 cr.
Prerequisite: MVBB 2221. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g., music education, music therapy etc.) Two half-hour lessons a week.

MVBA 1411  Applied Major Trumpet I (P)  3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.
MVBB 1411  Applied Major Trumpet II (P)  3 cr.  Prerequisite: MVBA 1411. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVBA 2421  Applied Major Trumpet III (P)  3 cr.  Prerequisite: MVBB 1411. Third semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVBB 2421  Applied Major Trumpet IV (P)  3 cr.  Prerequisite: MVBB 2421. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

TUBA

MVBA 1015  Applied Preparatory Tuba I (P)  2 cr.  Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.

MVBB 1015  Applied Preparatory Tuba II (P)  2 cr.  Prerequisite: MVBA 1015. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVBA 1315  Applied Principal Tuba I (P)  2 cr.  Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVBB 1315  Applied Principal Tuba II (P)  2 cr.  Prerequisite: MVBA 1315. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVBA 2325  Applied Principal Tuba III (P)  2 cr.  Prerequisite: MVBB 1315. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVBB 2325  Applied Principal Tuba IV (P)  2 cr.  Prerequisite: MVBA 2325. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVBA 1215  Applied Secondary Tuba I (P)  1 cr.  Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBB 1215  Applied Secondary Tuba II (P)  1 cr.  Prerequisite: MVBA 1215. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBB 2225  Applied Secondary Tuba III (P)  1 cr.  Prerequisite: MVBA 2225. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVBB 2225  Applied Secondary Tuba IV (P)  1 cr.  Prerequisite: MVBA 2225. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

VIOLA

MVSA 1012  Applied Preparatory Viola I (P)  2 cr.  Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson a week.

MVSB 1012  Applied Preparatory Viola II (P)  2 cr.  Prerequisite: MVSA 1012. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVSA 1312  Applied Principal Viola I (P)  2 cr.  Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVSB 1312  Applied Principal Viola II (P)  2 cr.  Prerequisite: MVSA 1312. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVSA 2322  Applied Principal Viola III (P)  2 cr.  Prerequisite: MVSB 1312. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVSA 2322  Applied Principal Viola IV (P)  2 cr.  Prerequisite: MVSA 2322. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.)

MVSA 1212  Applied Secondary Viola I (P)  1 cr.  Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVSB 1212  Applied Secondary Viola II (P)  1 cr.  Prerequisite: MVSA 1212. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVSA 2222  Applied Secondary Viola III (P)  1 cr.  Prerequisite: MVSB 1212. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.
MVSA 1011 Applied Preparatory Violin I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVSA 1012 Applied Preparatory Violin II (P)  2 cr.
Prerequisite: MVSA 1011. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVSA 1311 Applied Principal Violin I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two hour lessons a week.

MVSA 1312 Applied Principal Violin II (P)  2 cr.
Prerequisite: MVSA 1311. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two hour lessons a week.

MVSA 2321 Applied Principal Violin III (P)  2 cr.
Prerequisite: MVSA 2321. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two hour lessons a week.

MVSA 2322 Applied Principal Violin IV (P)  2 cr.
Prerequisite: MVSA 2321. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two hour lessons a week.

MVSA 1211 Applied Secondary Violin I (P)  1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVSA 1212 Applied Secondary Violin II (P)  1 cr.
Prerequisite: MVSA 1211. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVSA 2221 Applied Secondary Violin III (P)  1 cr.
Prerequisite: MVSA 1211. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVSA 2222 Applied Secondary Violin IV (P)  1 cr.
Prerequisite: MVSA 2221. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVSA 1411 Applied Major Violin I (P)  3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVSA 1412 Applied Major Violin II (P)  3 cr.
Prerequisite: MVSA 1412. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVSA 2421 Applied Major Violin III (P)  3 cr.
Prerequisite: MVSA 2422. Third semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVSA 2422 Applied Major Violin IV (P)  3 cr.
Prerequisite: MVSA 2422. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVSA 2421 Applied Major Violin IV (P)  3 cr.
Prerequisite: MVSA 2421. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVVA 1011 Applied Preparatory Voice I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. Private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVVB 1011 Applied Preparatory Voice II (P)  2 cr.
Prerequisite: MVVA 1011. Second semester of private lessons designed for music majors whose background indicates a need for further preparation. One hour lesson per week.

MVVA 1311 Applied Principal Voice I (P)  2 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two hour lessons a week.

MVVA 1312 Applied Principal Voice II (P)  2 cr.
Prerequisite: MVVA 1311. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two hour lessons a week.

MVVB 1311 Applied Principal Voice II (P)  2 cr.
Prerequisite: MVVB 1311. Second semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two hour lessons a week.

MVVA 2321 Applied Principal Voice III (P)  2 cr.
Prerequisite: MVVA 2321. Third semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two hour lessons a week.

MVVB 2321 Applied Principal Voice IV (P)  2 cr.
Prerequisite: MVVA 2321. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two hour lessons a week.

MVVA 1211 Applied Secondary Voice I (P)  1 cr.
Prerequisite: Placement by audition before the music faculty. First semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.
MVVB 1211  Applied Secondary Voice II (P)  1 cr.
Prerequisite: MVVB 1211. Second semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVVA 2221  Applied Secondary Voice III (P)  1 cr.
Prerequisite: MVVB 1211. Third semester of private lessons designed for music majors needing to gain proficiency on an instrument other than their principal or major. One half-hour lesson per week.

MVVB 2221  Applied Secondary Voice IV (P)  1 cr.
Prerequisite: MVVA 2221. Fourth semester of private lessons designed for the student majoring in any area of music except performance. (e.g. music education, music therapy etc.) Two half-hour lessons a week.

MVVA 1411  Applied Major Voice I (P)  3 cr.
Prerequisite: Placement by audition before the entire full-time music faculty. First semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVVB 1411  Applied Major Voice II (P)  3 cr.
Prerequisite: MVVA 1411. Second semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVVA 2421  Applied Major Voice III (P)  3 cr.
Prerequisite: MVVB 1411. Third semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.

MVVB 2421  Applied Major Voice IV (P)  3 cr.
Prerequisite: MVVA 2421. Fourth semester of private lessons designed for the student majoring in performance. Two half-hour lessons a week.
NUR 2120C Nursing Process III-B—Nursing Care of 6 cr. Children (O)

Prerequisites: NUN 1140C, NUR 2210C. Corequisites: MCB 2013C, NUR 2133C, NUR 2131C. With Nursing I and II as a basis, Nursing IIIA encompasses the study of physical and psychological problems of children from infancy through adolescence. The family-centered approach is used in learning the skills needed to care for sick children. The study of pediatric nursing is based on the belief that children, by nature of their growth and development, physical and emotional immaturity, have needs in health and illness different from those of adults. This course is further designed to assist the student to apply knowledge of pediatric nursing in the solving of the common recurring health problems associated with the child through the utilization of the nursing process and the interpersonal process. Nineteen contact hours: five class hours, fourteen hours of laboratory practice in community hospitals and other health agencies.

NUR 2133C Nursing Process IIIA—Nursing Care of 6 cr. the Childbearing Family. (O)

Prerequisites: NUN 1140C, NUR 2210C, APB 2190C, Corequisites: MCB 2013C, NUR 2120C. With Nursing I and II as a basis, Nursing IIIA encompasses the Childbearing cycle as an adaptation of the state of wellness and continues through the neonatal stage of development. Nursing Care of the Childbearing Family focuses on nursing intervention with families who are experiencing the stresses of the childbearing period. The study of the childbearing family is based on the belief that special needs and problems occur at designated points in the growth cycle and outgrowths of the developmental level attained by the individual. Emphasis is placed on utilizing nursing and interpersonal processes to identify and meet the physiological and psychological needs of the childbearing family. Both the uncomplicated and the complicated pregnancy are studied, the focus being on the common, recurring problems of this period. Nineteen contact hours: five class hours, fourteen hours of laboratory practice in community hospitals and other health agencies.

NUR 2210C Nursing Process II—Medical Surgical 10 cr. Nursing. (O)

Prerequisites: NUN 1140C, Corequisites: DEP 2004C. With Nursing I as a foundation, this course moves from the basic patient needs in health maintenance to health problems which require new knowledge and adaptation and includes study of the physical and psychological needs of patients. Emphasis is placed on the essential knowledge, understanding and skills necessary to the nursing care of patients with medical and surgical conditions, and upon the interpersonal process. The four steps of the nursing process will be combined and a higher level of performance will be expected of students. Sixteen contact hours; four class periods; twelve hours of laboratory practice on campus, in community hospitals and other health agencies.

NUR 2220C Nursing Process IVA—Medical-Surgical Nursing Care of the Adult Patient (O)

Prerequisites: NUN 1140C, NUR 2210C, NUR 2133C, NUR 2120C, Corequisite: NUR 2310C. This course is a continuation of the study of commonly recurring health problems of patients from the young adult years through senescence with focus on the illness side of the continuum. The nursing process will serve as the basis for nursing care. The student will give nursing care to patients with advanced medical-surgical deviations. Learning experiences will provide opportunities to utilize previously acquired knowledge and skills in giving nursing care and functioning as a team member. Recognizing the special status and needs of the beginning Techni cal Nurse practitioner, a transitional experience is included in this unit of study. Twenty contact hours: four class hours, sixteen hours of laboratory practice.

NUR 2240C Critical Care Seminar (O)

A course of study to be offered, upon demand, for people involved in the care of critically ill patients in high risk areas. The content of the course will be in more depth and scope than the preparation in basic nursing programs. Topics to be covered include Medical and Surgical Intensive Care, Crisis Intervention, Recovery Room Nursing, Neonatal Intensive Care and Systematic Planning and Evaluation of Patient Care. Eight contact hours.

NUR 2242C Coronary Care Nursing (O)

4 cr.

The concept of Intensive Coronary Care proposed in this course has now become an established method of treatment of patients with acute myocardial infarction in hospitals throughout the world. It has been our premise that intensive coronary care is primary and that it's success is predicated almost wholly on the ability of nurses to assume a new and demanding role. The plan of instruction to be utilized in this program represents a distinct departure from traditional educational concepts. The fundamental purpose of this course is to provide an effective, efficient and standardized method for teaching nurses the principles and practices of intensive coronary care. On the basis of this instruction, professional nurses should be able to fulfill the duties and responsibilities demanded of them. Eight contact hours.

NUR 2243C Emergency Department Nursing (O)

4 cr.

This course has been prepared for the use of professional health personnel working in the emergency rooms of general hospitals. It is also applicable to medical personnel working in other areas of the hospital and satellite clinics. This course was developed to fill the need for future modern program covering in-house hospital needs. Extensive emphasis has been placed on emergency experience in recent years and has led to the demand for this course. It is designed to integrate a review of anatomy and physiology as they apply to current emergency practice. To function effectively in an emergency situation, it is sometimes necessary to know the circumstances that lead up to the emergency situation. Two persons with similar injuries may require quite different handling. This course strives to articulate this awareness to the student. Eight contact hours.

NUR 2310C Nursing Process IVB—Psychiatric 3 cr. Nursing. (O)

Prerequisites: NUN 1140C, NUR 2210C, NUR 2133C, NUR 2120C, Corequisite: NUR 2220C. This course will build on the mental health concepts presented in each of the previous nursing courses. In varied clinical settings, emphasis will be placed on use of the nursing process in the care of adolescent and adult clients with deviant patterns of behavior. Nineteen contact hours: five class hours, fourteen hours of laboratory practice.

NUR 2314C Nursing Process IVB—Fundamentals 10 cr. of Nursing. (O)

Prerequisites: APB 2190C, 2193C. Nursing I is a study of the principles and higher level of performance that form the foundation for nursing care. The nursing process-assessing, planning, implementing and evaluating serves as the framework for the application of content. Emphasis is placed on nursing intervention and adaptations for specific age groups to meet the basic need of man in health maintenance. Content and experience focus on observations, communications, the interpersonal process, recording, hygienic practices, administration of drugs, asepsis, nutrition, elimination, fluid balance and oxygen. Current trends and legal implications of nursing are introduced. Fifteen contact hours: five class periods; ten hours of laboratory practice on campus, in community hospitals and other health agencies.

OCS 2502C Marine Biology (P)

4 cr.

The student will benefit by taking BSC 1011C or High School Chemistry or Physics, or CHM 1054C prior to enrolling in this course. A comprehensive survey of marine ecosystems with emphasis on the local flora and fauna. Laboratory includes collection and identification of marine organisms. Six contact hours: three class hours; three laboratory hours.

OCE 2005 Introductory Oceanography (O)

4 cr.

Prerequisite: MAT 1033. Corequisite: MAC 1104. In addition, the student will benefit by taking High School Chemistry and/or Physics prior to enrolling in this course. An introductory, comprehensive treatment of physical, chemical and geological aspects of our oceans. Six contact hours.
OMT 2211  Marine Field Sampling (D)  3 cr.
Prerequisite: OCE 2005 or CCB 2602C or ZOO 2450. A practical introductory course dealing with biological, physical and chemical field sampling techniques of estuarine and marine environments. This course includes basic biostatistical methods such as (1) measures of central tendency and variability, (2) probability and chi-square, (3) correlation and linear regression, (4) single classification analysis of variance and (5) experimental design and interpretation of results. Also each student must take an active part regarding the proper operation and field maintenance of hydrometers, optical refractometers, salinometers, dissolved oxygen analyzers, pH meters and bathythermographs. Six contact hours.

OMT 2223  Marine Instrumentation (D)  3 cr.
The student will benefit by taking OCE 2005, High School Physical Science and Mathematics prior to enrolling in OMT 2223. In this course students will be instructed in the basic skills for the proper operation of hydrometers, refractometers, salinometers, barometers, sling psychrometers, dissolved oxygen analyzers, pH meters, spectrophotometers, autoclaves, centrifuges, photomicrographic equipment, marine filtering systems, anemometers, benthic collecting apparatus, drying ovens, Mettler balances, multi-parameter recording devices, strip-chart recorders and various types of probes. Six contact hours.

Ori 2000  Oral Interpretation (P)  3 cr.
The course consists of critical analysis and appreciation of literature from both the emotional and the intellectual viewpoints; involves the discussion and application of the techniques of oral reading of poetry, prose, and drama; and is designed to enhance the student's appreciation of words, ideas, and beauty in all forms of literature. Three contact hours.

PCB 2030  The Ecological Crisis (P)  3 cr.
An interdisciplinary analysis of our biological and social environment revealing the interaction and interrelationships among living organisms and human groups in the biosphere, their needs, values, and their institutions. Three contact hours.

PCB 2033C  Environmental Perspective (Overseas) (P)  3 cr.
Corequisite: ANT 2956. An environmental course requiring three weeks of classroom study preceding a three-week field trip to Mexico and Guatemala which will culminate in a final week of classroom study and evaluation. The overseas study will offer a unique opportunity to contrast the North American environmental problems with those of a relatively underdeveloped country in Central America.
PEL 1041L Recreational Games (P) 1 cr.
A course designed to introduce the student to the basic skills, rules, and strategy of a variety of recreational games, such as table tennis, deck tennis, horseshoes, paddle tennis and croquet, etc. Two contact hours.

PEL 1111L Beginning Bowling (P) 1 cr.
A course designed to teach the fundamental skills, techniques, and the knowledge necessary for bowling enjoyment. It will prepare the student for recreational and league bowling. Two contact hours.

PEL 1121L Beginning Golf (P) 1 cr.
A beginning course designed to teach the basic golf swing and its application to several clubs. History, rules, golfing etiquette, and simple strategy will be taught. Two contact hours.

PEL 1141L Archery (P) 1 cr.
The introduction of the basic skills and fundamental techniques with tournament practice. Two contact hours.

PEL 1211L Softball (P) 1 cr.
A course designed for students who wish to broaden their knowledge of softball and improve their game skills. The course will emphasize the history of the game, rules, fundamentals, game skills and strategies. Two contact hours.

PEL 1321L Volleyball (P) 1 cr.
A course designed to teach the fundamental skills, strategy and knowledge necessary for game and tournament participation. Two contact hours.

PEL 1341L Beginning Tennis (P) 1 cr.
An introductory course covering the history, scoring, game strategy, and basic skills which include footwork, forehand and backhand drives, serve, volley and lob. Two contact hours.

PEL 1342L Intermediate Tennis (P) 1 cr.
The student will benefit by taking PEL 1341 prior to enrolling in PEL 1342. Designed for students who have acquired the basic skills and strategy of tennis and desire to improve their tennis game. Two contact hours.

PEL 1346L Beginning Badminton (P) 1 cr.
Course work is designed to cover history, scoring, basic skills, game strategy and appropriate class tournaments. Two contact hours.

PEL 1421L Handball (P) 1 cr.
A course designed to teach the fundamental skills, strategy and knowledge necessary for game and tournament participation. Two contact hours.

PEL 1441L Paddle-Racquet Ball (P) 1 cr.
A course designed to teach the fundamental skills, strategy and knowledge necessary for game and tournament participation. Two contact hours.

PEL 1511L Soccer (P) 1 cr.
This course is designed to introduce the student to the basic skills, techniques, rules, game play and knowledge of soccer. Two contact hours.

PEL 1624L Advanced Basketball (P) 1 cr.
A course designed to teach basketball. This includes offensive and defensive fundamentals, strategy, rules of basketball, and application of fundamentals, strategy and rules in game situations. Two contact hours.

PEL 2322L Advanced Volleyball (P) 1 cr.
Power volleyball techniques, tactics, and strategy will be introduced to the student interested in either the competitive or recreational aspects of the game. Two contact hours.
PEN 1113L Lifesaving (P) 1 cr.
A course designed to provide the student with the knowledge and skills to save the student's own life or the life of another in the event of an emergency. Prerequisite: (1) standing front dive in good form, (2) surface dive of six feet and swim two body lengths under water, (3) swim 440 yards, continuously in good form, (4) tread water for one minute, float motionless for one minute. Two contact hours.

PEN 1121L Beginning Swimming (P) 1 cr.
A course designed for the beginning or non-swimmer in which the basic skills of breath holding, floating, gliding, bobbing, and elementary rescues will be emphasized. The crawl, elementary back, and side strokes will be introduced. Two contact hours.

PEN 1122L Intermediate Swimming (P) 1 cr.
Course work is designed for the student able to swim continuously for 25 yards in good form. Emphasis is placed on endurance and good form in the crawl, side, back and breast strokes. Course content includes diving, elementary water rescues and drowproofing. Two contact hours.

PEN 1136C Underwater Diving Skills (SCUBA) (D) 3 cr.
The student will benefit by taking MAT 1024 prior to enrolling in PEN 1136C. The scientific study of underwater judgment, attitude, discipline and fitness leading to a Professional Association of Diving Instructors (PADI) certification. This course will stress the latest underwater diving techniques which will be used for making physical and biological collections in the field. The course will include all classroom and pool instruction necessary to qualify students for a national diving certification and open water checkout. Six contact hours.

PEN 1206C Navigation and Small Boat Handling (D) 3 cr.
The student will benefit by taking MAT 1033 and High School Trigonometry prior to enrolling in PEN 1206. This is a practical field and lecture course which will emphasize traditional navigation skills, techniques of small boat handling, and radio communications skills. It will also acclimate the student to all types of shipboard weather conditions. Six contact hours.

PEN 1511L Angling (P) 1 cr.
The course is designed to introduce the skills, techniques, and knowledge of fishing for sport. The College's lakes will afford practice in fly, bait, and spin casting. Two contact hours.

PEO 1040C Supervision of Elementary Children At Play (P) 3 cr.
Classroom instruction and field experience in childhood play supervision for students interested in becoming teachers and teacher aides. It will also benefit students who are now or soon will be parents. Students will get their field experience by working with recreational supervisors in a nearby elementary school. Four contact hours.

PEO 2003C Sports Officiating (P) 3 cr.
This course is designed to acquaint the student with the techniques of officiating team, individual, and dual sports. Some of the sports covered are baseball, basketball, track and field, volleyball, tennis, and handball. Three contact hours.

PET 2000 Introduction to Physical Education (P) 3 cr.
Designed for students interested in physical education as a profession. The course examines the place, function, and contribution of physical education within the total educational program. It also includes consideration of the history, philosophy, and problems of physical education. Three contact hours.
PHI 2010  Introduction to Philosophy (P)  3 cr.
An introduction to philosophical issues organized, for the most part, on an historical basis. The student encounters some of the perennial problems of philosophy and the types of answers that have been suggested by studying the thought of selected philosophers. Three contact hours.

PHI 2100  Introduction to Logic (P)  3 cr.
The course provides a general introduction to logic that combines an approximately equal emphasis on the uses and misuse of language, deductive reasoning, and inductive reasoning. Some primary objectives are to provide the student with an appreciation of the extent and limitations of human knowledge, and with tools for valid reasoning and critical thinking. Three contact hours.

PHI 2500  Introduction to Moral and Political Philosophy (P)  3 cr.
A survey of the efforts made by philosophers to comprehend that portion of experience that is concerned with human values and obligations. The course consists, primarily, of the analysis of selected writings in which philosophers attempt to do such things as characterize the most satisfactory life, specify the basis of moral responsibility, determine the testability of moral judgments, and assess the proper relation between the individual and the state. Three contact hours.

PHY 1020  Physics for Liberal Arts (P)  3 cr.
The student will benefit by taking High School Algebra or MAT 1024 prior to enrolling in PHY 1020. This course is designed as a general education course for the non-science student and not for one who is planning to major in physics or other sciences. It is a survey of the physical environment as applied to mechanics, electricity, and magnetism and modern physics. Three contact hours.

PHY 2048C  Physics I with Calculus (P)  4 cr.
Prerequisite: MAC 1132. Corequisite: MAC 1311. Subject matter includes mechanics, heat, thermodynamics, and sound. Laboratory work will illustrate important principles and develop techniques. This course uses the Calculus in the subject matter presentations and in the development of problem-solving abilities. It is designed for students majoring in physics, chemistry, and engineering with above-average mathematical background. Six contact hours: three class hours; one three-hour laboratory.

PHY 2049C  Physics II with Calculus (P)  4 cr.
Prerequisite: PHY 2048C. This course is a continuation of PHY 2048C. Subject matter includes electricity, magnetism, light and some areas of modern physics. Laboratory work is similar to and a continuation of the laboratory in PHY 2048C. Six contact hours: three class hours; one three-hour laboratory.

PHY 2053C  General Physics I (P)  4 cr.
Prerequisite: MAC 1104, College Algebra. Corequisite: MAC 1132, Trigonometry. Subject matter includes mechanics, heat, thermodynamics, and sound. Laboratory work will illustrate important principles and develop techniques. This course will stress problem-solving abilities. It is designed for those students who are majoring in pre-med, pre-dental, pre-veterinary, biological sciences, and geology. Six contact hours: three class hours; one three-hour laboratory.

PHY 2054C  General Physics II (P)  4 cr.
Prerequisite: PHY 2053C. A continuation of PHY 2053C. Subject matter includes electricity, magnetism, light, and some areas of modern-physics. Laboratory work is similar to and a continuation of the laboratory in PHY 2053C. Six contact hours: three class hours; one three-hour laboratory.

POS 2041  American Federal Government (P)  3 cr.
A study of the theory, organization, principles, and functioning of the Federal Government, emphasizing relationship of the individual to the government. Three contact hours.

POS 2112  State and Local Government (P)  3 cr.
A study of state and local forms of government in the United States. The government of Florida is used as an example of activities and patterns of state government. Responsibilities of local government at county and city levels are explored. Three contact hours.

PSC 1341  Physical Science (P)  3 cr.
The student will benefit by taking High School Algebra or MAT 1024 prior to enrolling in PSC 1341. This course is designed to acquaint the individual with the development of the physical sciences, with the integrating principles and theories in the physical sciences, with the practice of the scientific method, and with a useful knowledge of selected areas in mechanics, electricity and magnetism, periodicity and atomic structure, and nuclear phenomena. Presentation involves lectures, demonstrations, and films. The course is not designed essentially as an introductory or preparatory course for any specific physical sciences. Three contact hours.

PSY 1012  General Psychology (P)  3 cr.
An analysis of human behavior by the study of the adoption of the individual to the physical and social environment. Three contact hours.

QMB 1001  Business Mathematics (D)  3 cr.
A mathematical treatment of financial problems arising in modern living. The principal purpose of this course is to develop skill in the handling of business transactions. It covers such topics as percentage, inventories and turnover, simple interest and present value, depreciation, and payroll. Three contact hours.

REA 1305  Developmental Reading (P)  3 cr.
A reading laboratory course open to all students and designed to develop each student's reading skills. The mechanics of reading and the need for selecting a reading method that fits the purpose for reading will be discussed on an individual basis. Three contact hours.

REA 1605  Study Skill Development (P)  1 cr.
A course designed for college students who wish to find an effective way to study. Study skills will be taught and practiced through an individualized approach to each student's needs and in conjunction with the student's own course of study. Attention will be given to general principles of learning, study attitudes, scheduling of time, a study formula technique and its application, learning resources and research techniques. Two contact hours.

REE 1000  Real Estate Principles and Practices (D)  3 cr.
The basic purpose of this course is to provide the student with a broad background of the real estate field and to expose the student to the wide ranging nature of the field. Successful completion of this course and Ree 1400 with grades of C (or better) fulfills the educational prelicensing requirements established by the Florida Real Estate Commission to sit for the state examination for a licensed real estate salesperson. Three contact hours.

REE 1100  Real Estate Appraisal (O)  3 cr.
This is an intensive course that has been developed to impart a broad understanding of property appraisal concepts and to teach the technical skills employed in their applications to residential properties. It is designed to give the experienced real estate person a basic knowledge of appraisal fundamentals. Three contact hours.

REE 1400  Real Estate License Law (D)  3 cr.
This course covers a detailed explanation of Florida Real Estate Law as contained in the Florida Real Estate Handbook; Operation, requirements and procedures of the real estate office are discussed. Successful completion of this course and Ree 1000 with grades of C (or better) fulfills the educational prelicensing requirements established by the Florida Real Estate Commission to sit for the state examination for a licensed real estate salesperson. Three contact hours.
REE 1810 Real Estate Sales (O) 3 cr.
Modern techniques of successful real estate selling, including how to obtain prospects from advertising, showing properties to buyers, obtaining the offer, closing the seller, how to build a personal referral business, financing your real estate sales, and expanding real estate opportunities. Three contact hours.

REE 2200 Real Estate Finance (O) 3 cr.
Prerequisite: REE 1000 or Real Estate Salespersons Registration Certificate. Concepts, principles, and practices pertaining to real property finance. Detailed information covering legal aspects of mortgages, brokerage regulations and ethics, all major sources of funds for real estate financing, relevant governmental agencies, and ownership forms. Three contact hours.

REE 2220 Real Estate Investment (O) 3 cr.
The student will benefit by taking REE 1000 prior to enrolling in REE 2220. This course is designed to familiarize the student with real estate finance, investment structures, depreciation, capital gains, and income-producing investments. It includes a study of investment strategies, tax implications, and the mechanics of real estate investment. Three contact hours.

REE 2230 Real Estate Finance (O) 3 cr.
Prerequisite: REE 1000 or Real Estate Salespersons Registration Certificate. This course provides an understanding of the principles and practices related to real estate finance. It covers topics such as mortgage origins, investment strategies, and tax implications. Three contact hours.

REE 2270 Home Mortgage Lending (O) 3 cr.
This course approaches the subject from the viewpoint of the mortgage loan officer who seeks to develop a sound mortgage portfolio. A picture of the mortgage market is presented first, then the acquisition of a mortgage portfolio, mortgage plans and procedures, mortgage loan processing and servicing, and finally the obligations of the mortgage loan officer in overall portfolio management. Three contact hours.

REE 2430 Real Estate Law (O) 3 cr.
This course offers specific suggestions as to types of real estate documents, their form and content, and the mechanics of their use, and contains a full legal, detailed exposition of every aspect of modern real estate transactions. Three contact hours.

REE 2500 Real Estate Management (O) 3 cr.
Prerequisite: REE 1000 or Real Estate Salespersons’s or Broker’s Registration Certificate. Comprehensive coverage of property management with emphasis placed on basic management concepts which can be applied to apartments, commercial buildings, shopping centers, and urban renewal programs. Principles of successful management techniques for solving problems. Successful completion of course accepted as equivalency for Institute of Real Estate Management's course IMM 201 as one of the requirements toward Certified Property Manager. Three contact hours.

REL 2210 Religious Thought in the Old Testament (P) 3 cr.
A study of religious thought and instruction in the Old Testament. Attention is given to the problems of authorship, date, historical setting, and textual criticism. Three contact hours.

REL 2243 Religious Thought in the New Testament (P) 3 cr.
A study of the life and teachings of Jesus, and of the beginning of church life and thought as reflected in the New Testament. Three contact hours.

REL 2300 World Religions (P) 3 cr.
A comparative study of world religions, including Hinduism, Buddhism, Taoism, Confucianism, Shinto, Islam, Judaism, and Christianity. Three contact hours.

RET 1024 Fundamentals of Respiratory Therapy (D) 3 cr.
An introductory course covering basic respiratory therapy equipment, medical gases, gas therapy, and the respiratory therapy department. Four contact hours.

RET 1244 Emergency and the Respiratory Therapist (D) 3 cr.
Prerequisite: APB or instructor approval. This course is designed to provide didactic and clinical training in the techniques of first aid, cardiopulmonary resuscitation and emergency respiratory care with primary emphasis on areas pertinent to the respiratory therapist. Four contact hours.

RET 1264 Respiratory Therapy Advanced Equipment (D) 3 cr.
Prerequisite: APB 1260 or permission of professor. This course introduces the student to artificial mechanical ventilation; classification of ventilators; analysis, operation, and maintenance of mechanical ventilators; indications, contraindications, and side effects of mechanical ventilators and modes of ventilation. Four contact hours.

RET 1276 Respiratory Therapy Nursing Care (D) 3 cr.
Corequisite: RET 1024. This course is designed to introduce the student to and train the student in the nursing and rehabilitative skills necessary to provide quality respiratory care. Four contact hours.

RET 1414 Arterial Blood Gases and Pulmonary Function Studies (D) 4 cr.
Prerequisite: APB 1260 or permission of professor. This course is designed to give an in-depth understanding of the acid-base balance of the body and arterial blood gas sampling and analysis. The course also includes an investigation into pulmonary testing and an introduction to the use of pulmonary function testing equipment. Five contact hours.

RET 2272 Respiratory Therapy Clinical Applications (D) 4 cr.
Prerequisite: APB 1260 or permission of professor. This course will allow the respiratory therapy student to be introduced into the hospital departments and situations in which the student may be expected to perform the procedures applicable to this point in the student's education. The performance of these procedures will be closely supervised. Twelve contact hours.

RET 2273C Clinical Seminar In Intensive Respiratory Care (I) (D) 2 cr.
Prerequisite: APB 1260; Corequisite: RET 2274L. This course is a weekly clinical symposium dealing with the current practices in intensive respiratory care, relevant medical literature, and patient case studies. Two contact hours.

RET 2274L Respiratory Intensive Care Practicum I (D) 7 cr.
Prerequisite: RET 1264. This course is designed to provide the student with the essential clinical skills necessary to function as a competent respiratory therapist in the critical care areas. Twenty-one contact hours.

RET 2284C Clinical Seminar In Intensive Respiratory Care II (D) 2 cr.
Prerequisites: APB 1260 and RET 1264. Corequisite: RET 2285. This course is a continuation of the evaluation of current practices in intensive respiratory care, relevant medical literature, and patient case studies. Two contact hours.

<tbody>
<tr>
<td>RET 2285L</td>
<td>Respiratory Intensive Care Practicum II (D)</td>
<td>7 cr.</td>
<td>Prerequisite: RET 1264. In continuation, this course is designed to provide the student with the essential clinical skills necessary to function as a competent respiratory therapist in the critical care areas. Twenty-one contact hours.</td>
</tr>
<tr>
<td>RMI 1030</td>
<td>Principles of Insurance (D)</td>
<td>3 cr.</td>
<td>This course will seek to develop principles that can be used in understanding insurance companies, contracts, and practices. The approach will be essentially functional. Emphasis will be on the presentation principles and explanations of practices. Methods of comparing the relative cost will be presented. Three contact hours. (This course as taught on the Fred H. Kent Campus prepares the student for the Solicitor's Examination. As taught on the South Campus, it prepares the student for the IIA Insurance Certificate).</td>
</tr>
<tr>
<td>RMI 1110</td>
<td>Principles of Life Insurance I (D)</td>
<td>3 cr.</td>
<td>This course is an introduction to the principles of life insurance, the basic life insurance plans, and the more common types of individual life insurance contracts. It also includes a survey of industrial life insurance, health insurance and group life insurance, and it constitutes a general survey of the major kinds of personal insurance coverages available. Three contact hours.</td>
</tr>
<tr>
<td>RMI 1120</td>
<td>Principles of Health Insurance (O)</td>
<td>3 cr.</td>
<td>Introduction to health insurance; covers health losses and protection, expense and income coverage, and health insurance, its growth, and many areas of coverage offered by government, commercial, and Blue Cross-Blue Shield organizations. Three contact hours.</td>
</tr>
<tr>
<td>RMI 1160</td>
<td>Marketing Principles of Life and Health Insurance (O)</td>
<td>3 cr.</td>
<td>A new approach toward the life and health insurance industry, its products, the market potential, and the industry as a selling career. Three contact hours.</td>
</tr>
<tr>
<td>RMI 1200</td>
<td>Principles of Casualty Insurance and Surety Bonding</td>
<td>3 cr.</td>
<td>Prerequisite: RMI 1030. This course is an introduction to the eight areas of automobile liability and physical damage insurance, workmen's compensation and employers' liability insurance, professional and personal liability insurance; fidelity and surety bonds, theft coverages, multiple-line and property coverages, health insurance, and miscellaneous casualty coverages. Three contact hours. (This course as taught on the Fred H. Kent Campus prepares the student for the Solicitor's Examination. As taught on the South Campus, it prepares the student for the IIA Insurance Certificate).</td>
</tr>
<tr>
<td>RMI 1210</td>
<td>Principles of Fire and Allied Lines (D)</td>
<td>3 cr.</td>
<td>Prerequisite: RMI 1030. This course is an introduction to the four areas of fire, ocean marine and inland marine insurance and multiple-line coverage. For each of these four areas, specimen contracts are examined. Each area is discussed with regard to the peril, property, losses, persons, locations, time and hazards which are covered. Three contact hours. (This course as taught on the Fred H. Kent Campus prepares the student for the Solicitor’s Examination. As taught on the South Campus, it prepares the student for the IIA Insurance Certificate).</td>
</tr>
<tr>
<td>RMI 1260</td>
<td>Principles of Insurance and Liability Claim Adjusting (O)</td>
<td>3 cr.</td>
<td>Corresponds to Part II of the Insurance Institute of America course in Adjusting. Examines the principles and practices of adjusting liability claims. Three contact hours.</td>
</tr>
<tr>
<td>RMI 1280</td>
<td>Principles of Property Insurance Adjusting I (O)</td>
<td>3 cr.</td>
<td>This course is an introduction to the general principles of insurance and property loss adjusting. The following areas are covered: risk and insurance, suretyship, risk management, principles of law and the insurance transaction, the insurance contract-limitations on coverage and limitation on amount of loss, the procedure, investigation, and reports of adjustment of property losses, and estimating business losses. Three contact hours.</td>
</tr>
<tr>
<td>RMI 1430</td>
<td>Legal Aspects of Life Insurance (O)</td>
<td>3 cr.</td>
<td>Corresponds to Part III of the Life Office Management Association (LOMA) insurance Education Program. An up-to-date presentation of the law of life insurance contracts for the person whose principal interest is life insurance rather than law. Three contact hours.</td>
</tr>
<tr>
<td>RMI 1432</td>
<td>Life Company Operations (O)</td>
<td>3 cr.</td>
<td>Corresponds to Part II of the Life Office Management Association (LOMA) Insurance Education Program. Covers life insurance home office organization, regulation, taxation, and mathematical aspects, as well as the marketing and investment functions. Three contact hours.</td>
</tr>
<tr>
<td>RMI 2270</td>
<td>Liability Insurance Adjusting (O)</td>
<td>3 cr.</td>
<td>Covers the concepts of legal duty, breach of legal duty, and concepts of damages. Introduction to medical knowledge needed by adjusters, study of adjuster-lawyer and adjuster-physician relationships, and settlement of workmen's compensation claims. Assumes a knowledge of the subject matter of RMI 1260. Three contact hours.</td>
</tr>
<tr>
<td>RMI 2281</td>
<td>Property Insurance Adjusting (O)</td>
<td>3 cr.</td>
<td>Covers in more depth than previous courses in the program the subject of apportionment, insurable interest, limitation on insurer's liability, and estimating. Special consideration is given to adjustment of building, merchandise and fixture losses, and business interruption insurance losses. Assumes a knowledge of the subject matter of RMI 1260 and RMI 1280. Three contact hours.</td>
</tr>
<tr>
<td>RMI 2750</td>
<td>Life Insurance Accounting (O)</td>
<td>3 cr.</td>
<td>Corresponds to Part IV of the Life Office Management Association (LOMA) Insurance Education Program. Covers the principles of bookkeeping and accounting as an aid in understanding the life insurance accounting practices. Three contact hours.</td>
</tr>
<tr>
<td>RTV 2001</td>
<td>Introduction to Broadcasting (P)</td>
<td>3 cr.</td>
<td>An introduction to the historical, cultural, social, legal, business and career aspects of radio and television broadcasting plus an introduction to the types and sub-types of broadcast media. Five contact hours.</td>
</tr>
<tr>
<td>RUS 1100</td>
<td>Beginning Russian I (P)</td>
<td>3 cr.</td>
<td>This course consists of pronunciation, elements of grammar, simple conversation, exercises, reading, and composition. Visual and auditory aids are employed. Four contact hours: three class hours; one laboratory hour.</td>
</tr>
<tr>
<td>RUS 1101</td>
<td>Beginning Russian II (P)</td>
<td>3 cr.</td>
<td>Prerequisite: RUS 1100 or equivalent. A continuation of RUS 1100. Four contact hours: three class hours; one laboratory hour.</td>
</tr>
<tr>
<td>RUS 2200</td>
<td>Intermediate Russian I (P)</td>
<td>3 cr.</td>
<td>Prerequisite: RUS 1101 or equivalent. Reading from standard Russian authors, careful review of grammar, conversation, and composition. Four contact hours.</td>
</tr>
<tr>
<td>RUS 2201</td>
<td>Intermediate Russian II (P)</td>
<td>3 cr.</td>
<td>Prerequisite: RUS 2200 or equivalent. A continuation of RUS 2200. Four contact hours.</td>
</tr>
<tr>
<td>SCE 2416</td>
<td>Science Institute for Elementary Teachers (P)</td>
<td>3 cr.</td>
<td>A lab-oriented course designed to acquaint students with the process approach to elementary school science. Attention is given to use of equipment and materials, development of scientific processes, and review and extension of scientific knowledge. (Limited enrollment.) Three contact hours.</td>
</tr>
<tr>
<td>SES 1003</td>
<td>General Office Procedures (D)</td>
<td>3 cr.</td>
<td>Prerequisite: SES 1101 or ability to type 35 words per minute for five minutes on straight copy. A course designed to prepare the student for office functions such as communication skills (routine mail procedures, telephone techniques, and receptionist skills), office mathematics, records management, duplicating, human relations, and other general clerical skills. Three contact hours.</td>
</tr>
</tbody>
</table>
SES 1100  Beginning Typewriting  I (D)  3 cr.
A course designed for the student who has little or no typewriting experience. The major objectives of the course are to learn the keyboard and to develop correct typewriting techniques. Tabulations, vertical and horizontal centering, and personal letters are introduced. Three contact hours.

SES 1101  Beginning Typewriting II (D)  3 cr.
Prerequisite: SES 1100 or consent of the professor. A study of the touch system of typewriting and the application of the basic skills to business letters, reports, and tabulated problems. (Students who have satisfactorily completed one year of high school typewriting should enroll in SES 1110, Intermediate Typewriting.) Three contact hours.

SES 1110  Intermediate Typewriting (D)  3 cr.
Prerequisite: SES 1101 or one year of high school typewriting. Emphasizes speed building, improvement of basic techniques, production typing of letters, tabulation, reports, manuscripts, and office problems. Three contact hours.

SES 1150  Introduction to Word Processing (O)  3 cr.
Prerequisite: SES 1110, Intermediate Typewriting or demonstrate a typewriting speed proficiency of 40 words per minute for five minutes on straight copy and SES 1361 Machine Transcription or six months work experience with an office record dictation system. Word Processing is the application of modern technology and systems management techniques to create a system for the production of typewritten documents in the modern office. This course provides the student with an overview of the system, which includes personnel, procedures, and equipment. Three contact hours.

SES 1210  Beginning Shorthand (D)  3 cr.
A beginning course in the principles of Gregg shorthand with some dictation and transcription practice. Students with no shorthand skill should take SES 1100 concurrently with SES 1210. (Students who have satisfactorily completed two years of high school shorthand should enroll in SES 1211.) Three contact hours.

SES 1211  Intermediate Shorthand (D)  3 cr.
Prerequisite or corequisite: STS 1101 or ability to type 25 words a minute for three minutes on straight copy. Prerequisite: SES 1210 or ability to take dictation at 50 words a minute for two minutes. A continuation of Gregg shorthand with increased practice in dictation and transcription. (Students who have satisfactorily completed two years of high school shorthand should enroll in SES 2212, Advanced Shorthand.) Three contact hours.

SES 1221  Machine Shorthand I (O)  3 cr.
Prerequisite: SES 1101 or ability to type 35 words per minute for five minutes on straight copy. This course includes a study of the basic theory of machine shorthand with an emphasis on memorization of abbreviations and derivatives, rapid reading of shorthand plates, phrase building, proper stroking methods, and beginning dictation and transcription.

SES 1324  Calculating Machines (O)  3 cr.
This course emphasizes financial situations arising in offices, with the principal purpose of handling business transactions efficiently; such processes as adding, subtracting, multiplying, dividing, percentages, constants, simple interest, common decimal fractions, mixed numbers, increases and decreases, chain discounts, payroll, simple income tax returns, invoicing, and accounts receivable and payable, system calculations. Development of the touch operating skill using ten-key electronic calculators with memories (display and tape), involving the above mathematical problems by using a textbook and practice set. Three contact hours.

SES 1361  Machine Transcription (O)  3 cr.
Prerequisite or corequisite: SES 1110 or ability to type 35 words a minute for five minutes on straight copy. This course provides intensive practice in machine transcription techniques including language and vocabulary skills and production typing. The development of facility in using appropriate office reference manuals is also emphasized. Three contact hours.

SES 2120  Advanced Typewriting--Executive (D)  3 cr.
Prerequisite: SES 1110 or ability to type 45 words a minute for five minutes on straight copy. This course is a continuation of basic skills in speed and accuracy with emphasis on production typing, including the various business forms, tabulation, reports, manuscripts, and office problems. Three contact hours.

SES 2131  Advanced Typewriting--Legal (O)  3 cr.
Prerequisite: SES 1110 or ability to type 45 words a minute for five minutes on straight copy. This is a course designed to give secretarial science students background in the field of legal typing as well as sharpen and refresh the skills of the legal secretary with emphasis on real estate, litigation, wills, estates, and guardianships, and partnerships and corporations. Three contact hours.

SES 2132  Advanced Typewriting--Medical (O)  3 cr.
Prerequisite: SES 1110 or ability to type 45 words a minute for five minutes on straight copy. This is an advanced typewriting course designed to give secretarial science students background and practice in medical terminology, paper and forms that students need to know for employment as a medical secretary, assistant, or typist. Three contact hours.

SES 2133  Advanced Typewriting--Technical (O)  3 cr.
Prerequisite: SES 1110 or ability to type 45 words a minute for five minutes on straight copy. This course includes intensive practice in the typing of technical and scientific material which includes equations, chemical structures, tables, and illustrations. The techniques of technical typing and the format of technical report typing are included. Three contact hours.

SES 2151  Word Processing--Magnetic Typewriting (O)  3 cr.
Prerequisite: SES 1110: Intermediate Typewriting or demonstrate a typewriting speed proficiency of 40 words per minute for five minutes on straight copy. This is a basic course in operating magnetic text-editing typewriters. Primary emphasis on machine operation, applications, and problem-solving. Three contact hours.

SES 2212  Advanced Shorthand (D)  3 cr.
Prerequisite: SES 1211 or ability to take dictation at 60 words a minute for three minutes. This course covers Gregg shorthand theory and develops the ability to take dictation and transcribe rapidly and accurately. Consent of professor is required for students who have studied other shorthand systems. Three contact hours.

SES 2213  Dictation and Transcription (D)  3 cr.
Prerequisite: SES 2212 or ability to take dictation at 60 words a minute for three minutes. Accelerated dictation and transcription of Gregg shorthand. Finished products are emphasized. Consent of professor is required for students who have studied other shorthand systems. Three contact hours.

SES 2222  Machine Shorthand II (O)  3 cr.
Prerequisite: Machine Shorthand I; SES 1221. Corequisite: SES 1101 or ability to type 35 words per minute for five minutes on straight copy. This course is a continuation of Machine Shorthand I, SES 1231, with emphasis on new theory, abbreviations, phrases, and skill building in dictation and transcription of machine notes. Three contact hours.

SES 2223  Machine Shorthand III (O)  3 cr.
Prerequisite: Machine Shorthand II, SES 2222. This course is a continuation of Machine Shorthand I and II with emphasis on advanced speed building and transcription with improved accuracy. Three contact hours.

SES 2250  Legal Shorthand (D)  3 cr.
Prerequisite: SES 1211. Shorthand theory and dictation of legal nature are included, with legal vocabulary and spelling emphasized. Routine work of legal offices is examined. Three contact hours.
SES 2335 Business Communications (D) 3 cr.
Prerequisite: ENC 1103 or consent of professor, and the ability to typewrite. A study of effective business communications and a brief review of grammar, punctuation, and vocabulary. Extensive practice will be given in business letter writing. Three contact hours.

SES 2402 Secretarial Practices (O) 3 cr.
Prerequisites: SES 1003 and SES 1361. Prerequisite or Corequisite: SES 2335. A finishing course designed for secretarial science students emphasizing the development of competencies in administrative office skills such as writing business letters, preparing business reports, refining dictation and transcription skills, planning meetings and conferences, scheduling appointments, making travel arrangements, supervisory skills, and the coordination of the flow of office tasks. Three contact hours.

SES 2468 Medical Terminology (O) 2 cr.
Development of medical vocabulary commonly used in physicians' offices. Emphasis is given to study of physiologic and anatomic terms referring to human tissues and organic systems and the use of medical dictionaries, manuals, and pharmacological references. Two contact hours.

SOC 2000 Introductory Sociology (P) 3 cr.
A study of sociological concepts, theories, and methods; social groups, processes, and change. Three contact hours.

SOC 2020 Social Problems (P) 3 cr.
Prerequisite: SOC 2000. A consideration of major social problems which affect individuals and groups in industrial societies, with attention to American society. Three contact hours.

SOP 1002 Human Relations (P) 3 cr.
Drawing from several areas of behavioral science, the course is designed for students in business and technical fields. Also suitable for general education and personal enrichment; not recommended for the student who plans to major in psychology. Includes group dynamics, leadership, ethics, motivation and morale, social systems, formal and informal organizations; and other selected topics. Three contact hours.

SOP 1502 Dynamics of Behavior (P) 3 cr.
Theory and practice in solving problems of interpersonal relations and self-development through group and individual experiences. Three contact hours.

SPC 1010 Fundamentals of Speech (P) 3 cr.
The first course in speech is designed to give each student the opportunity to study and to practice the principles and methods of oral communication while the student participates as a speaker and as a listener. Three contact hours.

SPC 2420 Discussion (P) 3 cr.
Emphasis will be on the development of discussion skills in four areas: (1) the format of discussion; (2) the means of discussion; reasoning, evidence and cooperative idea development; (3) both leadership and participation conduct; (4) audience analysis and listening techniques. Three contact hours.

SPC 2511 Argumentation and Debate (P) 3 cr.
This course will emphasize the development of debate skills in four areas: (1) the format of debate, including a full brief and cases; (2) the means of argumentation: reasoning evidence and motive appeals; (3) audience analysis and listening techniques; (4) delivery skills. Three contact hours.

SPC 2594 Intercollegiate Debate (P) 1 cr.
Prerequisite: Consent of professor. Analysis of proposition of fact, policy and definition; library research methods; formal debate structure and participation in intercollegiate debate. Three contact hours.

SPN 1100 Beginning Spanish I (P) 3 cr.
A beginning course. The fundamentals of Spanish speech and grammar will be taught by integrating the basic communication skills of hearing and understanding, speaking, reading, and writing. Four contact hours: Three class hours; one laboratory hour.

SPN 1101 Beginning Spanish II (P) 3 cr.
Prerequisite: SPN 1100 or equivalent. A continuation of SPN 1100. Four contact hours: Three class hours; one laboratory hour.

SPN 2200 Intermediate Spanish I (P) 3 cr.
Prerequisite: SPN 1101. A thorough review of the principles of grammar will be integrated with compositions and conversations planned to develop a basic active vocabulary and facility in communicating in written and spoken Spanish. Readings in Spanish will be concerned with a survey of the history and culture of Spain and Hispanic America. Four contact hours: three class hours; one laboratory hour.

SPN 2201 Intermediate Spanish II (P) 3 cr.
Prerequisite: SPN 2200. A continuation of SPN 2200. Four contact hours: three class hours; one laboratory hour.

SSI 1110 Origins of American Society (P) 3 cr.
An examination of the mainsprings of the civilization of the United States. The course is designed to relate America's values, institutions, and ideals to both her domestic situation and to her leadership in the world through the historical approach. Emphasis is on the concept of culture, the genesis of American society, and primary institutions. Three contact hours.

SSI 1120 Origins of American Society (P) 3 cr.
A continuation of SSI 1110 with emphasis on American political institutions, American economic institutions, and America's leadership in the world. A study of the United States Constitution is included in this course. Three contact hours.

STA 1014 Elementary Statistics (P) 3 cr.
Prerequisite: MAC 1104, with a grade of C or better. This introductory course will include the following topics: probability, random variables and probability distributions, binomial distribution, normal distribution, statistical inference, lineal regression and correlation, variance and inference from small samples. The derivations of properties and the foundations and unity of concepts will be emphasized. Three contact hours.

STD 1150 Career Planning (P) 1 cr.
This course assumes that career choice is a continuous process involving the understanding of self and one's environment. The student will utilize decision making techniques to select a tentative career path which is compatible with the student's individual aptitudes, abilities, values, and attitudes. Self-assessment instruments as well as small group discussions may be used. One contact hour.

THE 1000 Introduction to Theatre (P) 3 cr.
An introductory course in the study of dramatic art as presented upon the stage. The course includes theatre organization, stage techniques, fundamental dramatics, and a survey of theatre architecture in Western Civilization. Three contact hours.

THE 2925 Drama Practicum (P) 1 cr.
Planning and execution of production functions; scene construction and painting, props, costuming, lighting and other full technical responsibilities. Three contact hours.

TRA 1010 Principles of Transportation (D) 3 cr.
An introduction to Transportation. A study of the characteristics, development, economic aspects, regulations, services, and problems relating to rail, motor, air, pipeline, and water transportation. Three contact hours.

TRA 1032 Transportation and Traffic Management I (D) 3 cr.
Developments leading to national legislation and federal regulation; division of territories, official descriptions, etc.; scope of authority of territorial associations; factors controlling traffic flows, basic governing classification rules, principles of freight rates and tariffs and elements of rate making, shipping documents and their application, outline of special freight services, and freight claims. Three contact hours.
TRA 1033 Carrier Liability and Claims (b) 3 cr.
Analysis of carrier’s liability for goods. Rights and liabilities of carriers, consignors, and consignees; claim procedures, claim prevention and government regulation. Three contact hours.

TRA 1100 Transportation and Traffic Management II (D) 3 cr.
Application of tariff circulars; construction and filing of tariffs (tariff compilation); freight rates and tariffs, special freight services, i.e., switching, terminal facilities, demurrage and storage, average agreement, reclassification and diversion, various transit privileges; embargoes, warehousing and distribution; and materials handling. Three contact hours.

TRA 1121 Rate Clerk (D) 3 cr.
Basic course of tariffs and rate structures. Included are descriptions of rate territories, how various freight is classified by each mode of transportation, and how to apply applicable tariffs. Course is designed to instruct new rate clerks in the order of lowest cost that will provide required shipping service. Also included are rules of tariffs, rate making procedures, and use of shipping documents. Three contact hours.

TRA 1230 Material Handling (D) 3 cr.
An introduction to the field of material handling, including an analysis of jobs and career opportunities, general description of qualifications for entry-level positions, shipping and receiving procedures, warehousing problems and inventory control. The course is designed to present the entire field of material handling, from the producer-manufacturer to the ultimate user-consumer. Three contact hours.

TRA 1420 Commercial Motor Transportation (D) 3 cr.
General introduction to commercial motor operations, highway and highway financing, equipment, types of operations, financing motor carriers, labor relations, terminal operation, claims, insurance, classification, rates, regulations of motor carriers, commission policy, integrity passenger operations, urban mass transit, and economics of commercial motor transportation. Three contact hours.

TRA 1905 Independent Study of Transportation (D) 3 cr.
This course is designed to introduce the student to the ever-broadening area of transportation literature and to cause the student to report the student’s findings after a careful study and research into an area of personal interest. Acceptable thesis procedures must be used. The course has no prerequisites.

TRA 2020 Economics of Transportation (D) 3 cr.
This course covers developments in the transportation industry; decisions of the courts and regulatory bodies, new technological developments, railroad management policies, adjustment of rates, public policy questions, and major problem regulation. Completion of this course partially covers requirements for certification by the American Society of Transportation and Traffic. Three contact hours.

TRA 2110 Transportation and Traffic Management III (D) 3 cr.
This course covers through routes and through rates, application of arbitraries and differentials, advanced routing in transit, import and export traffic, technical tariff and rate interpretation, advanced claim adjustments, and rate classification committee procedure. Three contact hours.

TRA 2120 Transportation and Traffic Management IV (D) 3 cr.
A general discussion of the construction and application of the Interstate Commerce Act and practice before the Interstate Commerce Commission. Four contact hours.

TRA 2300 Interstate Commerce Act I (D) 3 cr.
The history and development of transportation in the United States. Problems which led to the regulation of commerce through legislative action, underlying principles of the Act, interpretation and application of the Interstate Commerce Act. Three contact hours.

TRA 2310 Interstate Commerce Act II (D) 3 cr.
A continuation of Interstate Commerce Act I. This course provides an in-depth study of the Act, to include: Areas of jurisdiction, meanings and interpretations of the Act, methods used to enforce the Act, contracts and agreements among carriers-shippers, carriers, tariffs, liability, statute of limitations, rate classification, and regulations. Three contact hours.

TRA 2311 Interstate Commerce Law and Practice (D) 3 cr.
This course considers all aspects of interstate commerce law and practice. Topics include review of Interstate Commerce Act, general rules and practice, Interstate Commerce Commission, and Supreme Court cases. Three contact hours.

TRA 2312 Interstate Commerce Act III (D) 3 cr.
A continuation of Interstate Commerce Acts I & II. Topics include: formal and informal complaints, general conduct of hearings, developing facts of case, compulsory testimony, immunity of witnesses, briefs, oral arguments, and report of the commission. Three contact hours.

TRA 2313 Interstate Commerce Act IV (D) 3 cr.
Continuation of Interstate Commerce Act III. Topics include: review of previous material, measure of damages, statutory authority, evidence to prove damage, discrimination, and issuance and preparation of the student's personal application to take the Practitioner Examination. Three contact hours.

ZOO 1010C General Zoology (P) 4 cr.
The student will benefit by taking APB 1150 or BSC 1011C or High School Biology prior to enrolling in ZOO 1010C. This is a survey of the animal kingdom with emphasis on taxonomy, life cycles, evolution, organ systems, and phylogenetic relationships. A representative of each of the major groups will be discussed and investigated. Six contact hours: three class hours, three laboratory hours.

ZOO 2450 Ichthyology and Commercial Fishing (D) 4 cr.
Prerequisite: BSC 1011C. In addition, the student will benefit by taking OCB 2602C and OMT 2211 prior to enrolling in ZOO 2450. This is an introductory course in the taxonomy, systematics, anatomy, physiology, ethology and ecology of fishes with emphasis on the estuarine and marine fishes of northeastern Florida. It also includes (1) the methodology of the various types of commercial fishing, (2) the present status of U.S. fisheries, (3) world dependence on fishery resources (4) the effects of technology on fisheries and (5) the future of American fisheries. Six contact hours.

ZOO 2713C Comparative Anatomy (P) 4 cr.
Prerequisite: ZOO 1010C. A comprehensive survey of the anatomy of chordates with emphasis on the functional morphology of vertebrates. Students are required to dissect and study preserved specimens of lamprey, dogfish, yellow perch, mudpuppy, pigeon and cat. Six contact hours.
NON-COLLEGE CREDIT
GENERAL INFORMATION

ADMISSIONS

All persons registering at Florida Junior College at
Jacksonville must have a social security number and
will be required to present the social security card at
each registration. Persons not having a social security
number should contact the local Social Security Office
for an application to obtain a number.

An individual desiring to enroll in non-college credit
programs should contact the administrator of the cen-
ter or the campus offering the desired subject(s) and
may be admitted if the following eligibility require-
ments are met:

1. Be an adult—by Florida School Law, at
least 16 years of age.
2. Present Social Security card.
3. Furnish proof of age, if asked.
4. Complete the admission and registration
forms requested.

TRANSCRIPT

Upon request of the student, the college will provide
the student, or to a person or institution designated
by the student, an official transcript of the student’s
academic record. Transcript requests may be made in
person or in writing to the Campus Registrar’s office.
No transcript request will be accepted by telephone.

REQUESTS

NO TRANSCRIPT REQUEST WILL BE
PROCESSED UNTIL ALL
FINANCIAL OBLIGATIONS
TO THE COLLEGE ARE CLEAR

Students are advised to make requests approximately
two weeks before the transcript is needed.

SCHEDULE CHANGES

Schedule Changes, commonly known as Add-
Drop, will be allowed for five business days after the
registration date or five business days after the begin-
ing date of the class, whichever is later.

AWARDS FOR PROGRAM COURSE COMPLETION

Three types of certificates are awarded to students
in recognition of completion of program and/or
course competency requirements.

Certificate of Applied Science
The Certificate of Applied Science is awarded to stu-
dents who have enrolled in and satisfactorily com-
pleted the requirements for a one-year vocational
competency-based program of study in preparation
for employment. The area or areas of competencies
completed by the student are indicated on the
Certificate.

Certificate of Training
The Certificate of Training is awarded to students who
have enrolled in and satisfactorily completed compet-
encies in a vocational program of study of one
term (semester) or less in preparation for employment.
The program completed by the student is indicated on
the Certificate.

Certificate of Attendance
This is a general purpose type of certificate used to
verify the attendance of an individual in a course, sem-
in, or workshop-type activity. Attainments of an indi-
vidual in these instructional activities may be indicated
on the Certificates as prescribed by the requirements
of the activity.

Continuing Education Units (CEU)
Many courses award Continuing Education Units. The
CEU system provides for one unit to be awarded for every 10 clock hours of instruction. A record of courses taken and CEUs earned will be maintained by the College. A student may obtain a copy of the record or have a copy mailed to a person of the student’s choice by requesting such in writing in the Campus Registrar’s office.

REGISTRATION PERIODS

Non-college credit registration periods for any term shall begin and end on dates specified by the President. Non-college credit registration dates will vary by program category and campus and may be continuous throughout any term. The terms for non-college credit classes will be Fall, Winter, and Spring/Summer (I, II, III).

Fee waived for students enrolled in a high school course for credit, if student wishes to take the test for that particular course.

Test fees are to be paid at time of making application for the test.
FEES FOR CEREMONIES CONDUCTED FOR SPECIAL PROGRAMS

The President or official designee shall determine the items to be purchased by the College which will permit the conducting of ceremonies in accordance with established traditions for special programs, primarily in the Health Related Education area. The charge to the student shall not exceed the cost of the items purchased for each student.

WAIVER OF TUITION AND FEES

Individuals enrolled in the following courses and/or programs are eligible for waiver of tuition and fees:

Adult Basic Education (ABE) courses and programs. (Non-College Credit).

Individuals below high school level and 16 years of age or older who are enrolled in Adult Basic Education. The Provost or official designee shall certify eligibility for waiver on prescribed document, which may be the fee statement.

Community Preparedness (Non-College Credit).

Individual(s) and/or group(s) of persons enrolled in Community Emergency Preparation course(s). The Provost or official designee shall certify eligibility for waiver on prescribed document, which may be the fee statement.

Criminal Justice Education (Non-College Credit).

Individuals must be full time or active auxiliary members of area criminal justice agencies. The Provost or official designee shall certify eligibility for waiver on the prescribed document, which may be the fee statement.

Dental Assisting Seminar (Non-College Credit).

Individual(s) and/or group(s) of persons, who are dental assistants, dental hygienists, or dentists. The Provost or official designee shall certify eligibility for waiver on prescribed document, which may be the fee statement.

Professional Engineers Refresher Course (Non-College Credit).

Individuals and/or group(s) of persons who have applied to take the State Board Examination for Professional Engineers Registration. The individual shall certify that application has been made on prescribed document, which may be the fee statement.

Incarcerated Persons, Probationers and Parolees (Non-College Credit).

Individuals who are certified by the Duval County Sheriff, Nassau County Sheriff or official designee, as incarcerated person(s), probationer(s) or parolee(s). The Provost or official designee shall submit official certification with fee statement.

Fire Science and Prevention Courses and Emergency Medical Technology Courses (Non-College Credit).

Individuals must be full time or active auxiliary members of area fire or emergency medical service departments. The Provost or official designee shall certify eligibility for waiver on prescribed document, which may be the fee statement.

Power Squadron Courses (Non-College Credit).

Group(s) of persons who are involved in water and boating safety. The Provost or official designee shall certify eligibility for waiver on prescribed documents, which may be the fee statement, which may be done on a class size basis.

Programs for Severely Handicapped Persons (Non-College Credit).

Individuals who are enrolled in courses offered by telephone or television. The Provost or official designee shall certify eligibility for waiver on prescribed documents, which may be the fee statement.

Senior Adults (Non-College Credit).

Individuals who are 60 years of age or older are eligible for fee waivers when enrolling in courses offered by the Center for the Continuing Education of Senior Adults. The individual must present proof of age at time of registration, which may be a driver’s license or Jacksonville Transportation Authority pass. The individual will also certify age and eligibility on the prescribed document, which may be the fee statement. Residents of retirement and nursing homes (without regard to age) are eligible for a fee waiver in non-college credit courses offered in these facilities by the Center. The director of the retirement home or nursing home is to provide certification of residents who are eligible for waivers to the Provost or official designee.
FJC Diploma-Seeking Students in High School Credit Completion Program.

Individual(s), who are 18 years of age or older; persons, age 16 and 17 who have officially withdrawn from public or private high school at least six calendar months before desiring entry; or persons who are recommended in writing by the Superintendent of Schools or official designee or by the principal of a private high school. Official registration is required in High School Credit Completion Program to seek a diploma by course work and/or High School Credit by Examination. Official completion or registration will substantiate proof of eligibility for waiver.

SCHEDULE FOR PAYMENT OF FEES

In order for registration to be valid, fees must be paid in person, by the dates listed for the appropriate term.

Fees may be paid by cash, check (subject to being honored by the bank on which drawn), credit card account (currently Master Charge, VISA, or BankAmericard) or financial aid authorization. Only deferments of fees authorized by the District Board of Trustees under Board rule for deferred payment status will be honored.

Registration will be cancelled for any student who has not paid the fees in full by the date indicated.

High School Completion, Vocational and Non-Credit

First day of class student attends.

Seminars and Workshops

As published in announcement. Workshops or seminars, which require special arrangements, may provide no refund of fees, if participant cancels after the time specified in announcement.

FEE REFUNDS — NON-COLLEGE CREDIT COURSES

Requirements

Written application for refund must be received at the Campus Registrar's office at the full-time Campus by 5 p.m. of the College business day established in the Board approved academic calendar as Final Drop Day or as approved by the President.

The written application shall:

1. Contain the student's full name, social security number, student number (if assigned), the complete address to where the refund is to be mailed, the student's signature, and an indication of whether or not the address presented is a change of address.

2. Be accompanied with the valid fee receipt, and a copy of the validated receipt for the credit card account, if payment was made by credit card.

Amounts and Conditions of Refunds or Credit Memoranda

If a veteran's deferment is authorized and a student drops on or before the Final Drop Day, the veteran's deferment will be reduced by the fees for the class(es) dropped.

If a veteran's deferment is authorized and the College cancels the class(es) or the registration of a student is cancelled, the deferment will be reduced by the amount of the cancelled class(es) for a student.

No refund will be made until the check involved has cleared the listed bank. In the case of local banks, this period will be 15 days or less under normal circumstances.

Amounts due the College will be deducted before any check or credit memorandum to the credit card account is issued.

If the College cancels the class and the student is placed in another class, no refund is authorized.

If the College cancels the class or the student's registration, the College will initiate the refund without written application by the student.

Payment Dates

Refund checks or credit memoranda to credit card accounts will be made in accordance with the schedule established by the College.
Final Drop Day

The Final Drop Day will be as authorized by the President but no later than five business days after the date of the receipt of payment of fees by the student if after the first day of classes. No refund of fees will be made on classes for which the fee is $5.00 or less unless the college cancels the class.

Cancellation of Classes

If the College cancels a class at any time prior to its completion, the student’s enrollment in that class will be canceled and the student will be entitled to a 100 percent refund of fees paid for that class, less any indebtedness to the College. The College will notify the student, and the college will initiate the refund process.

Suspension, Termination or Cancellation of Enrollment

The College reserves the right to suspend, terminate, or retroactively cancel the enrollment of any student for any of the following reasons:

1. Disciplinary reasons.
2. Non-payment of course fees when payment is due, including non-payment resulting from dishonored checks.
NON-COLLEGE CREDIT STUDIES

OCCUPATIONAL EDUCATION

Non-college credit programs and courses offer a wide variety of preparatory and supplementary vocational training throughout the junior college district wherever the need exists and adequate facilities are located. Courses are taught in public school facilities during evening hours, in industrial plants, in commercial office buildings, on campuses and centers of Florida Junior College at Jacksonville, and other suitable locations. The length and frequency of meetings for courses differ and are determined by the type and objectives of the course.

The primary purposes of these programs and courses are (1) to provide individuals with necessary skills to make them employable, (2) to provide individuals with training needed to upgrade or broaden their present skills and enhance their occupational opportunities, and (3) to provide the business and industrial community with trained personnel.

In the area of occupational education, the College maintains close liaison with, and is assisted by, program advisory committees, professional, civic, and church organizations, governmental agencies, business and industry, and other groups in determining needs and providing occupational education for the community.

A High School Diploma or equivalent is not required for enrollment in occupational education courses/programs but is highly recommended.

OCCUPATIONAL PREPARATORY EDUCATION AND EVALUATED CEU COURSES GRADING SYSTEM

The grading system is designed to evaluate the performance of the student as fairly and equitably as possible.

Letter grades will be assigned for courses as follows:

- S — SATISFACTORY
- U — UNSATISFACTORY
- W — WITHDRAWAL
- SI — SATISFACTORY/INCOMPLETE

Once a final grade in a course has been reported to the Director of Records, District, it may only be changed as follows:

1. Upon recommendation of the instructor who assigned the grade, with approval of the program director or dean.

2. Upon recommendation by the director, and approved by the dean, when the instructor who assigned the grade is no longer a member of the faculty of Florida Junior College at Jacksonville.

Occupational Education courses, other than occupational preparatory education and evaluated CEU courses explained before, and all Adult and Continuing Education courses, except high school credit, receive no grade (NG).

DEVELOPMENTAL EDUCATION DOWNTOWN CAMPUS

The Developmental Education Department at the Downtown Campus offers various programs to non-college credit students. The goal of the department is to assist students who need additional help in the academic area to reach their educational goals. Students are advised into developmental education based on test scores and individual needs. Learning strategies in the program include:

1. Reading courses that may be taken for high school credit or self-enrichment are taught.

2. Instruction in the reading lab is individualized.

3. Students needing extra assistance may request tutoring.

4. Diagnostic and prescriptive teaching in the Individualized Manpower Training System (IMTS) in the areas of math, English, and reading allows for upgrading of basic skills.
Other services include:

1. Assistance in wise career decision-making and goal-setting through the Downtown Campus career center. Occupational Assessment and Information System (OASIS), is available to all students.

2. In-depth student evaluation is available through the Evaluation Resource Center (ERC).

ADULT AND CONTINUING EDUCATION

In the area of Adult and Continuing Education, the College cooperates with the public schools, community schools, health and welfare groups, civic and community clubs, business and industry, and other adult agencies to provide educational services.

Adults in the community have the opportunity to grow in basic knowledge, improve in home and community life, develop leadership and civic responsibilities, expand in knowledge in general education, and develop creativity in the fine arts.

Adult and Continuing Education Programs are offered where there is community need and interest. Florida Junior College at Jacksonville is offering Adult Education Programs and courses in more than 292 different locations throughout Duval County. Many programs, courses, and services are offered on a continuing basis. Short courses, in-service training programs, and courses of specific interest may be initiated by request from individuals and groups in the community, based upon resources available at time of request.

ADULT BASIC EDUCATION

The Adult Basic Education Program of Florida Junior College at Jacksonville is designed to provide basic instruction in the fundamental academic areas of reading, writing, computational skills, and consumer education for all adults of this community.

General instruction in the foregoing academic areas will develop basic learning skills for the adult which will facilitate the continuation of an education at the secondary level if desirable.

The over-all curriculum of the Adult Basic Education Program includes arithmetic, spelling, social studies, science, functional citizenship education, life skills, consumer economics, occupational knowledge, government and law, community resources, and health.

Student's performance in these general knowledge areas will be based upon achievement in the following skill areas: reading, writing, speaking, listening, problem-solving, computation, and interpersonal relations.

The Adult Basic Education Program provides supportive services for its students in the areas of guidance and counseling, testing, and specialized reading needs. Enrollment in Adult Basic Education classes is available to all adults who are 16 years of age or older.

Adult Basic Education classes are offered in Adult Centers which are located in schools, churches, and other available community facilities throughout Duval County.

ADULT HIGH SCHOOL COMPLETION ADMISSION REQUIREMENTS

Adults, 18 years of age or older, may choose to earn an adult high school diploma at the college by taking appropriate coursework. Persons aged 16 and 17 also may enroll in the adult high school completion program but must wait until a period of six calendar months has elapsed since the date of official withdrawal from public or private high school. Exceptions may be made when recommended in writing by the superintendent of schools or the superintendent's designee from the county of the student's residence or by the principal of a private high school.

Applicants to this program are required to present the following documentation:

1. Application for admission.
2. Copy of Social Security card.
3. Proof of high school withdrawal (for persons 16 or 17 years of age).
4. Proof of previous education. The following are acceptable for proof of previous education:
   a. High school transcript.
   b. Certification by student of completion below ninth grade level.
   c. Verification from previous high school or school board that transcript cannot be obtained.
   d. Waiver of (a) or (c) above by Student Appeals Committee.
5. International Applicant. Requirements for admission are:

a. Application for admission.

b. A certified English translation of the transcript from the last high school attended.

c. Proof of proficiency in the use of the English language. Students from countries other than English speaking must submit satisfactory scores on the TOEFL examination (Test of English as a Foreign Language). This test is available through the Educational Testing Service, Box 899, Princeton, New Jersey 08540.

No international applicant will be considered for admission until all information (items a through c) has been received. International students accepted for admission will be notified of their acceptance and will be provided with Form I-20A as required by the United States Department of Justice. International students must be enrolled as full-time students for the Fall and Winter Terms (I and II) and the Spring and/or Summer Terms (III and/or IV).

Students, 16 years of age or older, who are currently enrolled in a local public or private high school may upon permission from the high school principal or the principal’s designee pursue course work at Florida Junior College at Jacksonville for transfer back to the high school from which the student expects to receive a diploma. Upon completion of the course work, it is the student’s responsibility to request that a transcript be sent to the graduating high school.

Applicants to this program are required to present the following documentation:

1. Application for admission.

2. Copy of Social Security card.

3. Permission note from high school principal or the principal’s designee indicating exact subjects to be taken.

ADULT HIGH SCHOOL GRADING SYSTEM

The grading system is designed to evaluate the performance of the student as fairly and equitably as possible.

Letter grades will be assigned for courses as follows:

A — EXCELLENT
B — GOOD
C — AVERAGE
D — POOR
I — INCOMPLETE
NP — NONPUNITIVE
S — SATISFACTORY — (Course not completed-No Credit)
U — UNSATISFACTORY
W — WITHDRAWAL
Z — A vs C EXPOSURE (30 hours minimum)

Students registered in high school classes but not earning high school credit will receive a grade of NG (no grade).

Once a final grade in a course has been reported to the Director of Records, District, it may only be changed as follows:

1. Upon recommendation of the instructor who assigned the grade, with approval of the division chairperson or director.

2. Upon recommendation by the director, and approved by the dean, when the instructor who assigned the grade is no longer a member of the faculty.

ADULT HIGH SCHOOL COMPLETION REQUIREMENTS

There is no set required amount of time necessary to earn an Adult High School Diploma. The Florida State Department of Education has established that an adult can progress at the adult’s own rate of speed and achieve credit by subject examination whenever the student judges that he or she is prepared. Thus, an adult may complete credit requirements as rapidly as the adult is able to prove his or her knowledge and skills.

A minimum of 16 credits, grades nine through 12, excluding credit in physical education, shall be required for an Adult High School Diploma. Two of these credits must be earned at Florida Junior College at Jacksonville. Nine of these 16 credits must be earned in the following areas:

1. English (2 credits)
   One credit in English grammar required. Except where proficiency can be determined by the counselor, the student will be advised strongly to take a composition course as the second English credit.

2. Mathematics (2 credits)

3. Natural Science (2 credits)
NON-COLLEGE CREDIT STUDIES

4. Civics (1 credit)
5. American History (1 credit)
6. Reading Techniques (1 credit)

The additional seven credits may be earned in other areas as approved by the counselor subject to the following:

1. A course in Americanism vs. Communism is required for graduation. This requirement may be met by taking a one-half credit course or a non-college credit course of 30 clock hours.
2. A maximum of two work experience credits may be earned at 1,000 hours per credit. Each credit awarded must be based on a compilation of hours from a single place of employment.

All students are required to obtain a passing score on the State's eleventh grade literacy test to be eligible for the Adult High School Diploma from Florida Junior College at Jacksonville.

It is the high school student's responsibility to make application for graduation after the student has completed requirements for a high school diploma.

CENTER FOR THE CONTINUING EDUCATION OF SENIOR ADULTS

The College provides a wide variety of educational experiences for the older citizen as a part of its Continuing Education Program. The Center for the Continuing Education of Senior Adults offers classes in retirement homes, nursing homes, and community centers where an interest and need is shown. Each class is tailored specifically for those participating.

INDEPENDENT LIVING FOR ADULT BLIND (ILAB)

ILAB is an instructional program designed to increase the self-reliance of blind and deaf-blind adults and help them to achieve greater independence. Instruction is offered, on a year-round basis, in Communication Skills, including Braille and typing; Daily Living Skills; Mobility; and leisure time activities. Comprehensive social services and a full range of volunteer services are available.

CENTER FOR THE CONTINUING EDUCATION OF WOMEN

The Center for the Continuing Education of Women is located at the Downtown Campus, 101 West State Street, Room 3106. Personal, educational, and career counseling services are available to Florida Junior College at Jacksonville students and members of the community at no charge. Class offerings include Assertive Training, Career Development, How to Succeed in College, Opening Doors for Women, Supervisory Training, and others. The Center also offers special programming — short courses, workshops...
and seminars — to community organizations. Special programs have been designed for community business and professional women (twice monthly, Women’s Information Exchange luncheons), for women in industrial training programs, single mothers, and women starting their own business. Call 633-8311 for additional information.

CHALLENGE: NEW CAREERS FOR WOMEN is a three-week training program for women who have never worked, have not worked for a long period of time, or who are having difficulty securing an adequate job. Although the primary target area of Challenge is the displaced homemaker, any CETA eligible woman can be served. Beginning each month, Challenge classes are held for three weeks, five hours a day, five days a week. Child care is provided, and a travel allowance. The Challenge curriculum consists of self-assessment, assertion training, vocational testing, career exploration and decision making, and job seeking and job keeping skills. Financial aid counseling is provided for students who desire to get a GED diploma, begin junior college, or enroll in vocational training.

NURSING CONTINUING EDUCATION

A Continuing Education program is planned to meet the needs of nurses in updating knowledge and skills essential in professional practice. Continuing education courses are designed to enhance nursing practice and to help ensure the public safe and high quality nursing care.

Nursing practice is based on a continuously expanding body of knowledge and skills which prepares nurses to function effectively as members of the health care team.

Reassessment and ongoing evaluation will be done to determine the need for expanding this Continuing Education Program and offering additional relevant courses.

Nursing Continuing Education non-college credit courses which may be offered are:
- NUR 0510 Seminar for Licensed Practical Nurses
- NUR 0512 Nursing Seminar
- NUR 0515 In-Service Training for Nursing Faculty

COMMUNITY SERVICES

Through its program of community services, the College offers programs of study, institutes, short courses, seminars, workshops, clinics, and lectures to meet the educational and avocational needs of adult groups in the community.

Requests for such courses are encouraged. Consideration for such courses is based upon the level of instruction, the number of persons interested, and the availability of resources and qualified instructional personnel at the time of request.

Adults desiring to enter adult classes or programs should apply in person at the adult center or campus offering the subjects of their choice.

Any person, 16 years of age or older, is eligible to apply for enrollment. Specific course requirements or limitations will be explained at the center of the individual’s choice.

NON-COLLEGE CREDIT

COURSE DESCRIPTIONS

All courses in the following list are not taught each term. Class schedules are published prior to each term that show the courses that will be offered.

OCCUPATIONAL EDUCATION COURSES

AAC 0030 Income Tax Accounting for Business
The material taught in this course is based on the Internal Revenue Code. Persons in the tax accounting field who prepare returns for private individuals, merchants, and other businessmen are taught to prepare and keep suitable records for income tax purposes. They are taught to prepare their income tax returns according to legal interpretations.

AAC 0110 Basic Bookkeeping
This course is designed as supplementary instruction for persons already employed in a related field. It includes principles and techniques involved in bookkeeping for a business office.

AAC 0120 Basic Accounting
A course designed as supplementary training to persons employed in related fields to acquaint the student with the complete bookkeeping cycle. Includes journalizing, posting financial statements, adjusting and closing books. Emphasis is given to inventory methods, special journals, control accounts, depreciation, and payroll methods.

AAC 0125 Basic Accounting II
A continuation of basic accounting principles. (AAC 0120). Includes special journals and accounting for special business transactions, notes, accruals, partnerships, corporations, and the use of data processing in accounting.

AAC 0130 Basic Bookkeeping I High School Cr. ½
A course designed to provide meaningful business problems at the beginner level, to equip students with basic vocational skills, to provide the students with an understanding of business forms and to help them develop proper work habits and attitudes. Units included will cover basic skills for record keeping, cashiers, banking, petty cash, and record keeping for retail sales clerks, students and families.

AAC 0132 Basic Bookkeeping II High School Cr. ½
Prerequisite: AAC 0130. A course designed to provide meaningful business problems at the beginner level, to equip students with basic vocational skills, to provide the students with an understanding of business forms and to help them develop proper work habits and attitudes. Units included will cover record keeping for a purchasing department, a wholesale sales department, a payroll department, and for a small retail business.

AAC 0140 Basic Accounting I High School Cr. ½
A course designed to acquaint the student with the accounting cycle with emphasis on journalizing and posting, the worksheet, financial statements, adjusting and closing procedures, and the use of special journals and subsidiary ledgers. The completion of a practice set is required.

AAC 0142 Basic Accounting II High School Cr. ½
Prerequisite: AAC 0140. A further study of the accounting cycle with emphasis placed on payroll systems, automated data processing, special journals, petty cash, fixed assets and depreciation, notes and interest, and partnerships and corporations. The completion of two practice sets is required.

AAC 0144 Advanced Accounting I High School Cr. ½
Prerequisite: AAC 0142. An advanced study of accounting principles with emphasis placed on a review of the recording, summarizing, and reporting phases of accounting, departmental and payroll accounting, bad debts, depreciation and depletion of fixed assets, and prepaid and accrued expenses, partnerships; and voucher, inventory control, and budgetary control systems. The completion of a practice set is required.

AAC 0146 Advanced Accounting II High School Cr. ½
Prerequisite: AAC 0144. A continuation of Advanced Accounting I with coverage of the following topics: taxes, notes, and drafts; corporations; automated systems; cost accounting; and management use of accounting data. The completion of two practice sets is required.

ABF 0109 Auto Body Repair I
This course is designed specifically for job entry training in the repair and replacement of damaged automobile body parts, including the removal of dents, glass installation, body painting and refinishing, and upholstery.

ABF 0110 Auto Body Repair II Continuation of ABF 0109.

ABF 0111 Auto Body Repair III Continuation of ABF 0110.

ABF 0112 Auto Body Repair
This course is designed for persons already employed in the field or in a related field, for supplementary instruction. The student will learn the proper procedure in the repair and replacement of damaged automobile body parts, including the removal of dents, glass installation, body painting and refinishing, and upholstery.

ABF 0190 EMP Auto Body Repair
This course is designed to meet the needs of employers and underemployed employees in the auto body repair industry.

AIC 0003 Air Conditioning, Refrigeration, and Heating
To acquaint the student with the installation and service of air conditioning systems. Computation of heat gain and loss, diagnosis and correction of problems, reading of blueprints, diagrams, and schematics are included. Expendable materials supplied by student. This course is designed primarily for off-campus supplementary instruction.

AIC 0309 Air Conditioning, Refrigeration and Heating I
This course is designed specifically for job entry training and provides instruction to the student in the proper procedure for installing and servicing commercial and residential air conditioning systems to compute heat gain and heat loss on buildings for summer and winter air conditioning, to diagnose and repair problems with commercial refrigeration systems of both medium and low temperature, and to read blueprints, plans, electrical diagrams and schematics necessary to perform the aforementioned tasks.
AIC 0310  Air Conditioning, Refrigeration and Heating II
Continuation of AIC 0309.

AIC 0311  Air Conditioning, Refrigeration and Heating III
Continuation of AIC 0310.

AIC 0312  Air Conditioning, Refrigeration and Heating
This course is designed for persons already employed in the field or in a related field for supplementary instruction. The student will learn the proper procedures to install and service commercial and residential air conditioning systems, to compute heat gain and heat loss on buildings for summer and winter air conditioning, to diagnose and repair problems with commercial refrigeration systems of both medium and low temperature, and to read blueprints, plans, electrical diagrams and schematics necessary to perform the aforementioned tasks.

AIC 0315  Air Conditioning, Refrigeration and Heating
This course is designed primarily for apprenticeship instruction and its contents will include the proper procedure to install and service commercial and residential air conditioning systems, to compute heat gain and heat loss of buildings for summer and winter air conditioning, to diagnose and repair problems with commercial refrigeration systems of both medium and low temperature, and to read blueprints, plans, electrical diagrams and schematics necessary to perform the aforementioned tasks.

AIC 0390  EMP Air Conditioning, Refrigeration and Heating
The course is designed to meet the needs of industry employers and underemployed employees in the air conditioning, refrigeration and heating industry.

AIO 0010  Aviation Ground School — Private Pilot
This course is designed as supplementary training to prepare students for the FAA Private Pilot’s Written Examination.

AIO 0012  Commercial Pilot, Ground School
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction in preparation for the FAA Commercial Pilot’s Written Examination.

AIO 0014  Aviation Ground School — Instrument Rating
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction in preparation for the FAA Instrument Rating Written Examination.

APC 0011  Business English
A study of the business letter, discrimination in the use of words, spelling, review of grammar, punctuation and development of language power. This course is designed for persons already employed in a related field for supplementary instruction.

APC 0012  Business English  High School Cr. 1
A study of the business letter, discrimination in the use of words, spelling, review of grammar, punctuation and development of language power. This course is designed for persons already employed in a related field for supplementary instruction.

APC 0014  Business English I  High School Cr. ½
An extensive review of grammar, punctuation, spelling, and vocabulary. Also covers listening and reading skills and shows the student how to use various reference books.

APC 0016  Business English II  High School Cr. ½
Prerequisite: APC 0014. Comprehensive training in the writing of various types of business communications—letters, memos, and reports. Emphasis is placed on writing with an understanding of human behavior as well as a firm grasp of mechanical principles.

APC 0221  Water & Sewage Plant—Related Communications
Training in communications in preparation for the Water & Sewage Plant Operator's License Examination. For persons already employed in the field.

APM 0011  Business Mathematics
The course develops the arithmetical skills necessary for effective bookkeeping and merchandising transactions. Provides extensive practice in solving business problems including percentages, simple interest, and payroll for persons already employed in the field, or in a related field, for supplementary instruction.

APM 0221  Water & Sewage Plant Operation—Math
Training in mathematics in preparation for Water & Sewage Plant Operator's License Examination for persons already employed in the field, or in a related field, for supplementary instruction.

APM 0231  Tool and Die Math
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The student will learn applied mathematics necessary for precise machine shop work.

APS 0222  Water & Sewage Plant—Related Chemistry
This course covers an introduction to the principles of modern inorganic chemistry including topics in structure of matter, gas laws, theory acids and solution and suspension, carbon and compounds for persons already employed in the field.

APS 0224  Water & Sewage Plant—Related Chemistry
This course is designed for apprenticeship training and covers an introduction to the principles of modern inorganic chemistry including topics in structure of matter, gas laws, theory acids and solution and suspension, carbon and compounds.

ARR 0308  Major Appliance Repair I
This course is designed specifically for job entry training, and includes instruction in trade mathematics, basic electricity, soldering, brazing, and use of shop tools and equipment. A general overall course will be taught in this field in keeping with the requirements of industry.

ARR 0309  Major Appliance Repair II
Continuation of ARR 0308.

ARR 0310  Major Appliance Repair III
Continuation of ARR 0309.

ARR 0311  Major Appliance Repair
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The student will be instructed in trade mathematics, basic electricity, soldering, brazing, and use of shop tools and equipment. A general overall course will be taught in this field similar to the requirements of industry.

ARR 0390  EMP Electric Appliance Repair
This course is designed to meet the needs of employers and underemployed employees in the electric appliance repair industry.

AUE 0010  Automobile Sales
This course is designed as supplementary training for individuals employed in the field as automobile salesmen. The course includes sales techniques, prospecting, qualifying, insurance coverage, auto financing, closing sales and owner follow-up.

AUM 0003  Automotive Mechanics
This course consists of supplementary instruction in the repair of passenger automobiles and light delivery trucks, and includes engines, transmissions, clutches, carburetors, ignition systems, chassis, brakes, and power operated equipment.
AUM 0110 Emission Control Mechanic
This four-hour seminar for persons already employed in the field deals with the control of automobile pollutants. It includes a study of the internal combustion engine, its polluting factors, and control techniques for carbon monoxide, nitrogen oxide, and hydro carbon emissions from automobile engines.

AUM 0309 Automotive Mechanic I
This course is designed specifically for job entry training in the repair of passenger automobiles and light delivery trucks, including engines, transmissions, clutches, carburetors, ignition systems, chassis, bodies, and power operated equipment.

AUM 0310 Automotive Mechanic II
Continuation of AUM 0309.

AUM 0311 Automotive Mechanic III
Continuation of AUM 0310.

AUM 0312 Automotive Mechanic
This course is designed for persons already employed in the field or in a related field for supplementary instruction. The student will be instructed in the repair of passenger automobiles and light delivery trucks, including engines, transmissions, clutches, carburetors, ignition systems, chassis, bodies, and power operated equipment.

AUM 0390 EMP Automotive Mechanics
The course is designed to meet the needs of employers and under-employed employees in the automotive mechanics industry.

AUM 0395 EMP Automotive Machine Shop
The course is designed to meet the needs of employers and under-employed employees in the automotive machine shop industry.

BCN 0315 Laborer's Apprenticeship Training
Training in skills required by a laborer in the construction industry, including: safety and first aid, hand tools, handling construction materials, soil preparation, pipe laying, gasoline and electric powered equipment, concrete preparation and handling, concrete chipping and cutting, sandblasting, oxy-acetylene cutting, carpentry labor and other skills prescribed by apprenticeship standards. Enrollment limited to apprentices in Construction Laborer's Apprenticeship Training Program. Program lasts four years, meets two nights a week from 7 to 10 pm.

BOP 0010 Key punch
A skill course designed for persons already employed in a related field to develop a salable competency in IBM 024, 029, and 129 key punch machines. Mohawk tape encoder may be included. Includes making program cards and operating IBM 082 sorter. Prerequisite is a typing speed of 35 words per minute or better.

BOP 0011 Key punch
High School Cr. 1/2
A skill course designed to develop a salable competency in IBM 024, 029, and 129 key punch machines. Mohawk tape encoder may be included. Includes making program cards and operating the IBM 082 sorter. Prerequisite is a typing speed of 35 words per minute or better.

BOP 0070 Introductory Computer Concepts
An introduction to the field of data processing to include the history of computers, the study of processing systems, computer hardware, and an introduction to programming systems. This course is intended for students, with no prior experience in data processing, who can benefit from this supplementary instruction. Three class hours, one laboratory hour.

BOP 0075 Mini-Micro Computing Systems
This course is designed as supplementary instruction for persons employed in a related area. It is a survey of microcomputer applications, architectures, and availability, including the process of evaluating, ordering, and assembling kits and basic machine language programming. This course is for those interested in building their own computer systems. Desirable background includes strong foundations in high school mathematics, fundamentals of electricity and electronics, and/or basic concepts in data processing.

BLR 0312 Blueprint Reading
This course is designed as supplementary instruction for persons already employed in the field. The student will learn the proper procedure in the reading and interpretation of blueprints and architectural drawings, and from such designs computes labor, material, and equipment costs for construction work.

BLR 0314 Tool and Die Blueprint Reading
This course is designed for persons already employed in the field or in a related field, to supplement their training in the reading and interpretation of blueprints used in precision machine shop work.

BLR 0390 EMP Blueprint Reading
The course is designed to meet the needs of the employers and under-employed employees in the blueprint reading field.

CAP 0309 Carpentry I
This course is designed specifically for job entry training in general carpentry work involved in erection of wooden building frames, installation of exterior and interior trim, floor-laying, form building, scaffold construction, stair-building, and other similar types of woodwork.

CAP 0310 Carpentry II
Continuation of CAP 0309.

CAP 0311 Carpentry III
Continuation of CAP 0310.

CAP 0312 Carpentry
This course is designed as supplementary instruction for persons already employed in the field. The student will receive proper instruction in general carpentry work involved in erection of wooden building frames, installation of exterior and interior trim, floor-laying, form building, scaffold construction, stair-building, and other similar types of woodwork.

CAP 0315 Carpenter
This course is designed primarily for apprenticeship instruction and its contents will include training in general carpentry work involved in erection of wooden building frames, installation of exterior and interior trim, floor-laying, form building, scaffold construction, stair-building, and other similar types of woodwork.

CAP 0390 EMP Cabinetmaking & Millwork
The course is designed to meet the needs of employers and under-employed employees in the cabinetmaking and millwork industry.

CAP 0395 EMP Carpentry
The course is designed to meet the needs of employers and under-employed employees in the carpentry industry.

CED 0010 Consumer Buying
This course, designed as supplementary instruction, includes a study of the economic position of the individual consumer and the family, agencies and organizations designed to render assistance with buying problems, grading and standardization of food materials, fabrics, clothing and household equipment, informative labeling and legislation affecting family buying.

CEG 0110 Operating Engineering
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will be trained in the maintenance and operation of selected power construction equipment ranging from air compressors to steam shovels.

CEG 0115 Operating Engineering
This course is designed primarily for apprenticeship instruction. Its contents will include proper procedure in the maintenance and operation of selected power construction equipment ranging from air compressors to steam shovels.
CFI 0110 Commercial Fishing
This course is designed as supplementary instruction for persons already employed in the field. The student will learn the proper procedure necessary in the construction and repair of commercial cast nets, drop net and seine and their usage.

CGC 0010 Child Growth & Development
A study of the child from prenatal through pre-school age with emphasis on physical, social, emotional and mental development. Cultural and environmental influences on the child will also be incorporated into this course which is designed as supplementary instruction for persons already employed in the field or in a related field.

CGC 0011 Child Growth & Development High School Cr. 1
A study of the child from prenatal through pre-school age with emphasis on physical, social, emotional and mental development. Cultural and environmental influences on the child will also be incorporated into this course.

CHA 0001 Drug Prevention and Treatment Counseling Training Seminar
Specifically prepared course for drug prevention and abuse counselors and other personnel to upgrade their professional skills. Topics include: current perspectives in drug abuse, human relations skills, and drug treatment methods.

CHD 0100 Child Development Associate Preparation Course
This course is designed as supplementary instruction and is a competency-based, individualized, and predominantly on-the-job training course designed to provide the student with the means of acquiring competencies needed to become a child development associate.

CLT 0010 Textiles
A consumer oriented approach to textiles for apparel and home furnishings with emphasis on currently used fibers, fabric construction, finishes, and maintenance. This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The content includes selection of patterns and fabrics that are compatible and selection of proper linings, underlinings, and interfacings. Fabric swatches will be available for handling and testing.

CLT 0110 Sewing for Children
This course is designed as supplementary instruction for persons already employed in the field, or in a related field, to provide opportunities for the acquisition of knowledge of fibers, special finishes and fabrics suitable for infants' and children's wear. Instructiional activities include pattern selection and alteration, fabric selection, and construction of clothing for children, age six months through pre-teen. Special emphasis is also placed on the renovation of children's garments.

CLT 0111 Sewing for Selling
This course is designed as supplementary instruction for the individual or group wanting to develop skills in making articles for selling in gift shops or on consignment, at church bazaars, self-selling or to use for gifts.

CLT 0113 Creative Needlecraft
This course is designed for students who are already employed in the field, or in a related field, and who wish to become proficient in one or more of the following needle crafts: crewel embroidery, crocheting, knitting, needlepoint, and quilting, following instructions concerning materials, equipment, designs, and techniques. Students work toward mastering the skills involved by doing individual projects.

CLT 0311 Basic Clothing Construction
This course is designed for the person who has had little or no experience in recently developed techniques in clothing construction and includes a study of pattern selection including body measurements and simple alterations, fabric selection and preparation with emphasis placed on "easy-to-sew" patterns and fabrics, selection, use, and care of modern sewing and pressing equipment, completion of a simple garment, and selection of suitable accessories.

CLT 0312 Basic Clothing Construction
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will learn the proper procedure involved in developing techniques in clothing construction and the course includes a study of pattern selection including body measurements and simple alterations, fabric selection and preparation with emphasis placed on "easy-to-sew" patterns and fabrics, selection, use, and care of modern sewing and pressing equipment, completion of a simple garment, and selection of suitable accessories.

CLT 0313 Advanced Clothing Construction
This course is designed as supplementary instruction for the person who has completed Basic Clothing Construction. It includes developing the ability to make more complicated patterns, use of more complicated patterns, and use of fabrics requiring special treatments and completion of at least one garment using more advanced techniques and details which give individuality to the garment that will be required.

CLT 0314 Advanced Clothing Construction
This course is designed for the person who has completed Basic Clothing Construction. It includes developing the ability to make more difficult pattern alterations, use of more complicated patterns, use and care of fabrics requiring special treatments and completion of at least one garment using more advanced techniques and details which give individuality to the garment that will be required.

CLT 0315 Basic Sewing
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. Instruction includes: consumer education; use and care of the sewing machine; selection and use of hand sewing and cutting equipment; selecting and preparing fabric for use in projects to be made; making projects including basic sewing techniques; use and care of presssing equipment; selecting and using easy-to-sew patterns; making a garment using sewing techniques; simple clothing alterations; discussion of basic wardrobe requirements; good grooming and personal appearance.

CLT 0316 Advanced Sewing
This course is designed as supplementary instruction for persons already employed in the field and interested in continuing to use basic sewing techniques and learning additional details in making and altering clothes. It includes use of more difficult patterns; individualizing accessories; alteration of ready made clothes; re-styling garments, psychological effect of clothing; dressing for the occasion; foundation garments, care of clothes; redesigning one's wardrobe; and consumer education as related to clothing.

CLT 0317 Couture Sewing
This course is designed as supplementary instruction for students who have acquired superior sewing skills and are interested in making couture type garments. Included in the course is an in-depth study of couture methods of grain perfect garments, construction, fit and finishing techniques.
CLT 0319   Couture Sewing   High School Cr. 1
This course is designed for students who have acquired superior sewing skills and are interested in making couture type garments. Included in the course is an in-depth study of couture methods of grain perfect garments, construction, fit and finishing techniques.

CMP 0506   Intermediate Clothing Construction   High School Cr. 1
This course is designed for the person who has completed Basic Clothing Construction, and includes a study of more difficult construction techniques and of fabrics more difficult to handle than were used in Basic Clothing Construction.

CMP 0507   Basic Tailoring   High School Cr. 1
This course is designed for the person who has demonstrated proficiency in the skills of clothing construction and includes selection, use and care of fabrics suitable for tailoring techniques. The construction of a lined garment, such as a jacket, will be required.

CMP 0508   Men's Clothing Construction   High School Cr. 1
This course is designed for the person who has demonstrated proficiency in the skills of clothing construction and would like to learn skills in making men's clothing. Included will be how to select and use a commercial pattern with appropriate alterations, if needed. The techniques for making polyester pants, men's shirts and ties will be demonstrated and the construction of these men's garments will be required. Industrial sewing will be utilized.

CMP 0509   Alterations   High School Cr. 1
This course prepares the worker to alter and repair ready-to-wear garments for customers or retail shops or in their own homes as a private business. It involves an understanding of fabric handling, clothing construction, pressing, and training in fitting techniques. The approach of the course is based on the assumption that a successful alterationist must have a thorough understanding of garment construction in order to complete the necessary fitting changes.
C0A 0110  Commercial Art
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction in commercial and advertising art. Special consideration is given to theories of layout, lettering, correlative ideas, drawing and composition, use of color, materials, methods and techniques, and work attitudes.

C0R 0418  Basic Training for Correctional Officers
The basic training for correctional officers is designed specifically for job entry training to give each student a basic understanding of the duties and responsibilities of the line correctional officer. In addition, it is designed to give the student an overview of the other related fields within the criminal justice system. Specific areas in which the student will receive instruction include operational procedures, legal aspects of corrections, supervisory practices and related technical skills. NOTE: Course is restricted to individuals sponsored with intent of employment by area law enforcement agencies.

C0R 0425  Specialized Corrections Training
This course is designed to provide specialized instruction in a given area corrections personnel. Specific areas of instruction include numerous highly specialized subjects such as cause, effect and treatment of alcoholism; institutional crisis intervention; hostage negotiation; inmate classification; civil and legal rights of the confined; and correctional treatment techniques.

C0R 0426  In-Service Corrections Training
This course is designed to provide supplementary in-service instruction in the area of corrections personnel. Specific areas of instruction include numerous subjects such as institutional and non-secure procedures; mechanics of search; fingerprinting; contraband control; discipline; interdepartmental communications; counseling and guidance; offender treatment; medical, social and volunteer services; records and report writing; first aid; and firearms.

C0Y 0309  Cosmetology I
This course is designed specifically for job entry training in all of the services available including hair cutting, shampooing, tinting and styling; manicuring and pedicuring; scalp treatment and facial makeup and massage. Training prepares the pupil for the Florida State Board of Cosmetology examination for cosmetologists. Students are required to furnish their own kits, uniforms, and books.

C0Y 0310  Cosmetology II
Continuation of C0Y 0309.

C0Y 0311  Cosmetology III
Continuation of C0Y 0310.

D0A 0912  Dental Assisting Seminar
This seminar is designed as supplementary instruction to upgrade skills of dental assistants and dental hygienists.

D0H 0912  Post-Grad Dental Hygiene Clinic
This course is taught in a clinical situation with student/patient contact, to upgrade skills of dental hygienists and dental assistants.

D0M 0313  Truck & Diesel Mechanics I
This course is designed specifically for job entry training in theory, diagnosis, maintenance, and repair of light and medium duty trucks and fork lift equipment.

D0M 0314  Truck & Diesel Mechanics II
Continuation of D0M 0313.

D0M 0315  Truck & Diesel Mechanics III
Continuation of D0M 0314.

D0M 0390  EMP Diesel Mechanics
This course is designed to meet the needs of employers and under-employed employees in the diesel mechanics industry.
**DIM 0395**  EMP Truck Mechanics
This course is designed to meet the needs of employers and under-employed employees in the truck mechanics industry.

**DTG 0309**  Drafting I
This course is designed specifically for job entry training in the preparation of clear, complete and accurate working plans and detail drawings from rough or detailed sketches or notes for engineering or manufacturing purposes according to specified dimensions.

**DTG 0310**  Drafting II
Continuation of DTG 0309.

**DTG 0311**  Drafting III
Continuation of DTG 0310.

**DTG 0312**  Drafting
This course is designed as supplementary instruction for persons already employed in the field or in a related field. The student will learn proper procedure in the preparation of clear, complete and accurate working plans and detail drawings from rough or detailed sketches or notes for engineering or manufacturing purposes according to specified dimensions.

**DTG 0390**  EMP Drafting
This course is designed to meet the needs of employers and under-employed employees in the drafting industry.

**ELS 0112**  Basic Electronics
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will learn the proper procedure in the installation, maintenance, and repair of electronically controlled and operated distribution systems used in industry and commercial businesses.

**ELS 0117**  Radio Communications
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will receive training in the receiving and sending of messages by radio, radiotelephone, radiotelegraph, and other electronic transmission equipment.

**ELS 0119**  Radio Operators Training Course
This course is designed as supplementary instruction in radio operating procedures and FCC regulations as they apply to amateur radio operators. Training in the International Morse Code, and Basic Electronic Theory is included. The student will have the opportunity to take the Novice Class Radio Operators license test upon completion of this course. Tests are supplied by the Federal Communications Commission (FCC) and only those passing this exam will receive their operators license.

**ELS 0120**  Examination Preparation: Radiotelephone Operators License
A 64-hour review of material for the Federal Communications Commission Commercial Radiotelephone Operators Licenses including communications laws, operating procedures, basic and advanced electronic theory and examination procedures.

**ELS 0309**  Industrial Electronics I
This course is designed to prepare a person for full-time employment in the industrial electronics field. Included in the course are theory, troubleshooting, testing, and safety precautions.

**ELS 0310**  Industrial Electronics II
Continuation of ELS 0309.

**ELS 0311**  Industrial Electronics III
Continuation of ELS 0310.

**ELS 0312**  Industrial Electronics
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. Instruction will include theory, troubleshooting, testing, and safety precautions.

**ELS 0313**  Marine Electricity I
This course is designed to prepare a person for job entry and full-time employment in marine electricity; it includes theory, troubleshooting, testing, safety precautions, and good work habits.

**ELS 0314**  Marine Electricity II
Continuation of ELS 0313.

**ELS 0315**  Marine Electricity III
Continuation of ELS 0314.

**ELS 0316**  Marine Electricity
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The instruction will include theory, troubleshooting, testing, safety precautions, and good work habits.

**ELS 0390**  EMP Marine/Industrial Electricity
This course is designed to meet the needs of employers and under-employed employees in the marine/industrial electricity field.

**ELS 0395**  EMP Industrial Electronics
This course is designed to meet the needs of employers and under-employed employees in the industrial electronics industry.

**ELS 0410**  Examination Preparation; Certified Electronics Technician
This course is designed to prepare students for the National Organization of Certified Electronic Technician's Examination covering television signals, transmission lines, electronic components, solid state electronics, A/C theory, and television/radio construction. The Certified Electronics Technician exam will be administered at the final class meeting and is industry-approved.

**EME 0010**  Basic Emergency Care
This is an approved Department of Transportation course for persons already employed in the field, and not interested in college credit. This course can be used for re-certification as an E.M.T.

**EME 0011**  Basic Review Emergency Care
This is a 20-hour refresher course for those already employed in the field who need a review for three-year re-certification by the Division of Health.

**EME 0012**  Advanced (Rescue) Emergency Care
This course is designed as supplementary instruction and includes a review of life saving procedures, intravenous fluid therapy and use of various equipment, such as defibrillators and synchronizers.

**EME 0014**  Emergency Medical Technology Seminar
This seminar is designed as supplementary instruction to upgrade the skills of the working emergency medical technician.

**EME 0016**  Emergency Nursing Internship
This inter-disciplinary course is the latest concept in the intervention of trauma. It prepares Allied Health professionals to work together in an emergency situation as a highly coordinated team.

**EME 0018**  Basic Life Support
This course is designed as supplementary instruction to provide a periodic update on cardio-pulmonary resuscitation.

**EME 0020**  Basic Life Support Instructor
This course is designed as supplementary instruction to enable those with the Basic Life Support programs in health careers to become instructors.

**EME 0022**  Neonatal Transport
This course is designed as supplementary instruction to train emergency medical technicians to perform neonatal transports.
EME 0024  12 Lead Electrocardiogram
This course is designed for supplementary training and includes an
application of technical principles in actual operation of laboratory,
following didactic presentation of principles. It also includes a study
of electrodes, electrode application, montages, recording tech-
niques, observation of laboratory operation and practice of elec-
trode application under supervision.

ENR 0003  Gasoline Engine Mechanic
This course includes training in the inspection and repair of the me-
chanical equipment of gasoline powered engines (other than auto-
mobile and truck), including motor testing, carburetor adjusting,
tune-up cleaning, generator adjusting, valve replacing and grind-
ing, piston ring installing, and replacing broken or damaged parts.
This course is designed primarily for off-campus supplementary in-
struction.

ENR 0309  Gasoline Engine Mechanic I
This course is designed specifically for job entry training in the in-
spection and repair of the mechanical equipment of gasoline pow-
ered engines (other than automobile and truck), including motor
testing, carburetor adjusting, fuel line cleaning, generator adjusting,
valve replacing and grinding, piston ring installing, replacing and
grinding, and replacing broken or damaged parts.

ENR 0310  Gasoline Engine Mechanic II
Continuation of ENR 0309.

ENR 0311  Gasoline Engine Mechanic III
Continuation of ENR 0310.

ENR 0312  Gasoline Engine Mechanic
This course is designed for persons already employed in the field,
or in a related field, for supplementary instruction. The student will
learn proper procedure in the inspection and repair of the mechan-
ical equipment of gasoline-powered engines (other than automobile
and truck), including motor testing, carburetor adjusting, fuel line
cleaning, generator adjusting, valve replacing and grinding, piston
ring installing, replacing and grinding, and replacing broken or
damaged parts.

ENR 0390  EMP Gasoline Engine Mechanic
The course is designed to meet the needs of employers and under-
employed employees in the gasoline engine mechanic field.

ERE 0010  Professional Engineers Refresher
Course
A review of theory and current design practice in the major engi-
neering disciplines. This course provides guidance and orientation
in preparation for State Board Examinations for Professional En-
gineers Registration. This course is designed primarily for off-campus
supplementary instruction.

ETE 0510  Basic Electrocardiography
This course is designed as supplementary training for graduate RNs
and LPNs involved in specialty areas where electrocardiographic
monitoring and interpretation are necessary in the care of high risk
patients. The course content will be focused upon the interpreta-
tion, significance and treatment of arrhythmias and twelve lead
electrocardiograms. Topics to be covered include the conduction
system, electrophysiology, the basic electric theory, principles of
monitoring, twelve lead electrocardiogram interpretation and re-
cording, arrhythmias, AV blocks, intraventricular conduction de-
defects, mean electrical axis, significance and treatment including
pharmacological agents, electrical treatment and pacemakers.

FAR 0006  Family Relationships
This course, designed for supplementary instruction, places empha-
sis on the needs and interests of various family members rang-
ing from youngest to oldest and on ways of adapting daily activities
and home facilities for greatest satisfaction of family members. Op-
portunity for consideration of individual problems will be provided.

FAR 0008  Family Relationships  High School Cr. 1
This course places emphasis on the needs and interests of various
family members ranging from youngest to oldest and on ways of
adapting daily activities and home facilities for greatest satisfaction
of family members. Opportunity for consideration of individual prob-
lems will be provided.

FCR 0410  Credit Administration
This course, designed as supplementary training for persons em-
ployed in a related field, concerns itself with a statement and dis-
cussion of factors influencing and determining loan policies. Meth-
ods of credit investigations and analysis, credit techniques, collec-
tion methods, specific credit problems, and regular, as well as un-
usual types of loans, are outlined and discussed. This is a 15-week
course, meeting one night a week for three hours.
FCR 0411 Investments
Because the bank's needs for primary reserves and loanable funds limit the funds available for investment, this supplementary training course describes the nature of such funds and how their uses are determined. It also analyzes the primary and secondary reserve needs of commercial banks, the sources of reserves, and their random and cyclical fluctuations, showing the influence of these factors on investment policy. This analysis is followed by a study of yield changes as they affect a bank's long-term holdings. This is a 15-week course, meeting one night a week for three hours.

FCR 0412 Bank Communication
In this course, the student is given an opportunity to study all phases of speech situations. The text is directed primarily to the student already employed in, and seeking to become proficient in, the communication field of banking. This course will help prepare the student in proper procedures on the public platform, and other speech situations. Having studied the basic principles involved in organizing and presenting a speech, the student is given suggestions to aid in developing speaking ability in such situations as conferences, panel discussions, radio, and television. This is a 15-week course, meeting one night a week for three hours.

FCR 0413 Investments, Securities
This course is designed as supplementary training for persons already employed in a related field. It helps the student to understand how the stock market works, the important role it plays in our nation's economy, and how it helps people share in the growth of our business enterprises. This is a 15-week course, meeting one night a week for three hours.

FCR 0420 Savings and Loan Principles
This course stresses the basic principles of savings and loan organizations and explains the procedures involved in their operation. It is designed specifically as supplementary training for persons employed in a related field. This is a 12-week course, meeting one night a week for three hours.

FCR 0421 Banking Business Administration
In this course, emphasis is placed on the managerial responsibility of coordinating carefully the many facets of a business enterprise. It also stresses the background of administration, financial management, production, labor-management relations, marketing, coordination and control, and public relations problems. It is designed specifically as supplementary training for persons employed in a related field. This is a 15-week course, meeting one night a week for three hours.

FCR 0422 Bank Home Mortgage Loan
This course approaches the subject from the viewpoint of the mortgage loan officer who seeks to develop a sound mortgage portfolio. A picture of the mortgage market is presented first, then the acquisition of a mortgage portfolio, mortgage plans and procedures, mortgage loan processing and servicing, and finally the obligations of the mortgage loan officer in overall portfolio management. This course is designed specifically as supplementary training for persons employed in a related field. This is a 15-week course, meeting one night a week for three hours.

FCR 0423 Commercial Law and Banking
This course, designed specifically as supplementary training, is an introduction to law for bankers. Among the legal topics considered are jurisprudence, the court system and civil procedure, contracts, quasi-contracts, property, torts and crimes, and agency. The standard commercial law subject, including corporations and partnerships, are discussed. Though commercial law principles are broadly presented, attention is concentrated on the Uniform Commercial Code. This is a 15-week course, meeting one night a week for three hours.

FCR 0424 Economics of Banking
This course sets forth the current principles explaining how our economic system operates and is designed specifically as supplementary training for persons employed in a related field. It takes up the determination of relative values in markets with different types of competition, and applies the underlying principles to incomes and commodities. Also included are the basics of international economics and finance, and the limitations and related pitfalls of economics. This is a 15-week course, meeting one night a week for three hours.

FCR 0426 Trust Function Services
This course is designed specifically as supplementary training and presents a complete picture of the services rendered by institutions engaged in trust business. It endeavors to keep clear the distinction between business and legal aspects of trust functions. This is a 15-week course, meeting one night a week for three hours.

FCR 0427 Bank Accounting
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. It is based on a new second edition text that supplies a comprehensive treatment of all up-to-date principles and also gives the student ample opportunity through examples, illustrations, and correlated activities to learn how the principles are applied. End-of-unit summaries have special sections for both principles and managerial implications. This is a 15-week course, meeting one night a week for three hours.

FCR 0430 Banking Psychology
This course is designed specifically as supplementary training for students in business and technical fields. It is also suitable for personal enrichment. This course includes group dynamics, leadership, ethics, motivation and morale, social systems, formal and informal organizations, and other selected topics. This is a 15-week course, meeting one night a week for three hours.

FCR 0431 Analyzing Financial Statements
This course is organized into two main sections: Characteristics of Financial Statements and Financial Statement Analysis. The first section serves as a useful review of basic accounting principles for those students who have studied accounting. For those who have not, this section provides the minimum accounting background necessary for profitable study of financial statement analysis. This course is designed specifically as supplementary training for persons employed in a related field. This is a 15-week course, meeting one night a week for three hours.

FCR 0432 Banking Principles
This course is designed specifically as supplementary training and presents the fundamentals of bank functions in a descriptive fashion so that the beginning banker may view the profession in a broad (and operational) perspective. The descriptive orientation is intentional. Banking is increasingly dependent upon personnel who have the broad perspective so necessary for career advancement. This is a 15-week course, meeting one night a week for three hours.

FCR 0433 Money and Banking
This course is designed specifically for supplementary training for persons employed in a related field. It stresses the practical aspects of money and banking and emphasizes the basic monetary theory needed by the banking student to apply the student's knowledge to the particular job. Historical treatment has been kept to a minimum. Emphasis is also placed on such problems as economic stabilization, types of spending, the role of gold, limitations of central bank control, government fiscal policy, balance of payments and foreign exchange, showing their repercussions on the banking industry and affecting yield curves and the structuring of portfolios. This is a 15-week course, meeting one night a week for three hours.
FCR 0434 Bank Management
This course presents new trends which have emerged in the philosophy and practice outlined and provides new and experienced bankers with a working knowledge of bank management. It is designed specifically as supplementary training for persons employed in a related field. Since case study is becoming well established as an effective management learning technique, the text introduces the use of cases as a new element. This is a 15-week course, meeting one night a week for three hours.

FCR 0435 Bank Letters and Reports
This course is designed specifically as supplementary training for bank officers, supervisors, and other employees who dictate or review correspondence. Since bank letters are actually public relations documents, all persons should be familiar not only with the mechanical forms of bank letters but also with the psychological principles that help the letter writer achieve best results. The course covers letter forms, emphasizes fundamental principles underlying modern correspondence, and examines different kinds of bank letters. This is a 15-week course, meeting one night a week for three hours.

FCR 0436 Banking, Installment Credit
This course is designed especially as supplementary training for persons employed in a related field. It concisely presents the techniques of installment lending. Emphasis is placed on establishing the credit, obtaining and checking information, servicing the loan, and collecting the amounts due. Each phase of a bank’s installment credit operation should be carefully scrutinized to be certain that the most efficient methods are employed, for only through an efficient operation can a bank maximize its profits on this particular kind of credit. Other topics discussed are inventory financing, special loan programs, business development and advertising, and the public relations aspects of installment lending. This is a 15-week course, meeting one night a week for three hours.

FCR 0440 Credit Union
This course is designed to provide the knowledge and tools necessary to make credit union employees more professional and better informed and to attain leadership qualities which are vital today. This is a 12-week course, meeting one night a week for two hours.

FCR 0442 Personal Finance
This course is designed for supplementary training and prepares individuals for better management and enhancement of their own present and future personal finances. Emphasis is on goal setting, budgeting, debt and credit, savings, investments, taxation, insurance, retirement, and pension plans.

FIF 0310 Fire Fighter Minimum Standards
Course — Phase I
This course is designed to provide supplementary instruction of area volunteer fire fighters in partial fulfillment of the State Fire Fighter Minimum Standards Curriculum. Specific areas of instruction for this phase include overview of the fire service, apparatus and equipment, fire chemistry and behavior, and tools and small equipment.

FIF 0311 Fire Fighter Minimum Standards
Course — Phase II
This course is designed to provide supplementary instruction of area volunteer fire fighters in partial fulfillment of the State Fire Fighter Minimum Standards Curriculum. Specific areas of instruction for this phase include care and use of protective breathing equipment, ladders, types and use of portable fire extinguishers.

FIF 0312 Fire Fighter Minimum Standards
Course — Phase III
This course is designed to provide supplementary instruction of area volunteer fire fighters in partial fulfillment of the State Fire Fighter Minimum Standards Curriculum. Specific areas of instruction for this phase include fire streams, fire extinguishment, forcible entry, and firefighting salvage work.

FIF 0313 Fire Fighter Minimum Standards
Course — Phase IV
This course is designed to provide supplementary instruction of area volunteer fire fighters in partial fulfillment of the State Fire Fighter Minimum Standards Curriculum. In this phase specific instruction is provided in the construction, care, and proper use of fire hose.

FIF 0314 Fire Fighter Minimum Standards
Course — Phase V
This course is designed to provide supplementary instruction of area volunteer fire fighters in partial fulfillment of the State Fire Fighter Minimum Standards Curriculum. Specific areas of instruction for this phase include fire building overhaul practices, ventilation, fireground rescue, in-service inspections, and emergency vehicle operations.

FIF 0315 Fire Fighter Minimum Standards
Course — Phase VI
This course is designed to provide elementary instruction of area volunteer fire fighters in partial fulfillment of the State Fire Fighter Minimum Standards Curriculum. In this phase specific instruction is provided in first aid in the fire service.

FIF 0316 Fire Fighter Minimum Standards
Course — Phase VII
This course is designed to provide supplementary instruction of area volunteer fire fighters in partial fulfillment of the State Fire Fighter Minimum Standards Curriculum. Specific instruction is provided in liquid, structural, gas and electric burns.

FIF 0411 Fire Fighters Leadership Course
This course is designed to provide fire service officers with leadership techniques and skills. It includes leadership types, responsibility of leadership, fire fighting tactics, etc. Note: course is restricted to in-service personnel.

FIF 0413 Fire Pump Operators Course
The student will be introduced to the operation and care of fire pumps. In addition, the student will be provided with an understanding of pump construction and the working principles surround- ing its operation. Note: course is restricted to in-service fire fighters.

FIF 0415 Fire Officer Instructor Course
This course is designed for persons already employed in the field. The student will learn the purpose and types of training necessary in fire department operations. In addition, selection criteria for instructors and utilization of training equipment will be presented.

FIF 0417 Fire Stream Practices
The student will be provided with instruction pertaining to various kinds of pressure, friction loss, formulas, etc. In addition, supplying standpipe, sprinkler system, and snorkel will be addressed. Note: Course is limited to in-service fire fighting personnel.

FIF 0418 Fire Ground Tactics & Procedures
Students will be provided with instruction concerning the development of principles dealing with command and control, familiarization with apparatus tools and equipment, fire ground strategy, etc. Note: Course is restricted to in-service fire fighters.

FIF 0419 Aerial Ladder Operations
The fire fighter will be instructed in ladders and construction, hydraulic systems, stabilizing jacks, ladder pipes, etc. Note: Course is limited to in-service fire fighting personnel.
FIF 0420 Hazardous Materials
This course is divided into two sections. The first of these deals with why materials explode, why they are unstable, and how they react with water, air, and each other. The second section explores toxicity.

FIF 0422 Fire Fighter Minimum Standards Course
This course is designed to prepare a student for certification and initial employment as a fire fighter in the State of Florida. Successful course completion will qualify a student to take the minimum standard written, oral, and practical examination as administered by the Bureau of Fire Standards and Training. NOTE: Course is restricted to individuals sponsored with intent of employment by area fire departments.

FIF 0424 Emergency Vehicle Operations Course
This course is designed for supplementary training and will focus on the construction, maintenance, use, and operation of fire service vehicles. Attention is given to vehicle nomenclature, safe driving practices, apparatus operations, and safety.

FMC 0311 Office Practice
This course is designed specifically as supplementary training for persons in a related field. Instruction includes filing, ten-key adding machine, key driven and electronic calculator, duplicating (spirit and mimeograph), and basic record keeping.

FMC 0312 Office Machines
The types of machines used in a particular class are determined by the needs of the group for whom instruction is provided. Emphasis is placed on the use of the machines in the bookkeeping process. Content of the course is selected from realistic business problems and actual business forms. This course is designed for persons already employed in the field, or in a related field, for supplementary instruction.

FMC 0320 Office Practice I High School Cr. ½
This is a course designed to give students an understanding of important clerical functions performed in offices and to develop a comprehension of the application of these functions to related office procedures. Units covered will include basic skills for office jobs, processing data, mailing and shipping services, business filing, records management, receptionist duties, and telephone and telegraph service.

FMC 0322 Office Practice II High School Cr. ½
Prerequisite: FMC 0320. This is a course designed to give students an understanding of more complex clerical functions performed in offices and to develop a comprehension of the application of these functions to related office procedures. Units covered will include producing readable letters, office typewriting, purchasing and receiving, selling, inventories, financial duties, copying and duplicating, and a business career.

FMC 0324 Office Machine I High School Cr. ½
A study of the ten-key adding machine, printing calculator and electronic calculator, including a practical unit using the machines studied. The course develops skills in solving business problems.

FMC 0326 Office Machines II High School Cr. ½
Prerequisite: FMC 0324. Advanced work on the common office machines used in FMC 0324. The course entails development of percentages, ratios, and mathematical formulas used in business operations.

FMD 0010 Industrial Supervision and Foremanship
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. It includes training in the supervisor of workers by studying and interpreting blueprints, sketches, and written or verbal orders, determining procedure of work, assigning duties, and inspecting work of quality and quantity production, timekeeping, production record keeping, and other record keeping; employing, training, and discharging workers, and setting up and inspecting equipment prior to regular operation and other areas necessary for successful supervision.

FMD 0390 EMP Industrial Supervisory Development
This course will be designed to meet the needs of employers and underemployed persons in industry.

FOD 0010 Grocery Merchandising
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The course includes organized subject matter and learning experiences related to the variety of sales and sales-supporting tasks performed by employees and management in establishments primarily engaged in selling a general or commodity line of food products at wholesale. This is a thirty-hour course, meeting each day for two and a half hours.

FOD 0012 Waiter-Waitress Training
This course covers techniques in giving guest service, setting them, taking orders, serving food, proper sanitation practices, and suggestive selling to aid uncertain customers. It is designed specifically as supplementary training for persons employed in a related field.

FON 0001 Food For You
This course is designed as supplementary instruction and will be adapted to the needs of the people enrolled. It will emphasize consumer education throughout each unit. Flexibility and adjustment to group needs as the course progresses will be considered.

FON 0002 Nutrition
This course includes study of the basic principles of nutrition and their application, the relation of food selection to health, and ways to improve poor dietary practices. Attention is given to planning and preparing family meals which may be easily adapted to the special needs of all age groups. Concepts in management, consumer education, sanitation, and safety are taught as they relate to instruction.

FON 0003 Basic Principles of Nutrition
This course is designed as supplementary instruction for persons working in a related field, and includes a study of the basic principles of good nutrition and the relation of food selection to health. The aim is to interpret nutrition in terms of its practical application in the planning, preparing, and serving of meals and relating these meals to the other food for the week. It also aims to develop an understanding of daily dietary allowances for various age groups and the responsibility for providing these. It includes information on foods with maximum nutritive value and how to purchase, store, and prepare them in order to retain these values to the maximum. Sixty hours.

FON 0005 A Contemporary Approach to Health & Weight Control
This course is designed as a guide for good health and weight control through development of proper nutritional and physical fitness habits. Evaluation of current health and hygiene programs will be included as well as the value of vitamins, proteins, fats and oils, and selection of foods for weight control. Food control methods as approaches to weight control.

FON 0101 Gourmet Foods
This course includes the preparation and service of exotic and unusual foods. It is designed as supplementary instruction for persons working in a related field.

FON 0102 Short Cuts in Meal Preparation
This course is designed as supplementary instruction for persons working in a related field. It includes the preparation of well-balanced quick meals through the use of mixed, packaged, and frozen foods. Emphasis will be given to the selection, use, and care of small kitchen appliances.
FON 0103 Meal Management—Microwave Cooking
This course is designed to include principles of microwave cooking. Students will acquire skill in meal management to include menu planning, budgeting, purchasing, storage, and preparation of foods with the microwave oven. Also included will be techniques of freezing and thawing relative to use with microwave. The learning environment will include instructor's demonstrations, visual aids, and student participation in food preparation. Consumer education will be an important aspect of this course, which is designed as supplementary instruction.

FON 0104 Diet Therapy
This course provides a scientific approach to food and nutrition and functions of the body processes. Emphasis is placed on the knowledge of types of foods related to specific disorders and the implementation of special diets as prescribed by physicians. Included will be diets low in sodium, calories, and cholesterol. This course is designed as supplementary instruction for persons working in a related field.

FON 0105 Elegant Entertaining
This course is designed as supplementary instruction to make entertaining a happy adventure. Topics to be included are styles of meal service and table setting; table decorations and appointments; planning menus for buffets, teas, open house, cocktail parties, brunches, luncheons, dessert parties, barbecue and formal dinners; and tips and ideas to make entertaining fun.

FON 0107 Cuisine Mincour
This course permits students to explore the new "trend" in classical cookery. Translated, "mincour" is "slim cooking." It is not diet food; rather, traditional "haute cuisine" recipes are reexamined and analyzed with regard to calories, cholesterol and ingredient combinations. Students produce low-calorie dishes that maintain high taste and appearance without the use of ingredients high in fat content.

FON 0109 Bread Making
This course includes the study of the ingredients and techniques involved in making and baking a variety of breads. Included will be a study of nutritive values, ingredients, methods of mixing, baking, storage and service of breads. Quick and yeast breads including sour dough breads and starters will be emphasized, as well as breads of foreign countries.

FSE 0010 Hostess Training
This course, designed as supplementary instruction for restaurant personnel, covers the proper way to handle goods, dress, how to take orders, placing of orders, seating and arrangements, dining room service, and ways to make customers' meals pleasant.

FSE 0011 Food Service Management
This course is designed as supplementary instruction for those persons serving in a managerial or supervisory capacity in the food service industry. It includes such phases as, but is not limited to, food purchasing, food cost accounting, food control, food checking, and food sales and services.

FSM 0003 Cake Decorating Basic
This course is designed to develop skills in construction of cake decorations, borders and covers, and creation of novelty and seasonal decorations. Concepts of management, consumer education, sanitation, and safety are taught as they relate to instruction. Materials will be supplied by the student. This course is designed primarily for off-campus supplementary instruction.

FSM 0310 Cake Decorating
This course is designed as supplementary instruction for persons working in a related field and includes techniques and experiences in baking and cake decorating of all types such as wedding and party cakes and pastries for special occasions.

FSM 0311 Advanced Cake Decorating
Prerequisite: FSM 0310, Cake Decorating. This course is designed as supplementary instruction for persons working in a related field and includes specialized techniques in cake decorating. Skills developed are: making fancy ornaments and designs, making creations in sugar, and making forms in chocolate.

FSM 0312 Quantity Cookery
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The student will learn proper procedure to improve quality and quantity of food served. It includes principles and techniques of quantity food production. Actual preparation of foods in quantity provides on-the-job experiences using principles and techniques learned. Trainees learn proper use and care of equipment, use of available serving tools, how to measure, and gain experience in calculating and recording quantities of food used, adjusting and standardizing recipes for numbers to be served. Sixty hours.

FSM 0314 Supervised Food Service Worker
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will work, under supervision, in the preparation and serving of food in institutions such as hospitals, homes for the aged, nursing homes, children's homes, and day-care centers. Follows hygienic practices in preparing food for cooking, during the cooking process, serving and storing; follows safety regulations in use of all types of equipment and the handling of hot foods; uses the basic skills required in preparation of standard large quantity recipes for vegetables, salad and dressings, milk cookery, egg cookery, soups, meat, fish and poultry, quick breads, sandwiches and desserts; serves food at table or on trays according to situation. The student will organize work in relation to work space and within time limitations. Suggested hours of training — 450.

FSM 0315 Food Service Supervision
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction which includes orientation to food service department, organization and ethics, nutrition, menu making and planning, merchandising and procurement of food, principles of food preparation and service, housekeeping, safety, sanitation and personal hygiene supervision. Skills acquired prepare students for supervisory roles in hospitals, institutions and extended care facilities, day care centers, kindergartens, and homes for the aging. Suggested hours of training — Ninety hours class work and thirty-six weeks evaluated work experience.

FSM 0316 Equipment Use and Care
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The student will learn proper procedure to use school lunchroom equipment in the easiest, safest, and most effective way, to properly care for equipment, and to appreciate the value of good equipment as an aid in providing superior food. Participants learn simple repair techniques and preventive maintenance, cleaning methods, and record keeping as it relates to equipment. Thirty to sixty hours.

FSM 0317 Basic Food Preparation
This course is designed to include purchase procedures, use, care, storage and arrangement of equipment; and management of human and material resources. Specialized activities include experiences in planning, preparing, and serving food for a variety of occasions.

FSM 0318 Supervised Food Service Worker
High School Cr. 1
The student taking this course works under supervision in the preparation and serving of food in institutions such as hospitals, homes for the aged, nursing homes, children's homes, and day-care centers. The student follows hygienic practices in preparing food for cooking, during the cooking process, serving and storing; follows safety regulations in use of all types of equipment and the handling of hot foods; uses the basic skills required in preparation of standard large quantity recipes; serves food at table or on trays according to situation; and organizes work in relation to work space and within time limitations. Suggested hours of training — 450.
FSM 0320  Catering I
This course is designed as supplementary training for persons employed in home or commercial catering. Instruction includes: menu planning for catered events; preparation and service of foods; purchase, use and care of equipment; management of time and money; sanitation and safety; decoration and service of foods for special occasions. Special activities include field trips to commercial caterers and participation in commercially catered affairs.

FSM 0322  Catering II
This course is designed to provide supplementary instruction and give students an opportunity to apply knowledge and skills needed for home and commercially catered events. Instruction includes business practices, management, portion and cost control, and record keeping. Specialized activities include the actual catering of several events by the students.

FSM 0510  Advanced Foods
This course is designed as supplementary instruction and includes the more specialized preparation of food for family meals such as meats, seafoods, poultry, vegetables, and desserts. Consideration will be given to budgeting, marketing, and storing foods, as well as table service for all occasions.

FSM 0511  Organization and Management
This course is designed as supplementary instruction to teach managers the fundamentals of organization (i.e., the characteristics of desirable organization, development of a functional organizational plan, establishment of a line of responsibility and authority, the various environmental factors which influence the organization, and management). The work plan, the relation of personnel to the organization, the differences in laws, regulations and policies, where responsibility lies in carrying them out, and the relationship of records to management control are all handled in detail. Sixty hours.

FSM 0512  Accounting and Reporting
This course is designed to teach food service managers and accountants the principles involved in recording and reporting the activities of any quantity food service business. It includes a study of what constitutes a sound record-keeping and reporting system, and provides daily practice in maintaining adequate records and reporting information clearly and accurately. This course is designed as supplementary instruction for persons already employed in the field, or in a related field.

FSM 0513  Purchasing
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will learn the general principles of purchasing, knowledge of the different grades of food, how these grades are determined, and their importance in specifying quality and controlling costs. Also included is the study of marketing functions, laws, regulations, purchasing procedures, and necessary purchasing records.

FSM 0514  Food Service Management
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The course will assist employers in finding and solving problems of quantity food service. It includes characteristics of a good food service, and its place in the total education program with comprehensive overview of the principles of menu planning, purchasing, food preparation and service, equipment use and care, sanitation and safety, personal cleanliness and grooming, and the value of a good working relationship within the organization and with the school community. Emphasis is placed upon the need for greater knowledge in operating school food services, to assure maximum benefits to the children and the need for continuous training. Sixty hours.

FSM 0516  International Cuisine
Participation in this course provides the student the opportunity to plan, prepare and serve foreign cuisine. Exotic and ethnic foods of particular nations or regions of the United States will be featured, such as the Middle East, Germany, Southeast Asia, Japan, Russia, Latin America, France and Africa. Concepts in management, consumer education, sanitation, safety, and equipment will be included as they relate to instruction.

FSM 0520  Food Service Apprenticeship I
The student will acquire knowledge and skills needed by a professional cook in the food service industry, including orientation: sanitation, safety, and first aid; basic principles of cooking and meat preparation; use and care of equipment; and other skills specified in the apprenticeship standards. Enrollment is limited to students who meet the standards prescribed by the National Apprenticeship Training Program of the Educational Institute, American Culinary Federation. The duration of the training program is three years. The program is comprised of three courses. Each course includes a minimum of 144 hours per year of related classroom instruction and 2,000 hours per year of on-the-job training.

FSM 0521  Food Service Apprenticeship II
The student will acquire knowledge and skills needed by a professional cook in the food service industry, including restaurant cookery: stocks, soups and sauces; vegetable preparation and cookery; and other skills specified in the apprenticeship standards. Enrollment is limited to students who meet the standards prescribed by the National Apprenticeship Training Program of the Educational Institute, American Culinary Federation. The duration of the training program is three years. The program is comprised of three courses. Each course includes a minimum of 144 hours per year of related classroom instruction and 2,000 hours per year of on-the-job training.

FSM 0522  Food Service Apprenticeship III
The student will acquire knowledge and skills needed by a professional cook in the food service industry, including broiling, grilling and frying; breakfast cookery; baking, pastry operations; and other skills specified in the apprenticeship standards. Enrollment is limited to students who meet the standards prescribed by the National Apprenticeship Training Program of the Educational Institute, American Culinary Federation. The duration of the training program is three years. The program is comprised of three courses. Each course includes a minimum of 144 hours per year of related classroom instruction and 2,000 hours per year of on-the-job training.

GME 0010  Merchandising and Buying
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. It deals principally with training for personnel specializing in merchandising and buying. The functions of the merchandising department, inventory control system, stock turnover, buying functions, and sales promotion are covered. This is a ten-week course, meeting one night a week for three hours.

GME 0011  Route Selling
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will learn proper procedure to secure good public relations with a firm, knowing its product, traffic safety, and methods of promoting additional business. This is a ten-week course, meeting one night a week for three hours.

GME 0012  Principles of Retailing
This course, designed as supplementary instruction for persons already employed in the field, shows the organization and operation of a retail merchandising business. Included are basic coverage of sales, service, sales promotion and advertising, credit and accounting, and administration department. Also, basic coverage, given to such topics as channels of distribution, store financing, personnel problems, and operating statements. This is a ten-week course, meeting one night a week for three hours.

GME 0014  Techniques of Selling
This is a basic selling course designed as supplementary instruction for persons already employed in a related field. It covers the sequences that go into making a sale. Course content includes selling in various fields such as retailing, direct and wholesaling areas, and an analysis of the buyer-focused theory of selling. The use of visual aids augments classroom activities, and the student has an opportunity to practice selling in the classroom. This is a ten-week course, meeting one night a week for three hours.
GMR 0310  Cashier—Sales—Checker
This course is designed specifically for job entry training and includes instruction in the proper finger method of recording amounts on a cash register; to properly departmentalize sales; to handle taxable items, to process actual merchandise orders, handle cash, and balance cash drawers. The program is a ninety-hour training course with classes both morning and evening.

GRA 0310  Printing
This course is designed specifically for job entry training. The course consists of offset camera, platemaking, stripping, and small offset presses; letterpress composing, bindery and letterpress printing, including hand fed and automatic presses.

GRA 0312  Printing
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The student will learn proper procedures involved in offset camera, platemaking, stripping, and small offset presses; letterpress composing, bindery, and letterpress printing, including hand fed and automatic presses.

HEE 0110  In-service Training for Home Economics Teachers
This course is designed to provide in-service training for part-time instructors in Home Economics programs. The course includes how adults learn, as well as teaching techniques and learning activities in relation to predetermined goals.

HEF 0003  Flower Arranging
This course is designed for the person interested in creating floral arrangements for the home. Floral designs suitable for use on special occasions and for holidays may be constructed from materials supplied by the student. This course is designed primarily for off-campus supplementary instruction.

HEF 0101  Slipcover Construction
Course work includes instruction in fabric selection, techniques of handling various fabrics, making cord, fitting cord to corners, and inserting zippers. Care of slipcovers is also included. This course is designed for persons already employed in the field, or in a related field, for supplementary instruction; however, intensive study could develop job entry level skills.

HEF 0102  House Design
This course is designed for persons already employed in the field, or in a related field, as supplementary instruction. It involves the functional planning of interiors. There will be a series of exercises in analyzing and evaluating plans to develop good judgment when buying or building a house. These exercises will cover the following aspects: family living and needs in a house; choosing a site; climate; construction blueprints; plumbing; heating, and electrical provisions; historic backgrounds of houses; architectural style and understanding the architect's role; evaluating a ready-built place; legal guides; planning kitchens and storage areas; remodeling an old house, landscaping design, field trips to reinforce classroom exercises.
HEF 0103 Interior Design
High School Cr. 1
This course includes a study of the ways in which attractive and livable interiors can be planned in relation to individual and family housing situations and incomes, choosing and combining line, color, design and various materials, and wall, window and floor treatments as they relate to other phases of decoration. Practical information concerning choice of furnishings and equipment will be included. This course may include construction of slipcovers, draperies, curtains, and bedspreads.

HEF 0104 Interior Design
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. It includes a study of the ways in which attractive and livable interiors can be planned in relation to individual and family housing situations and incomes, choosing and combining line, color, design and various materials, and wall, window and floor treatments as they relate to other phases of decoration. Practical information concerning choice of furnishings and equipment will be included.

HEF 0105 Advanced Interior Design
This course is designed as supplementary instruction for the person who has completed HEF 0104, Interior Design. It includes advanced study of the elements and principles of design.

HEF 0310 Drapery Construction
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. Course work includes instruction in choosing fabrics, construction of various types of curtains and draperies, and selection of hardware. A comparison of cost factors is also included. Intensive study could develop job entry level skills. Total — forty-eight hours.

HEF 0311 Furniture Recovering
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The student will learn the proper procedure necessary in the recovering of furniture. Instruction includes selection of tools, equipment, and material, and planning and preparing the proper coverings for panels, trimmings, skirts, draperies, and cushioning. Students will supply their own tools, fabrics, materials, and all other supplies.

HEF 0312 Furniture Upholstery
This course includes the selection of tools, materials and equipment; use of power equipment; dismantling of furniture; basic construction processes; fitting the main cover; planning and preparing the fabric platform; planning and preparing the panels, outside and trimmings: pleated skirts, dust ruffles, and making cushions. This course is designed for persons already employed in the field, or in a related field, for supplementary instruction; however, intensive study could develop job entry level skills.

HEF 0313 Advanced Upholstery
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. This course includes channeling, tufting, making skirts, regulating, and spot touch-up of furniture, color and color schemes, and headboards: however, intensive study could develop job entry level skills.

HEF 0314 Floral Design
This course includes procedures for wiring and taping flowers, simple bouquets, hospital and home arrangements, funeral sprays, and simple corsages. Students will experiment with party decorations, centerpieces and wedding bouquets. Some emphasis will be given to the use and care of plant decoration and designs made with artificial flowers. The techniques and skills presented in this course are designed for persons already employed in the field, or in a related field, for supplementary instruction; however, intensive study could develop job entry level skills.

HEF 0315 Advanced Floral Design
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. This course includes instruction in advanced techniques of floral design. Also included are procedures necessary to the successful operation of a floral shop; however, intensive study could develop job entry level skills.

HMG 0001 Vocational Homemaking
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The course includes home management problems, delegation of responsibilities, and action to take in emergencies.

HOF 0001 Household Care, Repair, and Maintenance
This course is designed as supplementary instruction directed toward making the home owner self-sufficient in handling minor care, repair, and maintenance problems. The content includes problems with electric power, plumbing emergencies, care and repair of floors and floor coverings, interior painting, wallpapering, furniture care and repairs, miscellaneous repairs, tools needed, safety, and combating pests and fungi.

HOF 0002 Home Accessories
This course is designed as supplementary instruction, and includes application of techniques and skills in making new, or reworking used, accessory items for the home. Project possibilities: bedspreads, dust ruffles, pillow sham, ottomans, hassocks, wall hangings, lamps, lampshades, curtains, window shades, linens, waste baskets, storage boxes, candle making, candle holders, small braded or hooked rugs, and other accessory furnishings in which an interest may be expressed by students.

HOL 0010 Hotel-Motel Management
This course is designed specifically as supplementary training for persons employed in a related field, but not pursuing a degree program. Includes supervision of employees, organization, catering and sales departments, and front office procedures.

HOL 0014 Apartment Management
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The course will cover all aspects of apartment management. It includes such topics as manager qualifications, setting apartment living, social and recreational activities within the apartment, lease agreements, terminations and collections, record keeping, security, maintenance, and repair. This is a ten-week course, meeting one night a week for three hours.

HOL 0016 Hotel-Motel Front Office Procedures
This course is designed specifically as supplementary training for persons employed in a related field but not pursuing a degree program. Provides training in the use of posting machines and all procedures for registering and rooming guests, recording charges and credits, checkouts, and performing the night audit.

HOL 0018 Executive Housekeeping
This course is designed specifically as supplementary training for persons employed in a related field. The course will develop leadership and organizational ability for supervisory personnel responsible for maintaining an establishment in a clean, orderly, and attractive manner. It includes the basic technical knowledge essential to the position.

HOL 0020 Introduction to Hospitality Management
This course is designed specifically as supplementary training for persons in a related field. It traces the growth and development of the lodging industry from early times to modern skyscraper hotels and highway motels, the organization of hotel operations, and opportunities and future trends. A survey course for persons considering hotel-motel management as a career. Six- to eight-week course.

HOM 0001 Management and Family Economics
This course is planned as supplementary instruction for the home-maker or potential homemaker. The purpose of the course is to relate the use of time, energy, and money to the attainment of the individual, family, and occupational goals. Specific topics included are care and upkeep of the home and furnishings with the least expenditure of time, energy, and money, while considering the benefit and satisfaction of the individual, as well as the family unit. Consumer education is emphasized.
HOM 0002  Clothing Selection & Care
This course is designed as supplementary instruction. It includes a study of fibers, fabrics, and special finishes, informative labeling of fabrics for home sewing and for ready-to-wear garments and characteristics of well-made garments and accessories. Included are the factors involved in selecting clothing accessories for individuals and family members to provide pleasing appearance, good design, color, and appropriateness to age and occasion. A study will be made of the care and upkeep of family clothing through laundering, repairing, and storing, and demonstrations will be given of simple alterations which are needed for better fit of ready-made garments.

HSM 0310  Unit Clerk
This course is designed to familiarize a non-professional worker with clinical and receptionist duties of the nursing unit under the supervision of the charge nurse on the unit.

IEL 0110  Electric Code
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The course will prepare apprentice electricians to pass the electric code examination, and includes types of electric wire sizes, meters, electrical equipment, and materials.

IEL 0309  Construction Electricity I
This course is designed specifically for job entry training which includes the installation of wiring systems and lighting fixtures in buildings, including laying conduit, installation of switch panels, pulling wire, splicing, testing circuits, line construction, and performing other duties and jobs required of an electrician.

IEL 0310  Construction Electricity II
Continuation of IEL 0309.

IEL 0311  Construction Electricity III
Continuation of IEL 0310.

IEL 0312  Construction Electricity
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The student will receive training in the installation of wiring systems and lighting fixtures in buildings, including laying conduit, installation of switch panels, pulling wire, splicing, testing circuits, line construction, and performing other duties and jobs required of an electrician.

IEL 0315  Construction Electricity
This course is designed primarily for apprenticeship instruction, and its contents will include the proper procedure for installation of wiring systems and lighting fixtures in buildings, including laying conduit, installation of switch panels, pulling wire, splicing, testing circuits, line construction, and performing other duties and jobs required of an electrician.

IEL 0316  Electric Wiring
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The student will be trained in installation of wiring systems and lighting fixtures in buildings, including laying conduit, installation of switch panels, pulling wire, splicing, testing circuits, line construction, and performing other duties and jobs required of an electrician.

IEL 0317  Electric Wiring
This course is designed primarily for apprenticeship instruction, and its contents will include the proper procedure to install wiring systems and lighting fixtures in buildings, including laying conduit, installation of switch panels, pulling wire, splicing, testing circuits, line construction, and performing other duties and jobs required of an electrician.

IEL 0390  EMP Construction Electricity
The course is designed to meet the needs of employers and underemployed employees in the construction electricity industry.

INS 0210  Principles of Insurance
This course, designed specifically as supplementary training, will seek to develop principles that can be used in understanding insurance companies' contracts and practices. The approach will be essentially functional. Emphasis will be on the presentation of principles and examples of practices. Methods of comparing the relative cost will be presented. This is a 15-week course, meeting one night a week for three hours.

INS 0212  Principles of Casualty Insurance & Surety Bonding
This course is designed for persons already employed in the field, as supplementary training. It is an introduction to the eight areas of automobile liability and physical damage insurance,工伤 compensation and employers' liability insurance, business, professional and personal liability insurance, fidelity and surety bonds, theft coverages, multiple-line trends and coverages, health insurance, and miscellaneous casualty coverages. This is a 15-week course, meeting one night a week for three hours.

INS 0213  Principles of Insurance Adjusting
This course is specifically designed as supplementary training for persons employed in a related field. It includes an introduction to the general principles of insurance and property loss adjusting. The following areas are covered: risk and insurance; suretyship; risk management; principles of law and the insurance transaction; and the insurance contract—limitations on coverage and limitation on amount of loss; the procedure, investigation, and reports of adjustment of property losses; and estimating business losses. This is a 15-week course, meeting one night a week for three hours.

INS 0215  Marketing Principles of Life and Health Insurance
This course is designed for persons already employed in the field, as supplementary training. It is a new approach toward the life and health insurance industry, its products, the market potential, and the industry as a selling career. This is a 15-week course, meeting one night a week for three hours.

INS 0216  Principles of Health Insurance
This course is designed as supplementary instruction for persons already employed in the field. It is an introduction to health insurance and covers health losses and protection, expense and income coverage, and health insurance, its growth, and many areas of coverage offered by government, commercial, and Blue Cross-Blue Shield organizations. This is a 15-week course, meeting one night a week for three hours.

INS 0217  Insurance Soliciting
This course is designed specifically as supplementary training for persons employed in a related field. It includes an introduction to the field of property and casualty insurance. Successful completion of this course will authorize and otherwise qualify an individual to sit for the Florida Insurance Department examination for the license 4-20 as Solicitor. This is a 17-week course, meeting twice a week, three hours each night.

INS 0218  LUTC Equities Marketing
The LUTC Equities Course offers the career life underwriter practical on-the-job supplementary training in the sale of equities (mutual funds and variable annuities). It is designed specifically for life agents whose companies offer equity products and who want to expand their markets and their skills to sell more of these products. It meets for 25 weeks, two and one-half hours per week.

INS 0220  CLU—Investments and Family Financial Management
This course is designed specifically as supplementary training and includes a study of various aspects of investment principles and their application to family financial management. Included are the subjects of yields, limited income securities, growth factors, and analysis of financial statements. Also discussed are family budgeting, property insurance, mutual funds, variable annuities, and aspects of other investment media. This is a 15-week course, meeting one night a week for three hours.
INS 0222 CLU—Life Insurance Law and Company Operations
This course is designed specifically as supplementary training and includes a study of legal aspects of contract formation, policy provisions, assignments, ownership rights, creditor rights, beneficiary designations, disposition of life insurance proceeds and settlement options. Also, the course discusses types of insurances, risk selection, company investments, financial statements, and regulation and taxation of companies. This is a 15-week course, meeting one night a week for three hours.

INS 0224 LUTC—Personal Insurance
This course is designed specifically as supplementary training and includes a study of the value of life insurance; qualities of a successful life agent; the life agent’s work, habits, and self-discipline; self-evaluation; what life insurance is capable of providing; how to convert to commission dollars; the life agent’s program; and the keys to the sale. This is a 26-week course, meeting one night a week for two and one-half hours.

INS 0225 LUTC—Business Insurance
This course is designed specifically as supplementary training and includes a study of sales and purchase agreements; analysis of life insurance needs in the business market; professional stature; the business insurance approach; the key man; the language of business; how life insurance can be used to offset losses due to taxes; royalty costs; attorneys’ fees; final expenses in liquidation; on-the-spot successful sales presentations; and techniques used to acquaint business owners with the perils they face. This is a 26-week course, meeting one day or night a week for two and one-half hours.

INS 0226 LUTC—Disability Income Insurance
This course is designed specifically as supplementary training and includes a study of the growing need for coverage; public awareness; advantage of being a switch hitter; steps in becoming an income replacement specialist; tax advantages of disability income insurance; and overcoming objections. This is a 15-week course, meeting one night a week for three hours.

INS 0226 CLU—Pension Planning
This course is designed specifically as supplementary training and includes a study of the basic features of private pension mechanisms, including tax considerations, cost factors, funding instruments, profit-sharing plans and tax sheltered annuities. This is a 15-week course, meeting one night a week for three hours.

INS 0229 CLU—Economics
This course is designed specifically as supplementary training and includes a study of economic principles, the government and banking institutions which have an effect on the national economy, national income, theory and application of price determination, business cycles, money and banking, international trade and finance, and problems of economic growth. This is a 15-week course, meeting one night a week for three hours.

INS 0230 LOMA—Fundamentals of Life Insurance
This course is designed specifically as supplementary training and includes a study of the nature of modern life insurance, plans for life insurance, the level premium system, terms of the policy, legal aspects of life insurance, death and disability claims, health insurance, industrial insurance, group insurance and social security.

INS 0231 LOMA—Life Company Operations
This course is designed specifically as supplementary training and includes a study made of the different types of life insurance organizations, home office and field office organization, mortality tables, premium calculation, risk selection, reinsurance, governmental regulation and taxation, investments of life insurance companies, financial statements, and new ideas and planning in the business of life insurance. This is a 15-week course, meeting one night a week for three hours.

INS 0232 LOMA—Legal Aspects of Life Insurance
This course is designed specifically as supplementary training and includes a study of how the life insurance contract is formed and made valid, the rights of the policy owner and beneficiary, and the life insurance contract in operation. This is a 15-week course, meeting one day a week for two and one-half hours.

INS 0233 LOMA—Life Insurance Accounting
This course is designed specifically as supplementary training and includes a study of elementary commercial bookkeeping, classifications of transactions, insurance entries, investment operations, punched card data processing, and fiscal period reporting. This is a 15-week course, meeting one night a week for two hours.

INS 0234 LOMA—Economics and Investments
This course is designed specifically as supplementary training and includes a study of economics, income and growth, financial organizations, money and banking, income distribution, investment and security purchasing and purpose. This is a 15-week course, meeting one night a week for two and one-half hours.

INS 0235 LOMA—Mathematics of Life Insurance
This course is designed specifically as supplementary training and includes a study of life insurance mathematics, compound interest, relation of mathematics to annuities, how to calculate premiums, reserves, dividends, and non-forfeiture values. This is a 15-week course, meeting one night a week for two and one-half hours.

INS 0236 LOMA—Office Administration—Agency and Home Office
This course is designed specifically as supplementary training and includes a study of office organization, sales organization, office management, systems, data processing, office layout and personnel. This is a 15-week course, meeting one night a week for two and one-half hours.

INS 0237 LOMA—Advanced Life Insurance
This course is designed specifically as supplementary training and includes instruction to provide students with more detailed knowledge of life insurance and company operations. It is intended primarily for career employees who wish to do intensive study in the business operations of a life insurance company and its more intricate characteristics. This course is considered to be a collegiate level offering and is divided into six parts. Parts 1-7 are considered to be core subject areas and Part 8 is listed as a specialized field of interest. This is a 15-week course, meeting one night a week for two hours.

INS 0240 CLU Advanced Estate Planning
This course is designed specifically as supplementary training and includes a study of tax laws affecting estate planning (estate and gift income tax, taxation of trusts and estates, and state death taxes) and the instrumentality used in estate planning (wills, trusts, life insurance, business purchase agreements, powers of appointment and others) along with fact finding, analysis of facts, and presentation of a proposal. This course is designed for CLU’s, CFA’s, lawyers and trust officers. This is a 20-week course, meeting one night a week for three hours.

INS 0241 CLU—Individual Life—Health Insurance
This course is designed specifically as supplementary training and includes a study of the role of life and health insurance in meeting economic security needs, types of individual and special life and annuity contracts, individual health insurance contracts including disability and medical expense insurance, and the arithmetic of life insurance as related to premiums, reserves, non-forfeiture values, surplus, and dividends. This is a 15-week course, meeting one night a week for three hours.
ISA 0110  Occupational Safety and Health Hazards
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. It is a program for the education and training of employers and employees in the recognition, avoidance and prevention of unsafe and unhealthful working conditions, and in the effective means for preventing occupational injuries and illnesses.

ITR 0010  Export and Import Practices
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. It provides training for entrance into the export and import business. Preparation of forms for import and export duties and taxes on different classes of merchandise is included.

LAE 0310  Basic Recruit Training for Police Officers
This basic course is designed specifically to provide job entry training to give each student the basic knowledge and understanding required to satisfactorily perform the duties and responsibilities of the police patrol person. Specific areas of instruction include constitutional and criminal law, criminal evidence, court organization and procedures, patrol procedures, criminal investigation, police community relations, traffic control, juvenile procedures, civil disorders, first aid, defensive tactics and firearms training. NOTE: Course is restricted to individuals sponsored with intent of employment by area law enforcement agencies.

LAE 0410  Police Refresher Course
This course is designed to provide supplementary instruction of area law enforcement personnel. Specific areas of instruction include criminal law, criminal evidence, investigations, patrol procedures, traffic control, juvenile procedures, defensive tactics, firearms and first aid.

LAE 0411  Police Intermediate Course
This course is designed to provide supplementary instruction of area law enforcement personnel. Specific areas of instruction include the criminal justice system, law and legal procedures, police community relations, basic police procedures and techniques, police and traffic engineering, and firearms.

LAE 0412  Police Advanced Course
This course is designed to provide supplementary instruction of area law enforcement personnel. Specific areas of instruction include police supervision, basic staff work, advanced police procedures and techniques, and current law and court decisions.

LAE 0413  Police Supervision Course
This course is designed to provide supplementary instruction of area law enforcement personnel. Specific areas of instruction include organization and management, techniques of working with people, plans and development, and personnel selection and training.

LAE 0414  Police Mid-Management Course
This course is designed to provide supplementary instruction of area law enforcement personnel. Specific areas of instruction include organization and management, decision making and planning, working with people, personnel development and evaluation, police records, operations, and current court decisions.

LAE 0415  Police Executive Development Course
This advanced course is designed to provide police administrative officers with an in-depth appreciation of their role and the forces bearing on it. The course provides for analysis of current dimensions of the managerial role to bring new perspectives to analyzing the police administrator's problems. Specific areas of instruction include the nature of managerial responsibility, development of a philosophy of management, development and maintenance of a sound organization and behavioral climate, and the effective use of financial resources.
LAE 0416  Specialized Law Enforcement Training
This course is designed to provide supplementary specialized instruction of area law enforcement personnel. Specific areas of instruction include numerous highly specialized subjects such as investigations of auto theft, burglary, counterfeiting, forgery, gambling, robbery and sex crimes; control of riots and violent civil disorders; crisis intervention; explosives and incendiary devices; forensic pathology and autopsies procedures; and tactical operations.

LAE 0417  Basic Evidence Technician Course
This course is designed to provide area police personnel supplementary specialized instruction required for qualification and assignment as an evidence technician. Specific areas of instruction include crime scene procedures; collection, preservation and identification of physical evidence; crime scene sketching; types of examinations; and photography.

LAE 0422  Tests for Intoxication
The student is instructed in the operation of a precision breath testing instrument and the operational principles and design functional features. In addition, the historical, technical, and legal background surrounding chemical testing is discussed. The procedures for processing a suspect, gathering and recording evidence, and maintaining the chain of evidence are also presented. Note: This course is restricted to in-service law enforcement personnel seeking State (Florida) certification.

LAE 0525  Police Instructor Techniques Course
This course is designed to provide supplementary specialized instruction of area law enforcement personnel. Specific areas of instruction include development of climate for student participation, factors related to student learning, role versus conceptual learning, the instructor's role, course development, demonstrations and use of training aid and resource material, and evaluation techniques.

LAE 0526  In-Service Law Enforcement Training
This course is designed to provide supplementary in-service instruction of area law enforcement personnel. Specific areas of instruction include numerous subjects such as accident investigation, arrest procedures, crime scene procedures, criminal law, first aid, firearms, human relations, juvenile diversion, investigations, organized crime, police discretion, patrol techniques, search and seizure, traffic law enforcement, and uniform crime reporting.

LAE 0527  Auxiliary Law Enforcement Training
This course is designed to provide supplementary instruction of several categories of auxiliary law enforcement personnel, including police reserves, service technicians, civilians supervisors, the various specialized possess, police explorers and parking enforcement specialists. Specific areas of instruction include basic legal for police, administrative of criminal law, investigations, patrol procedures, police community relations, civil disorders, traffic control, defensive tactics, firearms, first aid, and various areas designed for the specific mission of the auxiliary group.

MAG 0010  Techniques of Market Research Interviewing
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The course will train individuals in proper techniques of market research interviewing as a method of determining consumer demand for new or improved products.

MAM 0010  Business Management
This course is designed specifically as supplementary training for persons already employed in the field. It seeks to develop an understanding of the economic and social environment within which business functions. Practice in decision making and management functions is discussed including financial, marketing, production, and legal matters. This is a ten-week course, meeting one night a week for three hours.

MAM 0012  Establishing and Operating a New Business
This course is designed as supplementary training for new and/or prospective managers and/or owners of small businesses. Included in the course are units covering location determination, financing a new business, legal rights, personnel management, market research, and taxation.

MAM 0014  Distributive and Mid-Management Education Seminars
A series of seminars designed as supplementary instruction for persons already employed in such an area of interest as insurance, Real Estate, Transportation, Banking, and Hotel/Motel/Restaurant Operations, to be offered in response to community and/or industry demand at such times and in such places as will permit maximum participation by interested groups.

MAM 0015  Occupational Safety for Supervisors
This course is designed as supplementary instruction for managers, supervisors, and foremen who are already employed in the field and are concerned with occupational safety. This is a ten-week course, meeting one night a week for three hours.

MAM 0016  Motor Fleet Safety Supervisor
This course is designed as supplementary instruction for all levels of management and supervision already employed in the field and responsible for efficient and safe fleet operations. This is a ten-week course, meeting one night a week for three hours.

MAO 0390  EMP Shipfitting
This course is designed to meet the needs of employers and under-employed employees in the shipfitting industry.

MAY 0309  Brick and Blocklaying I
This course is designed specifically for job entry training in laying brick, terra cotta, hollow tile, stone, and similar building blocks in the construction of walls, partitions, arches, fireplaces, chimneys, smokestacks, and other structures.

MAY 0310  Brick and Blocklaying II
Continuation of MAY 0309.

MAY 0311  Brick and Blocklaying III
Continuation of MAY 0310.

MAY 0312  Brick and Blocklaying
This course is designed specifically for supplementary instruction for persons already employed in the field, or in a related field. The student will learn proper procedure for laying brick, terra cotta, hollow tile, stone, and similar building blocks in the construction of walls, partitions, arches, fireplaces, chimneys, smokestacks, and other structures.

MAY 0315  Brick and Blocklaying
This course is designed primarily for apprentice ship instruction and its contents will include training in laying brick, terra cotta, hollow tile, stone, and similar building blocks in the construction of walls, partitions, arches, fireplaces, chimneys, smokestacks, and other structures.

MAY 0390  EMP Brick and Blocklaying
The course is designed to meet the needs of employers and under-employed employees in the brick and blocklaying industry.

MEA 0310  Medical Assisting
The medical assistant course is an intensive course designed specifically for job entry training and planned to orient the individual to a multitude of basic skills in the physician's office. Examples of these skills are secretarial practices and procedures, examining room techniques, and laboratory procedures. The course is one academic year with clinical practice in the physician's office.
MEW 0309  Steel Fabricator I
This course is designed specifically for job entry training in layout, fabrication, erection or installation of steel plate from 3/4" thickness, and stainless steel and aluminum used in ship construction or fuel storage tank fabrication. Instruction and skill development in the use of hand and power tools and machines such as brake, forming rolls and bending and squaring shears, drafting and blueprint reading, related mathematics, layout and material cost estimating, welding, brazing, and flame cutting.

MEW 0310  Steel Fabricator II
Continuation of MEW 0309.

MEW 0311  Steel Fabricator III
Continuation of MEW 0310.

MEW 0312  Steel Fabricator
This course is designed for persons already employed in the field, for supplementary instruction. The student will learn the proper procedure in layout, fabrication, erection or installation of steel plate from 3/4" thickness, stainless steel and aluminum used in ship construction or fuel storage tank fabrication. Included are instruction and skill development in the use of hand and power tools and machines such as brake, forming rolls and bending and squaring shears, drafting and blueprint reading, related mathematics, layout and material cost estimating, welding, brazing, and flame cutting.

MEW 0390  EMP Steel Fabrication
The course is designed to meet the needs of employers and under-employed employees in the steel fabrication industry.

MEY 0390  EMP In-Plant Industrial Training
This course will be designed to meet the needs of the employers and their employees.

MLS 0500  Panorama of Advances in Medical Technology
This course is a seminar on the normal and pathologic physiology of the varied elements of the blood. The student’s knowledge of principles of medical laboratory science will be expanded and updated in this area.

MSH 0003  Machine Shop
This course will include safe work habits, good workmanship, accuracy and job pride. Students will be urged to perform in up-to-date and modern methods of work operations. The course is designed to provide students with both the practical experience and the related information. Emphasis will be on drafting, blueprint reading and related mathematics. A step by step series of lessons will be presented throughout the course. Each student will be given a considerable amount of individual instruction along with manipulative skills. This course is designed primarily for off-campus supplementary instruction.
MSH 0309  Machine Shop Work I  
This course is designed specifically for job entry training in the construction and repair of all kinds of metal parts, tools, and machines, and in the operation of all machine tools, including lathes, milling machines, planers, shapers, and drill presses.

MSH 0310  Machine Shop Work II  
Continuation of MSH 0309.

MSH 0311  Machine Shop Work III  
Continuation of MSH 0310.

MSH 0312  Machine Shop Work  
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. It includes training in the construction and repair of all kinds of metal parts, tools, and machines, and in the operation of all machine tools, including lathes, milling machines, planers, shapers, and drill presses.

MSH 0316  Machinery Repair  
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will receive training in the repair of all types of industrial and specialized power driven machinery.

MSH 0390  EMP Machine Shop  
This course is designed to meet the needs of employers and underemployed employees in the machine shop industries.

MTY 0390  EMP Industrial Mechanics  
This course is designed to meet the needs of employers and underemployed employees in the industrial mechanics field.

NUA 0310  Nurse Assistant  
This course is designed to prepare a non-professional worker with the finger tip skills to perform selected activities under the direct supervision of the registered professional nurse. This is an eight-week course.

NUR 0510  Seminar for Licensed Practical Nurses  
Theory, practice and supplementary instruction to refresh, update, and enhance the knowledge and skills of Licensed Practical Nurses through individual and group experiences.

NUR 0512  Nursing Seminar  
This seminar is designed to upgrade the skills of the Registered and/or Licensed Practical Nurse. The student will be introduced to current nursing trends and problems and participate in the development of solutions in conjunction with instructors.

NUR 0515  In-Service Training for Nursing Faculty  
This course is designed as supplementary instruction for persons employed in the field of nursing. Participants will receive training in the type of curriculum used in medical programs, current and innovative medical practices and procedures, the learning styles and philosophy of students enrolled in medical programs and guiding aspects, including the philosophy of the Associate Degree in Nursing Program.

OCO 0005  Career Guidance  
This course leads to understanding of one's educational and occupational strength in relationship to career requirements and opportunities, which lead to the formation of realistic plans for the immediate future and to consideration of the effects of technological change upon the individual in the long range future.

PCL 0390  EMP Basic Pest Control  
This course is designed to meet the needs of employers and underemployed employees in the pest control industry.

PDE 0317  Jacksonville Drywall Decorators and Painters Apprenticeship  
This course covers the technical aspects of painting, paper hanging and drywall finishing. The painting section covers methods of application of types of paint, soil preparation and material makeup and lining. The paper hanging section covers materials and surface preparations. The drywall section covers tools and methods of application.

PET 0010  Service Station Management  
This course is designed specifically as supplementary training for service station managers and owners. It covers the basic principles involved in this type of occupation. Items such as customer relations, accounting, servicing, and product control are discussed.

PFF 0309  Plumbing and Pipefitting I  
This course is designed specifically for job entry training in the assembly and installation of air, gas, water and waste disposal systems, including the cutting, reaming, and threading of pipe, caulk and wigging joints, and the installation of gas, water, and sanitary fixtures and equipment with their supports, hangers, or foundations.

PFF 0310  Plumbing and Pipefitting II  
Continuation of PFF 0309.

PFF 0311  Plumbing and Pipefitting III  
Continuation of PFF 0310.

PFF 0312  Plumbing and Pipefitting  
This course is designed as supplementary training for persons already employed in the field, or in a related field. The student will be trained in the assembly and installation of air, gas, water and waste disposal systems, including the cutting, reaming, and threading of pipe, caulk and wigging joints, and the installation of gas, water and sanitary fixtures and equipment with their supports, hangers, or foundations.

PFF 0315  Plumbing and Pipefitting  
This course is designed primarily for apprenticeship instruction and its contents include training in the assembly and installation of air, gas, water and waste disposal systems, including the cutting, reaming, and threading of pipe, caulk and wigging joints, and the installation of gas, water and sanitary fixtures and equipment with their supports, hangers, or foundations.

PFF 0390  EMP Plumbing  
This course is designed to meet the needs of employers and underemployed employees in the plumbing industry.

PFF 0395  EMP Pipefitting  
This course is designed to meet the needs of employers and underemployed employees in the pipefitting industry.

PRN 0310  Practical Nursing  
This course is designed to prepare individuals in 12 months to share in giving direct care to patients in the hospital, nursing home, or home. A minimum of 1,300 hours (650 hours theory, 650 hours clinical laboratory) is required to complete the program. Classes are admitted twice annually. A high school education and successfully passing an aptitude test are required. The program is accredited by the State Department of Education and the Florida State Board of Nursing. Persons who successfully complete the course are eligible to write the State Board Test Pool Examination to qualify for licensure to practice as a Licensed Practical Nurse and to use the title of LPN.

PTR 0010  Career Development  
This course will teach specific skills, including job search technique, job interview technique, salary negotiation and resume writing to those seeking to re-enter the job market and to those seeking to upgrade present positions. It is designed to help participants discover and focus on their hidden skills.
PTY 0003  Photography and Photo-Finishing
A basic study in making photographic negatives for making prints using student cameras and training in the developing, retouching, and mounting of photographic prints. All materials are to be furnished by the student. This course is designed primarily for off-campus supplementary instruction. Four lab hours, two theory hours per week.

PTY 0312  Photography and Photo-Finishing
This course is designed for persons already employed in the field, or in a related field, for supplementary instruction. The student will receive training in the making of photographic negatives from which prints can be developed, using studio-type and other cameras and training in the washing, drying, trimming, mounting of photographic prints, retouching prints and covering imperfections and in surface finishing of prints. Lab hours per week—four; theory hours per week—two.

QFO 0312  Meat Cutting
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will learn the proper procedure involved in the complete break-down of animal carcasses and preparation of meat cuts for display and sale. The training is given on the job in actual market situations.

RES 0210  Mortgage Broker—Mortgage Lending
This course is designed specifically as supplementary training for persons employed in a related field. It offers an exposure to the principles and techniques of mortgage financing and brokerage operations and a background study of the Florida Mortgage Brokerage Act. This is a ten-week course, meeting one night a week for three hours.

RES 0211  Real Estate Principles and Practices
This course is designed specifically as supplementary training and is intended to orient students with the knowledge and understanding of legal and ethical principles necessary for the real estate profession to continue to elevate itself for the protection of the public and to enable the real estate practitioner to enjoy the privileges due the practitioner by the Florida Real Estate Commission. Classes are available one day a week for fifteen weeks, three hours per class. This course, when successfully completed, fills the educational requirement enabling an individual to apply for the real estate salesmen's State examination.

RES 0212  Real Estate Law
This course is designed specifically as supplementary training for persons employed in a related field. It is designed to give the student full legal, detailed expositions of every aspect of modern real estate transactions. It not only provides one with expert analysis of every type of real estate transaction, but describes all the new trends and developments. This is a 10-week course, meeting one night a week for three hours.

RES 0213  Real Estate Sales Promotion
This course is designed specifically as supplementary training and covers all phases of the various ethical techniques used in selling real estate. Fundamental concepts concerning human relationships and various methods used in advertising and promoting the sale of real estate are included. This is a 15-week course, meeting one night a week for three hours.

RES 0214  Real Estate Appraisal
This course is designed specifically as supplementary training and is an intensive course that has been developed to impart a broad understanding of real property appraisal concepts and to teach technical skills employed in their applications to residential properties. It is also designed to give the experienced real estate practitioner a basic knowledge of appraisal fundamentals. This is a 15-week course meeting one night a week for three hours.

RES 0215  Real Estate License Law
RES 0211, Real Estate Principles and Practices, is a prerequisite for this course. This course is designed specifically as supplementary training and prepares the student for the Florida Real Estate License Examination for salespersons, and as a reference text for Real Estate Principles and Practices. It gives the background of the law regarding the Florida Real Estate Commission and goes on to explain the operation, requirements, and procedure of the real estate office. This is a 15-week course, meeting one night a week for three hours.

RET 0110  Techniques in Team and Individual Indoor and Outdoor Sports Activities
The course includes a combination of theory, laboratory, and work experience or field experience in team and individual sports, both indoor and outdoor activities.

RRO 0317  Apprenticeship Residential and Industrial Roofing
This course is designed to meet the needs of contractors and apprentices in the residential and industrial roofing industry.

RTV 0309  Electronics, Radio & TV I
This course is designed specifically for an entry training and includes fundamentals of electronics and training in the installation, testing, adjusting, and repair of industrial electronic equipment to include repair of radio and television receiving equipment. Additional instruction in radio transmitting equipment will be offered to those students who complete this course.
RTV 0310  Electronics, Radio & TV II
Continuation of RTV 0309.

RTV 0311  Electronics, Radio & TV III
Continuation of RTV 0310.

RTV 0312  Electronics, Radio & TV
This course is designed as supplementary training for persons already employed in the field, or in a related field. The student will receive instruction in the fundamentals of electronics and training in the installation, testing, adjusting, and repair of industrial electronic equipment to include repair of radio and television receiving equipment. Additional instruction in radio transmitting equipment will be offered to those students who complete this course.

SAM 0003  General Business I  High School Cr. ½
This course is designed to develop an understanding of some of the characteristics of our economic system and an appreciation of how our economy is changing. The student will develop an understanding of how most of our economic needs and wants are met through businesses that operate within the framework of the American economic system. Included is a study of services provided by banks, stores, credit agencies, insurance companies, investment firms, savings institutions, transportation companies, and other enterprises.

SAM 0005  General Business II  High School Cr. ½
Prerequisite: RUS 0003. This course is designed to develop an understanding of how businesses, governments, workers and individual nations must depend on each other in varying degrees for economic growth and well-being. Emphasis is placed on how each student can plan for a successful future in our economic world.

SAM 0010  Supervisory Training
This course is designed as supplementary instruction for persons already employed in a related field. The course consists of planned learning experiences which include a study of the basic principles of supervision and how to apply these principles in practice. It covers supervision, human relations, job advancements, and the development of other supervisory skills.

SEO 0210  Basic Security Officers Training Course
This course is designed specifically as supplementary training and covers a variety of areas considered to be directly related to security work. Areas such as firearms, first aid, arrest techniques, and search and seizure are discussed.

SHM 0309  Sheet Metal I
This course is designed specifically for job entry training in fabricating, assembling, altering, repairing, and installing sheet metal articles and equipment.

SHM 0310  Sheet Metal II
Continuation of SHM 0309.

SHM 0311  Sheet Metal III
Continuation of SHM 0310.

SHM 0312  Sheet Metal
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will receive training in fabricating, assembling, altering, repairing, and installing sheet metal articles and equipment.

SHM 0315  Sheet Metal
This course is designed primarily for apprenticeship instruction and its contents include training in fabricating, assembling, altering, repairing, and installing sheet metal articles and equipment.

SHM 0390  EMP Sheet Metal
This course is designed to meet the needs of employers and underemployed employees in the sheet metal industry.

STO 0310  Surgical Technician
This course is designed to prepare students in nine months to function as a member of the surgical team in a hospital operating room under the direct and continuous supervision of qualified professional nurses and surgeons. The course consists of theory and practical training in the application and principles underlying the care of patients in the operating room. A certificate will be awarded upon completion of the course. Particular emphasis is placed upon the skills involved in scrubbing and circulating during surgical procedures and in the preparation and maintenance of sterilized and unsterilized supplies.

STS 0020  Medical Terminology
Medical Terminology is designed as supplementary training for persons already employed in a related field and is a study of the development of a medical vocabulary commonly used in physicians' offices. Emphasis is given to the pronunciation and anatomic terms and organic systems.

STS 0110  Basic Business Shorthand
This course is designed specifically as supplementary training for persons employed in related fields. It is an introductory course in principles and skills of shorthand designed to meet the minimum standards of performance in shorthand and transcription comparable to those in local business offices.

STS 0112  Intermediate Shorthand & Transcription
This course is designed for persons already employed in a related field as supplementary instruction. The course will require the student to review the principles of Gregg Shorthand, to develop further the student's ability to spell words and to proofread, to develop the mechanics of English, to handle the problems of office dictation, and to teach efficient transcription techniques.

STS 0113  Advanced Shorthand & Transcription
This course is designed as supplementary instruction to integrate shorthand, English, and typewriting skills and to develop the student's ability in producing transcripts.

STS 0116  Beginning Shorthand I  High School Cr. ½
Prerequisite or corequisite: TYG 0120. This is a beginning course in the principles of Gregg Shorthand. Emphasis is placed on theory and basic dictation and transcription practices.

STS 0117  Beginning Shorthand II  High School Cr. ½
Prerequisite: STS 0116 or equivalent. This course is a continuation of Beginning Shorthand I with increased emphasis on dictation and transcription.

STS 0118  Advanced Shorthand and Transcription I  High School Cr. ½
Prerequisite: STS 0117 or equivalent. This course is designed to review Gregg Shorthand theory and to develop the ability to transcribe rapidly and accurately. Emphasis is placed on mastery of English mechanics also.

STS 0119  Advanced Shorthand and Transcription II  High School Cr. ½
Prerequisite: STS 0118. This course covers accelerated dictation and transcription with emphasis on the finished product.

STS 0125  Machine Shorthand
This course is designed specifically as supplementary instruction for persons already employed in a related field. The student will be trained in touch shorthand and the use of the stenograph machine. Course consists of theory and practice.
STS 0130  Office Occupations
Instruction is based on secretarial needs and is intended to provide training, specifically in the clerical and stenographic fields. The instruction is designed specifically for job entry training and is geared to individuals having little or no previous secretarial training. It provides the best opportunity for individual progress. This course includes Typing, Shorthand, Business English, and on a concurrent basis, instruction is provided in Office Machines, Office Procedures, Bookkeeping and Business Mathematics. The class will meet during Fall, Winter, and Spring Terms (I, II, and III) on a daily basis.

STS 0132  Office Occupations
Instruction is based on secretarial needs and is intended to provide training, specifically in the clerical and stenographic fields. The instruction is designed for supplementary training and is geared to individuals having little or no previous secretarial training. It provides the best opportunity for individual progress. This course includes Typing, Shorthand, Business English, and on a concurrent basis, instruction is provided in Office Machines, Office Procedures, Bookkeeping, and Business Mathematics.

STS 0135  CPS Review Course
This is a course designed as supplementary instruction to prepare students to take the examination for Certified Professional Secretaries. A two-term course, it will cover Environmental Relationships; Business and Public Policy; Economics of Management; Financial Analysis and the Mathematics of Business; Communications and Decision Making; and Office Procedures. Time segments for each of the areas will be established as needed within the terms.

STS 0140  Word Processing—Magnetic Typewriter Keyboard
This course includes supplementary instruction in the function and use of the magnetic typewriter keyboard in the development of basic business documents. Students will learn to operate the automated equipment including record, playback, to correct and revise documents, instruction in the logging and filing systems for the automated equipment will be included.

STS 0142  Word Processing—Memory Typewriter
This course is designed to integrate the typewriter keyboard skills. The student will be trained in the operation and use of the memory typewriter together with filing and logging systems for stored typewritten information.

TPF 0003  Garment Making, Commercial
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will receive training in the commercial design, pattern cutting, and making of any kind of clothing.

TPF 0309  Tailoring I
This course is designed specifically for job entry training in commercial tailoring of garments such as suits, topcoats, overcoats, and dress clothes, and performing the more difficult hand and machine sewing tasks involved in alterations.

TPF 0310  Tailoring II
Continuation of TPF 0309.

TPF 0311  Tailoring III
Continuation of TPF 0310.

TPF 0312  Tailoring
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will receive training in commercial tailoring of garments such as suits, topcoats, overcoats, and dress clothes, or performing the more difficult hand and machine sewing tasks involved in alterations.

TRA 0210  Traffic Management Rates I
This course is designed specifically as supplementary training for persons employed in a related field. It is a general introduction to the transportation field, developments leading to national legislation and federal regulation, division of territories, official descriptions, etc., scope of authority of territorial associations, factors controlling traffic flows, basis governing classification rules, principles of freight rates and tariffs and elements of rate making, shipping documents and their application, outline of special freight services, and freight claims. This is a 15-week course, meeting one night a week for three hours.

TRA 0211  Traffic Management Rates II
This course is designed specifically as supplementary training for persons employed in a related field. It includes an application of tariff circulars; construction and filing of tariffs (tariff compilation); freight rates and tariffs, special freight services; i.e., switching, terminal facilities demurrage and storage, average agreement, reconsignment and diversion, various transit privileges, embargoes, warehousing and distribution; and materials handling. This is a 15-week course, meeting one night a week for three hours.

TRA 0212  Traffic Management Rates III
This course is designed specifically as supplementary training for persons employed in a related field. It includes through routes and through rates; application of arbitrations and differentials, advanced billing in transit; import and export traffic; technical tariff and rate interpretation; advanced claim adjustments; and rate and classification committee procedure. This is a 15-week course, meeting one night a week for three hours.

TRA 0213  Traffic Management Rates IV
This course is designed specifically as supplementary training for persons employed in a related field. It includes a general discussion of the construction and application of the Interstate Commerce Act and practice before the Interstate Commerce Commission. This is a 15-week course, meeting one night a week for three hours.
TRA 0214  Economics of Transportation
This course is designed specifically as supplementary training for persons employed in a related field. It covers developments in the transportation industry, decisions of the courts and regulatory bodies, new technological developments, railroad management policies; adjustment of rates; public policy questions; and major problem regulation. Completion of this course partially covers requirements for certification by the American Society of Transportation and Traffic. This is a 15-week course, meeting one night a week for three hours.

TRA 0215  Rate Clerk
This course is designed specifically as supplementary training for persons employed in a related field. The student will study tariffs and rate structures. Included are descriptions of rate territories, how various freight is classified by each mode of transportation, and how to apply applicable tariffs. The course is designed to instruct new rate clerks in selection of lowest costs that will provide required shipping service. Also included are rules of tariffs, rate making procedures, and use of shipping documents.

TRA 0216  Interstate Commerce Law Practice
This course considers all aspects of Interstate Commerce Law and Practice. Topics include review of Interstate Commerce Act, general rules and practice, Interstate Commerce Commission, and Supreme Court cases. This course is designed specifically as supplementary training and directs one toward preparation for the ITC Practitioner exam. This is a one-year course, meeting one night a week for three hours.

TYG 0110  Basic Typewriting
This course in typewriting for business use is designed specifically as supplementary training to assist persons employed in a related field to acquire mastery of the keyboard and to develop the ability to type personal and business letters accurately and in good form.

TYG 0112  Advanced Typewriting
This course is designed as supplementary instruction to develop sufficient skills, techniques, and knowledge in the use of the typewriter for the student to work in a business office, in a clerical or stenographic position.

TYG 0120  Basic Typewriting I  High School Cr. ½
This course is designed to assist students in acquiring mastery of the keyboard for job entry training and for personal use. Basic typing skills and applications include centering, tabulating, personal and business communications, themes, outlines, report manuscripts, and inventory measurements.

TYG 0122  Basic Typewriting II  High School Cr. ½
Prerequisite: TYG 0120. This course is designed to continue improving basic typing skills. Applications included are personal and business letters, tabulations, manuscripts and reports.

TYG 0124  Advanced Typewriting I  High School Cr. ½
Prerequisite: TYG 0122. A continuation of basic skills in speed and accuracy with emphasis on production typing of special tables and columnar reports, business letters and envelopes, special correspondence, and business forms, reports, and manuscripts.

TYG 0126  Advanced Typewriting II  High School Cr. ½
Prerequisite: TYG 0124. A continuation of production typing with emphasis on reliability of business correspondence and reports as used in a typical office situation.

UPH 0309  Upholstering I
This course is designed specifically for job entry training in installing, arranging, and securing springs, padding, and covering materials such as cloth or leather to frames of overstuffed chairs, dayports, and stationary seats, including automobile seats.

UPH 0310  Upholstering II
Continuation of UPH 0309.

UPH 0311  Upholstering III
Continuation of UPH 0310.

UPH 0312  Upholstering
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will receive training in installing, arranging, and securing springs, padding, and covering materials such as cloth or leather to frames of overstuffed chairs, dayports, and stationary seats, including automobile seats.

UPH 0309  EMP Upholstery
This course is designed to meet the needs of employers and underemployed employees in the upholstery industry.

WAC 0310  Warehouse Clerk
This course is designed specifically as supplementary training for persons employed in a related field. It includes instruction and training in receiving, storing, issuing, shipping, requisitioning, and accounting for stores of materials. Assigning locations and space of items, including verification of quality, identification, condition, and value. The physical handling of items, including binning, picking and stacking, and counting. Preparing or committing stocks for shipment, inventory stock, replenishing depleted items, filling orders, and issuing tools, equipment, or materials to workers.

WEL 0309  Welding I
This course is designed specifically for job entry training in fusing metal parts by means of oxyacetylene torch or electric welding apparatus and welding rods to fabricate metal articles or to repair damaged metal objects.

WEL 0310  Welding II
Continuation of WEL 0309.

WEL 0311  Welding III
Continuation of WEL 0310.

WEL 0312  Welding
This course is designed as supplementary instruction for persons already employed in the field, or in a related field. The student will receive training in fusing metal parts by means of oxyacetylene torch or electric welding apparatus and welding rods to fabricate metal articles or to repair damaged metal objects.

WEL 0315  Welding
This course is designed primarily for apprenticeship instruction. The student will receive training in fusing metal parts by means of oxyacetylene torch or electric welding apparatus and welding rods to fabricate metal articles or to repair damaged metal objects.

WEL 0390  EMP Welding
This course is designed to meet the needs of employers and underemployed employees in the welding industry.

WOC 0103  Cabinet and Furniture Making
This course is designed as supplementary instruction for persons already employed in the field or in a related field. The student will receive cabinetmaking and furniture making training in hand carpentry necessary to cut, shape and assemble furniture, fixtures, cabinets, doors and window frames, and finish interior woodwork.

WOC 0309  Cabinetmaking and Millwork I
This course is designed specifically for job entry training in the use of cabinetmaking machines to build various cabinets, furniture, counters, architectural moldings, etc.

WOC 0310  Cabinetmaking and Millwork II
Continuation of WOC 0309.

WOC 0311  Cabinetmaking and Millwork III
Continuation of WOC 0310.

WOC 0312  Cabinetmaking & Millwork
This course is designed as supplementary instruction for persons already employed in the field or in a related field. The student will receive training in the use of cabinetmaking machines to build various cabinets, furniture counters, architectural molding, etc.
ADULT AND CONTINUING EDUCATION COURSES

AAC 0001  Bookkeeping  High School Cr. 1
An introductory course of basic principles, concepts, and knowledge required for practical bookkeeping in everyday living.

ANA 0001  Anatomy  High School Cr. 1
Introduction to the organization of the structure and functional characteristics of man. A study of the morphological changes which occur from a cellular and subcellular level to the whole organism.

ART 0001  Art Appreciation  High School Cr. 1
A study of the art of significant periods, its contribution to civilization, aesthetic and human values.

ART 0003  Fundamentals of Art  High School Cr. 1
A study of the fundamentals of drawing and painting, concepts of drawing principles and composition, and a study of techniques.

ART 0005  Oil Painting  High School Cr. 1
Techniques of oil painting, color theory, and creativity. Students are required to purchase all materials needed for the course.

BIO 0001  General Biology  High School Cr. 1
A study of the origin, development, structure, functions, and distribution of plants and animal life.

BIO 0002  Health Science  High School Cr. 1
This course is a study of the human body, including the skeletal system, muscular system, digestive system, circulatory system, respiratory system, nervous system, excretory system, urinary system, and the reproductive system. Also included in this course are safety and first aid.

BLC 0001  Afro-American History  High School Cr. 1
This course is designed to provide evidence that the culture of Afro-Americans is one in which all Americans can take pride. It is hoped that black students will be aided in their development of self worth and dignity.

BUS 0001  General Business  High School Cr. 1
A non-vocational course intended to provide the adult student with a basic understanding of general business practices as they relate and have application to the everyday business affairs of the lay citizen.

CED 0005  Consumer Education Law  High School Cr. 1
This course is designed to provide low-income residents with basic facts regarding the laws of daily living in a community. It has been organized to interpret the law in a comprehensive and easily understood manner. It will deal primarily with the laws that govern the lives of low-income and underemployed citizens. The course will assist these citizens to know what legal help is available to them.

CHE 0001  Chemistry  High School Cr. 1
Course covers the areas of elements and compounds, oxygen and hydrogen, water and solutions, carbon and its oxides, and acids, bases and salts.

CHI 0001  Chinese  High School Cr. 1
This course is adapted to the needs and interests of adults who wish to acquire a speaking and oral comprehension ability in introductory Chinese.

COP 0001  Community Emergency Preparation  High School Cr. 1
This course is designed to prepare individuals for rendering essential community services on a voluntary basis in time of serious emergency or disaster.

CSE 0001  Reach for Recovery (Mastectomy)  High School Cr. 1
Women experience a radical alteration in their bodies as a result of mastectomies. Many experience drastic changes in their self-image and in their personal and social lives as well. Some find this experience to be extremely traumatic and continue to find it so months after surgery. This course will help women in their reach for the recovery of their emotional and mental well being through group discussion, and leadership from members of the medical community.

DRA 0001  Drama  High School Cr. 1
Planning and execution of production functions: scene construction and painting, props, costuming, lighting and other full technical responsibilities.

DRT 0101  General Shop, Drafting I  High School Cr. 1
An introduction to the broad field of drafting as used in everyday living, architecture, engineering or construction for general technical use. The laboratory work provides opportunities for students to learn to make and use drawings. It includes the uses of drawings in industries and occupations such as sheet metal, machine shop, plumbing, electricity and electronics.

DRT 0103  General Shop, Drafting II  High School Cr. 1
A second course in drafting in which students specialize in one of the major areas of drafting such as mechanical, architectural, or engineering work. This course presents advanced study of the theory of shape and size description and the geometry of drawing, and provides extensive opportunities for practicing the development and reproduction of working drawings.

ECO 0001  Economics, How to Get A Job  High School Cr. 1
This course offers insight into one's abilities, limitations, interests, aptitudes, and personal traits. It shows students how to set and achieve job goals commensurate with one's ability, background, and interests. Emphasis is on building self-confidence of unemployed/underemployed members of minority groups.

ECO 0002  Family Finance  High School Cr. 1
This course is designed to assist adults in developing mathematical abilities along the lines needed for the solution of day-to-day problems involving their personal business affairs, and local costs of living. It involves primarily a study of budgeting, banking, computation of interest, income tax preparation, installment buying, insurance, wages and related business activities of lay citizens, to enable them to maintain or improve established standards of living.

ECY 0001  Environmental Control Awareness  High School Cr. 1
This course is designed to give the student insight into the causes, problems and solutions of air, water, and noise pollution. The overall theme of the course is based on making the student aware of the delicate ecological balance which pollution control attempts to maintain. Upon successful completion of this course, the student should have sufficient depth in the area of environmental control to adequately instruct others in the basis of environmental control.

ECY 0003  Nature Study and Conservation  High School Cr. 1
The study of nature through personal exploration of remaining wilderness tracts. Students will learn backpacking and wilderness camping techniques vital to personal safety and will participate in field trips designed to acquaint the student with problems concerning our dwindling natural resources.
ECY 0004 Our Environmental Crisis
This course is designed to provide insight into the problems and solutions of air, water, and noise pollution. Class will be made aware of the delicate balance of the ecology, interaction of the biological and social environment, and how pollution control can maintain that balance.

EDU 0080 Adult Education Institute
This course provides training for those interested in teaching adult basic education, understanding the psychology of the adult learner, the type of curriculum, current methods and techniques practiced in the field, and guiding aspects, including an analysis of community resources.

EDU 0062 Preparation for the Armed Services Entrance Examination
This course will provide the theory, rationale and sample material similar to that found in the Armed Forces Entrance Examination.

EDU 0084 Educational Trends and Practices
This course is designed for persons employed in an educational field and will cover current and innovative educational techniques, curriculum design, and learning theories.

EFL 0001 English for Foreign Born
English for the alien is a class designed for students who have difficulty with the English language. This course is especially designed for new arrivals in the United States.

ENG 0001 English Grammar
High School Cr. 1
This course is designed to meet the needs of high school students and adults to further their mastery of basic, fundamental concepts of English grammar.

ENG 0002 Reading Techniques
High School Cr. 1
This is a developmental course which emphasizes basic reading skills and comprehension.

ENG 0003 Speed Reading
High School Cr. 1
An advanced course designed to increase reading speed and further improve reading skills and comprehension.

ENG 0004 Creative Writing
High School Cr. 1
This course is designed to encourage students to express their thoughts and to improve self-confidence in the use of language. Students enrolling must possess a certain skill with language and grammar and must have a desire to write. Knowledge will be gained in methods of writing both fiction and non-fiction.

ENG 0005 How to Succeed in College
High School Cr. 1
This course is designed for the immediate high school graduates to assist them in making an easier adjustment to the college environment. The course is offered in two parts: speed reading and college guidance.

ENG 0006 English I
High School Cr. 1
English 2200, a programmed course in grammar and usage, is designed to introduce students to grammar, sentence building, correct usage, and punctuation. It is further designed to provide a quick recapitulation of the elements of language.

ENG 0007 English II
High School Cr. 1
English 2600 provides a programmed approach to mid-level high school grammar and usage. It offers one-step-at-a-time learning with written responses which require both thinking and recall. The accompanying textbook provides frequent opportunity for students to evaluate their progress and to coordinate the various segments of instructional material covered. An expanded study is provided of the basic parts of speech, the role of modifiers, effective sentence structure, subject-verb agreement, all phases of punctuation, and related grammatical techniques.

ENG 0008 English III
High School Cr. 1
English 3200 provides a programmed approach to an in-depth study in grammar and usage. It consists of more than 3,200 very carefully arranged frames which enable the students to reason their way through one-step-at-a-time. Strictly senior level. English 3200 requires a good prior command of the basic grammatical processes. Sentence patterns — simple, compound, and complex — are explained along with other grammatical techniques leading to smooth sentence structure. Solutions are offered to the more advanced problems often related to effective use of the parts of speech. Skills with graphics are covered in a manner preparatory to college entrance.

ENG 0010 Developmental Writing
High School Cr. 1
The purpose of this course is to help the student develop skill in expressing thoughts clearly and concisely. This is primarily a writing course, requiring that the student already have a substantial background in grammar. A grade average of C in English 2600 (or its equivalent) is a prerequisite.

ENG 0011 Grammar/Composition
High School Cr. 1
This course is designed to provide the student with specialized training in writing. Learning experiences are built on the foundation of standard English grammar, the framework of communication. The principles of grammar presented in the course are functional. Numerous practice exercises are provided within each unit so that the students will be able to master the principles as they study. Principles of spelling, punctuation, capitalization, abbreviation, and number style are taught as tools to be used by the writer in order to guide readers into correct, clear interpretations of the message.

ENG 0012 Grammar/Composition
High School Cr. 1
This course is designed to provide the student with specialized training in writing. These learning experiences are built on the foundation of standard English grammar, the framework of communication. The principles of grammar presented in the course are functional. Numerous practice exercises are provided within each unit so that the students will be able to master the principles as they study. Principles of spelling, punctuation, capitalization, abbreviation, and number style are taught as tools to be used by the writer in order to guide the readers into correct, clear interpretations of the message.

ENG 0015 Basic Reading Techniques I
High School Cr. 1
A diagnostic, prescriptive course in reading designed to begin at the student's level in rate and comprehension. Phoneme-grapheme (sound-symbol) relationships, words in context, structural analysis, sight words, and dictionary pronunciation and meaning are stressed in building vocabulary. Detecting sequence, following directions, and recognizing topics and main ideas are studied in building comprehension. Instruction is conducted individually and in groups. A wide variety of machines and materials are available to achieve a grade level of 8.5 in reading.

ENG 0017 Developmental Reading Techniques II
High School Cr. 1
A diagnostic, prescriptive course designed to develop the student's vocabulary and comprehension. Efforts are concentrated on developing reading skills essential for generalized high school materials. Reference sources, the use of the library, the SQ3R study method, and outlining, are stressed for use in the content areas. Group and individual instruction and a variety of machines and materials are available to achieve a grade level of 10.5 in reading. Prerequisite: Reading Techniques I (Basic) or equivalent grade level of 8.5 in reading.

ENG 0019 Advanced Reading Techniques III
High School Cr. 1
A diagnostic and prescriptive course designed to provide the students with an opportunity to increase their power in critical reading, technical vocabulary in rate of efficiency. Memory improvement, skimming and scanning, and test-taking techniques are stressed. Group and individualized instruction and a variety of machines and materials are available to achieve a grade level of 12.5 in reading. Prerequisite: Developmental Reading Techniques II or equivalent grade level of 10.5 in reading.
ESY 0001  Driver Education for the Physically Handicapped  High School Cr. 1
This course is designed for the physically handicapped, and may be taught as a classroom subject, as a "behind the wheel," subject, or a combination of both methods. The course may include traffic laws, safe driving habits, defensive driving techniques, basic automotive operations, and actual driving practice with a driving instructor.

ESY 0003  Safety Education
This course is designed to cover the principles and information related to individual, home, and public safety.

FAR 0005  Teaching Your Children About Sex
A course designed to enable parents and prospective parents to deal more effectively and honestly with children's questions about their own sexuality.

FRE 0001  French  High School Cr. 1
This course is adapted to the needs and interests of adults who wish to acquire a speaking and oral comprehension ability in introductory French.

GEO 0001  Geography  High School Cr. 1
A general course in geography which includes a study of the physical, economic, political, and cultural aspects of important geographic areas and people, and their influence on world conditions and problems.

GER 0001  German  High School Cr. 1
This course is adapted to the needs and interests of adults who wish to acquire a speaking and oral comprehension ability in introductory German.

GEY 0001  Geology  High School Cr. 1
Geology is the study of the crust of the earth including the bottom of the oceans and paleoclimatology. The geology student is to develop an understanding of earth materials and how these materials are changed and modified through the action of natural forces over a period of time.

GRA 0101  General Shop Graphics  High School Cr. 1
This course is an introduction to the field of graphics involving various media and forms and provides a non-vocational approach to the study of printing, drawing, and related areas.

HEN 0002  Personal Safety
This course is designed to provide skills, knowledge, training, and information in securing one's personal safety in the home as well as self-defense and street safety.

HEN 0003  Education for Parenthood
A series of classes for expectant mothers and fathers to study maternity care, parental adjustment, baby needs, and physical preparation for pregnancy, labor, and postpartum periods. Expectant mothers must have their doctor's permission to enroll and must be in the last three months of pregnancy.

HEN 0004  Early Pregnancy Preparation Class
This course is designed for mother-to-be in the early months of pregnancy. The course will cover exercises, physical fitness, nutrition, and baby care.

HEN 0005  Education for Parenthood Refresher
This is a four-week course designed for expectant couples who have previously taken the Education for Parenthood course during an earlier pregnancy. It provides a review of the relaxation and breathing techniques to be used during labor and delivery, as well as an introduction to any recent developments in childbirth education.

HEN 0006  Continuing Education for Parenthood
A course designed to help new parents cope with the unexpected problems which arise as a result of a new baby, including child development, sibling problems, illnesses, family adjustments, and baby care. No one particular course of action is recommended, but many options are presented to the couples. Open discussion and exchange of ideas is encouraged.

HIS 0001  History  High School Cr. 1
History is offered to meet the needs of adult students in special areas significant in the development of our civilization.

HIS 0002  Citizenship Education for Foreign Born  High School Cr. 1
This course is designed to acquaint prospective citizens with United States History, the Constitution and its historic background, the organization of local, state, and federal governments; to promote understanding and appreciation for ideals, privileges and responsibilities of democratic citizenship; and to prepare individuals for the examination administered by immigration and naturalization authorities.

HIS 0003  Problems of Democracy  High School Cr. 1
Materials covered in this course show how and why the historical problems are vital in contemporary thinking.

HIS 0004  World History  High School Cr. 1
A survey of European and Asiatic History. Explains the world today by showing the political, economic, and social development in the United States from Colonial days to the present.

HIS 0005  American History  High School Cr. 1
Emphasis is placed on political, economic, and social development of the United States from Colonization to the present.

HIS 0006  American History  High School Cr. ½
Emphasis is placed on political, economic, and social development of the United States from Colonization to present.

HUM 0001  Introduction to the Humanities  High School Cr. 1
An inter-disciplinary introduction to the creative arts. Course will examine in a general way the fundamental elements of the visual arts, music, letters, films, and electronic media, and the way humanists have used these in expressing themselves.

IDS 0001  Adult Basic Education
This course provides instruction in the elementary skills of reading, writing, arithmetic, spelling, social studies, health, science, and art for adults who desire a foundation of study at the secondary level.

IDS 0003  General Education
Instruction in general education subjects, includes elementary and secondary levels. This offering is designed to accommodate the needs of a class which consists in part of individuals who are on the high school level.

IDS 0005  High School Review
An intensive review of the four major academic areas of English, Mathematics, Social Studies, and Science on the secondary level in preparation for GED examinations that lead to the high school equivalency diploma.

IDS 0007  GED Testing Skills Seminar
The GED Testing Skills Seminar will provide critical, to-the-point information about the High School Equivalency Examination to persons who have enrolled to take the test at the next available date. The professor will not attempt to teach content in this seminar, but rather the goal will be to familiarize students with the general format of the test, and with what types of questions will be asked. During the course of the seminar, students will be given the GED test philosophy, statistics regarding the exam, and actual brief testing experience, guidelines for successful test-taking in general, and an opportunity to discuss any questions they may have about the exam.
INR 0023  International Relations
A study of the nature of the international political system with emphasis on the concepts of national interest and power with respect to the relations of nation-states; examination of the function and role of international organizations.

ITA 0001  Italian  High School Cr. 1
This course consists of pronunciation, elements of grammar, simple conversation exercises, reading, and composition. Visual and auditory aids are employed.

LAT 0001  Latin I  High School Cr. 1
This course is designed to develop a basic vocabulary; proper pronunciation, and correct grammatical patterns.

LAW 0001  Law for the Lay Person  High School Cr. 1
The purpose of this course is to acquaint the lay person with the various phases of law that affect everyday life, regardless of occupation or profession. Included are topics such as contracts, sales, business law, personal property transaction, real property, domestic relations, the courts and law, negotiable instruments, agents, wills and other aspects of law needed to assist the lay person.

LIS 0001  Library Science  High School Cr. 1
This course is designed to introduce the students to all of the resources of the media center, both printed and non-printed, which will aid them in becoming effective users of any library.

LIT 0001  Literature  High School Cr. 1
Reading and discussion of literature by English authors from the Anglo-Saxon period through the modern age.

LIT 0002  Literature—Great Books  High School Cr. 1
This course is designed to study distinctive characteristics of Hebrew and Christian literature and make comparisons with other well-known literary works by world authors. Experiences are enlarged through the recognition of allusions, Biblical themes, word origins and vocabulary study, and of literary structures. Unusual sentence structure and punctuation are noted. Provisions for individual expression through class discussions, parallel readings, and creative written assignments make this course both interesting and educational.

LIT 0003  Literature—Great Books  High School Cr. 1
This course is designed to study distinctive characteristics of Hebrew and Christian literature and make comparisons with other well-known literary works by world authors. Experiences are enlarged through the recognition of allusions, Biblical themes, word origins and vocabulary study, and of literary structures. Unusual sentence structure and punctuation are noted. Provisions for individual expression through class discussions, parallel readings, and creative written assignments make this course both interesting and educational.

LIT 0005  Bible History—Bible  High School Cr. 1
This course is designed to meet the needs of adult students desiring instruction in biblical history, literary form and culture and their influence and pertinence to and upon modern culture and society.

LIT 0007  World Poetry  High School Cr. 1
The course will survey the major poets of Greece, Rome, France and Germany, with brief studies of other European poetry. It will include a workshop for members of the class who write poetry.

LIT 0008  World Literature  High School Cr. 1
A course designed for more mature students. It contains some of every type of literature. Authors are contemporary and from numerous countries. The course has unusual features: tests are divided into cognitive and affective, and definitely scheduled conferences with the student are an integral part of the course. It is also individualized to fit into the adult program.

LIT 0009  Understanding Literature  High School Cr. 1
This is a programmed course well suited to the individualized instruction of the adult program. It is based on generalized themes which are common to all literature, such as feeling, character, imagery, and style. In keeping with its programmed nature, the material is divided into manageable parts.

LIT 0010  Literature I  High School Cr. ½
This course is arranged topically. Authors are contemporary Americans and all types of literature are included. Although none of them is considered a prerequisite for another, this course is regarded as the first in the "Adventures" series.

LIT 0011  Literature II  High School Cr. ½
This course is an anthology of American literature. There are two major emphases. One is topical. The other concentrates on selected authors.

LIT 0012  Literature III  High School Cr. ½
This anthology is not limited by time, place, or type. It is an eclectic selection of writers from the ancient to the present and from many countries. Included are short stories, novels, plays, poems and non-fiction. Readings are on a more mature level than Literature II.

LIT 0014  Literature I  High School Cr. 1
This course is arranged topically. Authors are contemporary Americans and all types of literature are included. Although none of them is considered a prerequisite for another, this course is regarded as the first in the "Adventures" series. A student will be required to read a selected novel and to submit a research paper.

LIT 0015  Literature II  High School Cr. 1
This course is an anthology of American literature. There are two major emphases. One is topical. The other concentrates on selected authors. A student will be required to read a selected novel and to submit a research paper.

LIT 0016  Literature III  High School Cr. 1
This anthology is not limited by time, place, or type. It is an eclectic selection of writers from the ancient to the present and from many countries. Included are short stories, novels, plays, poems and non-fiction. Readings are on a more mature level than Literature II. A student will be required to submit a research paper.

MAT 0001  Mathematics, General  High School Cr. 1
A course designed to satisfy the needs of individuals whose interests require a knowledge of modern general mathematical skills and concepts.

MAT 0002  Business Mathematics  High School Cr. 1
This course covers problems involving proprietorship, sales, profits and losses, payroll, simple interest and real estate, leading to work with integers, fractions and decimals commonly used in business, insurance, bonds, compound interest, and corporation and financial statements.

MAT 0003  Modern Mathematics  High School Cr. 1
This course is designed primarily for those who wish to have an orientation to and an understanding of the basic concepts and terminology of the new mathematics program being taught in the elementary and junior high schools in Florida.

MAT 0004  Algebra I  High School Cr. 1
An introduction to algebra with emphasis on fundamentals, the solution of equations, and the application of equations to everyday problems.

MAT 0005  Algebra II  High School Cr. 1
Continuation of Algebra I with emphasis on fractions, fractional equations, quadratic equations, elementary trigonometry, ratio and proportion, and radicals with problems using these.

MAT 0006  Trigonometry  High School Cr. 1
Emphasis is placed on vectors, complex numbers, circular functions, inverse functions and the proof of trigonometric identities. The use of logarithms and computations, and the solution of triangles are also included in the course.
MAT 0007  Plane Geometry  High School Cr. 1
A course dealing with geometric figures in a plane surface in which construction and deductive reasoning with triangles, perpendicular and parallel lines, polygons and the circles are emphasized. Special emphasis is placed on congruent triangles. This course is useful especially in the fields of mechanical drawing, design, surveying, engineering, aviation, navigation, and the physical sciences.

MAT 0008  Basic Mathematics  High School Cr. 1
A course designed to insure competency in computation with integers, fractions, and decimals. Practical application of percentage and measurements, including the metric system, is stressed.

MAT 0009  Consumer Mathematics  High School Cr. 1
This course is designed to cover the wide range of consumer problems such as banking, insurance, bonds, stocks, home ownership and installment buying. Also included are problems involving proprietorship, payrolls, sales, discounts, simple interest, compound interest, financial statements and profits or losses.

MAT 0010  Introduction to the Metric System  High School Cr. ½
This course is designed to acquaint the student with the use of the International System of Units and satisfy the needs of adults for metrication training.

MUS 0001  General Shop Metals  High School Cr. 1
Designed for both beginning and advanced students, incorporates all machine shop phases including bench and sheet metals, forging, foundry, and welding.

MUS 0002  Basic Music Theory  High School Cr. 1
A course designed for the beginning music student. Includes work with elementary music terminology, notation, intervals, scales, chords, rhythm, sight singing, dictation, and keyboard skills.

MUS 0003  Instrumental Music  High School Cr. 1
A course offered to meet the needs of individuals who wish to learn fundamentals of playing various musical instruments and who wish to practice in group instrumental music activities.

MUS 0005  Community Orchestra  High School Cr. 1
The Community Orchestra provides instrumentalist in the college and community an opportunity to perform works representative of a broad spectrum of orchestral literature, to refine techniques of ensemble playing, and present concerts each term. Membership is by permission of the director and/or audition; participation by string majors is required.

MUS 0007  Choral Music  High School Cr. 1
A course in both individual and group singing, with emphasis on group vocal experience that may be useful to the individual who participates in community musical activities.

MUY 0001  Music Appreciation  High School Cr. 1
This course will teach the student to listen creatively and will acquaint the student with form and various styles in classical music.

ORI 0001  The World of Work  High School Cr. 1
This course is designed to assist students in acquiring an intelligent and panoramic view of the world of work.

PEA 0001  Self Defense for Women  This course is designed primarily for women who want to learn the art of self defense. Conditioning exercises, self, falling, and defensive techniques will be stressed. Training and information related to preventative measures to assure safety are included.

PEA 0002  Playground Supervision  This course covers the basic instruction and concepts that parents or teachers need in guiding the child’s mental, social, and physical development. It deals with after-school playground supervision of games, dances, materials, progression, and techniques in teaching games and rhythmical activities to pre-school and school age children.

PHI 0004  Attitudes Toward Death  Death poses questions of ultimate significance to us. Many people feel ill-prepared to face their own death or the death of a loved one. Through the centuries, humans have thought about death, speculated about immortality and expressed their feelings in a wide variety of ways. The question of death has taken on new dimensions in our century—a time when life processes can be supported by machines and when traditional religious beliefs are challenged. Toward the end of the course we will look at the funeral and burial practices of our day and explore ways that legal papers, insurance and funeral arrangements can be prepared more expeditiously and meaningfully.

PHI 0005  Living Religions of the World: Our Search for Meaning  A comparative study of traditional religious concepts in relation to some of today's more popular new religions, cults and metaphysical philosophies. Some of the Eastern Religions, Mystics and Zen Masters, Christianity/Judaism, Islam, Hare Krishnas and the new controversial Moonies Movement will be considered for analysis. Mind expanding and positive thinking programs such as Science, Dianetics, psycho-cybernetics, Bio Feedback and EST (Ehhard Seminar Training) will also be discussed.

PHS 0001  General Science  High School Cr. 1
An introductory survey course designed to acquaint the student with both the physical and biological sciences.

PHS 0003  Physical Science  High School Cr. 1
A course normally given for high school credit, designed to acquaint the individual with various aspects of the physical sciences. It includes elements of physics, chemistry, geology, astronomy, meteorology and other selected physical sciences topics.

PHS 0004  Earth Science  High School Cr. 1
This course is a study of the planet earth, the earth’s changing surface, and the earth’s atmosphere.

POR 0001  Portuguese  High School Cr. 1
This course is designed to develop a basic vocabulary, proper pronunciation, and correct speech patterns, enabling the adult learner to converse in everyday language and to develop an appreciation for the historical and cultural values of the country and their continuing contribution to Western Civilization.

POS 0001  American Government  High School Cr. 1
This course includes a study of such topics as the Constitution, legislative, executive and judicial branches, and functions of national, state, and local government; finance and taxation; national defense; health, education and welfare; elections, citizenship.

POS 0002  Civics  High School Cr. ½
This course deals with the function and structure of government at the local, state, and national levels. Seven units must be completed satisfactorily for one-half credit.

POS 0003  Civics  High School Cr. 1
This course deals with the function and structure of government at the local, state, and national levels. Ten units must be completed satisfactorily for one credit.

POS 0004  Americanism vs. Communism  High School Cr. ½

POS 0005  Americanism vs. Communism  High School Cr. 1
An analysis of American Government, democratic principles and the basis of communism. Each student must give an oral report in class and turn in one written report upon a topic approved by the professor.
POS 0007 Current Affairs Education
Contemporary changes in education-law, curriculum, discipline, and motivation are presented in light of the social, economic and governmental forces that cause them. The course includes development of communication skills related to integration and job discrimination.

PSY 0001 Psychology High School Cr. 1
This is a basic study of human behavior. Consideration is given to the family and its place in society, psychology and human relations, coping with the problems of a changing society and cultural environment, understanding the interests, aptitudes and desires of individuals and matters of personal and group adjustment.

PSY 0002 After Divorce, What?
This is a workshop for those who are contemplating or have experienced a divorce. Discussion sessions will explore the emotional impact, the personal reassessment, and the many decisions that must be made after this major life change. Topics will include: changed roles, and unclear status after a divorce; working through loss and loneliness; rechanneling anger and guilt; finding replacements; accepting yourself, your new choices; new decisions and new directions.

PSY 0003 Making the Most of Being Single
This course is based on the premise that the single life style, as any other, can offer challenge and opportunity when explored and developed. Sessions will focus on creatively planning action steps to improve the many facets of daily living for the single adult. The goal will be to use the maximum potential of one's own resources to develop a sense of well being, self identification, and greater sense of satisfaction with one's life. Individual sessions will include experiences in dealing with daily concerns with family, or financial, emotional, educational, legal, social, and recreational aspects of life. Time will also be planned for a session on confrontation skills. An attempt will be made to maintain an equal balance of male and female participants.

PSY 0004 Psychology of Awareness
This course is designed for senior citizens. It includes exploration, experimentation, and interaction designed to assist participants to a fuller and more satisfying experience of self, others, and environment through heightened appreciation of here-and-now reality; training and practice in emotional self-support and conflict resolution utilizing Gestalt and Transactional Analysis approaches.

PSY 0005 Pre-Retirement/Retirement Education
This course is designed to assist those already retired to live with retirement in independence and dignity, or to prepare individuals approaching retirement for their quiet years. It will include informational and referral services; i.e., Social Security, Medicare, and Medicaid and all others of consequence and importance to the senior adult.

PSY 0006 Skills for Parents
This course will emphasize how to communicate better with your children (and other people, too). Some of the skills that will be covered are: how to really listen, how to communicate your feelings, how to solve average problems in the family, and become prime trainers, educators, and enrichers of your children.

PSY 0007 Mental Health First Aid
This course is to teach the student to provide immediate stopgap help to persons immediately in danger of committing suicide. The student will receive instruction on prevention of suicide, drug abuse, and other mental health disorders—includes identifying problems, recognizing, and responding to a crisis.

PSY 0008 Parenting the Adopted Child
This course is for the parents or "expectant" parents of adopted children. Through study and discussions, various concerns regarding adopted children will be examined. Special problems and needs of these youngsters will be discussed, such as explaining that the child is adopted, handling the child's questions about the natural parents, relationship to natural children in the family, adoption of older children and interracial adoptions. Basic emotional needs of both adopted and natural children will be explored as well as local sources of adoptive information and standards.

PSY 0009 Education—A Family Affair
This course is designed to assist parents of school-age children with interpretation of school requirements, standardized test scores, courses of study, academic deficiencies, help with reading, writing, spelling, and mathematics for their children, and other school related problems. This course will include developing skills to help parents assist their school-age children in study methods, listening habits, peer group relationships, and coping skills necessary to succeed in school.

PSY 0010 Divorce—A New Challenge
This course is designed to help divorced persons overcome negative feelings, resolve differences, and re-establish a good and rewarding life. Included are skills to help them avoid self-pity, wounded pride, guilt, distrust, and withdrawal.

PSY 0011 Assertive Training
The course includes the theory and practice of assertive behavior: awareness of one's interpersonal rights, distinguishing among non-assertive, assertive and aggressive responses, practicing simple assertions as well as empathic, negative feelings, and confrontive assertions and other interpersonal problems relating to coexistence and brotherhood.

PSY 0012 Managing Your Work World
A three-hour seminar for women and minorities designed to enable them to examine ways of managing their own careers and those of the people they direct, ways of dealing with local discrimination in the job market, ways of developing more flexibility in their work habits, ways of behaving assertively rather than aggressively, and ways of changing their self-image.

PSY 0015 Pre-Release Program for the Incarcerated
This pre-release program has been created to offer guidance and counseling to the incarcerated in transition from confinement to freedom. This program will provide the means for reintegrating and readjusting the offender back into the community.

PSY 0019 Helping Skills
This course will teach the 3 R's of crisis intervention work to individuals who want to become "people helpers" in the Crisis Intervention Program of Jacksonville. The 3 R's: are: (1) Recognizing a person in a crisis, (2) responding to a person in a crisis, and (3) referring a person in a crisis to the proper source of help.

RUS 0001 Russian High School Cr. 1
Conversation rather than grammar is emphasized. This course also includes a brief background in Russian history, culture, and literature.

SLD 0001 Sign Language High School Cr. 1
This course is designed to teach individuals to communicate with the deaf through the use of finger positions. Another common name for this is "finger spelling."

SOC 0001 Sociology High School Cr. 1
This course includes the study of cultural influences on our society, the forms, institutions, and functions of human groups, and the various types of individual and group relationships.

SOC 0003 Introduction to the North American Indian
A survey of the North American Indian from their first appearance on this continent through their development into tribes.
SOC 0005  Education for the Aging
Courses are offered under this title which are designed to provide middle-aged and older adults with information that will help them cope with the problems of aging. Information on pre-retirement planning, the psychological aspects of aging, the role of the aged in the modern world, and courses dealing with health, housing, financial planning, and worthy use of leisure time will be explored. Implications of current social, scientific, economic, and political developments on the older citizen are studied.

SOC 0010  Life Planning Workshop
The Life Planning Workshop is designed to involve the individual in the process of influencing one's own future. The individual is actively engaged in the processes of self-identification and group interaction, including role relations and the activities are designed to assist one in assessing oneself for the future. The past is used only as an explanation of where a person is now, not an excuse.

SOC 0011  Opening Doors For Women—Exploring Options
This seminar is designed to help women examine the direction in which their lives are moving. Discussion and experiences will center around personal values, definition of various roles, common problems and conflicts, and the process of decision making.

SOP 0001  Human Relations
A down-to-earth review of modern concepts in human relations including allocation of time, motivation, communication, role relations, and emotional stability to instill positive attitudes about living and working together.

SOP 0002  Leadership Training
This course is designed to develop skills in group or community leadership. It covers techniques of group work and group dynamics, effective speaking, and how to conduct a meeting.

SOP 0003  Parliamentary Procedure
This course includes study and practice of the principles and rules governing deliberative assemblies. It is designed to benefit the presiding officer and member alike in participation in local government, communication with public officials, and ensuring each individual's rights.

SPA 0001  Spanish I
Elements of grammar; pronunciation, elementary conversation, and reading of simple Spanish texts.

SPA 0002  Spanish II
Review of grammar, with conversation and composition, and reading of Spanish texts.

SPE 0001  Public Speaking
This course includes the fundamentals of effective speaking practice in organization of materials and delivery, development of voice, vocabulary, diction, and poise.

SPE 0002  Language Development and Treatment of Language Disorders
This course is designed for parents of children with speech difficulties. It includes language development, language disorders, and the prevention and/or remediation of language disorders. This is a twelve-week course. Meeting one night a week for one hour.

SSE 0001  Social Studies
High School Cr. 1
This course includes areas of U.S. History, World History, Americanism Vs. Communism, Civics, and Problems of American Democracy. It is designed to fulfill requirements of high school level social studies program.

STS 0001  Notetaking, Speedwriting
High School Cr. 1
This course provides opportunities for learning to write with speed in as short a period of time as possible. It aims primarily to meet the needs of individuals having notetaking responsibilities, including reporting and record keeping, in community organizations, and in other personal use activities.

STS 0002  Beginning Shorthand
High School Cr. 1
Students enrolling in this course will learn the shorthand alphabet with emphasis on dictation and transcription and the application of correct principles of grammar. Standards of performance in transcription are comparable to those of regular high school courses in beginning shorthand.

TYG 0101  Typewriting
High School Cr. 1
A course in typewriting for personal use. It is designed to assist students in acquiring mastery of the keyboard and in developing the ability to write personal and business letters accurately and in good form.

WOC 0101  General Shop, Wood
High School Cr. 1
This course provides experiences in the use of basic hand and power tools in working with wood and related materials. The work involves planning, designing, and constructing functional articles of use and value.
The College offers avocational and recreational courses on request from the community. These courses are supported by fees (self supporting) and not funded by the State. The fee structure for these courses is calculated to cover the direct instructional cost of offering the course to the community. The list of available courses is included here.
