### ASSOCIATE IN SCIENCE RECOMMENDED ROADMAP

This academic roadmap is designed to help you select courses each term for your **Associate in Science Degree in Nursing (2330) (A.S.)**. The mission of the Associate in Science in Nursing program at Florida State College at Jacksonville is to provide nursing education for culturally diverse students, preparing them to be successful on the NCLEX-RN licensure examination and to practice as entry-level registered nurses in multi-variant settings within the healthcare profession.

Students will refer to the term-by-term and course-by-course recommendations. "Mile Markers and Notes" on the Roadmap refer to important guidelines for program completion.

This roadmap is intended to provide general guidance about recommended courses and mile markers. For specific guidance about your individual academic degree plan, please see a program advisor. Please also refer to the College Catalog for additional information.

**Career Options:** Graduates will qualify as entry-level registered nurses in multi-variant settings upon passing the National Council Licensure Examination (NCLEX). Nurses can work in small or large medical groups, fly with trauma center helicopters, or travel with humanitarian or first-response teams. Growth will occur primarily because of technological advancements, an increased emphasis on preventative care, and the large aging baby-boomer population who will demand more healthcare services as they live longer and more active lives.
