

# FSCJ Professional Pilot Technology A.S. Median Costs for Flight Training

As of May 2026

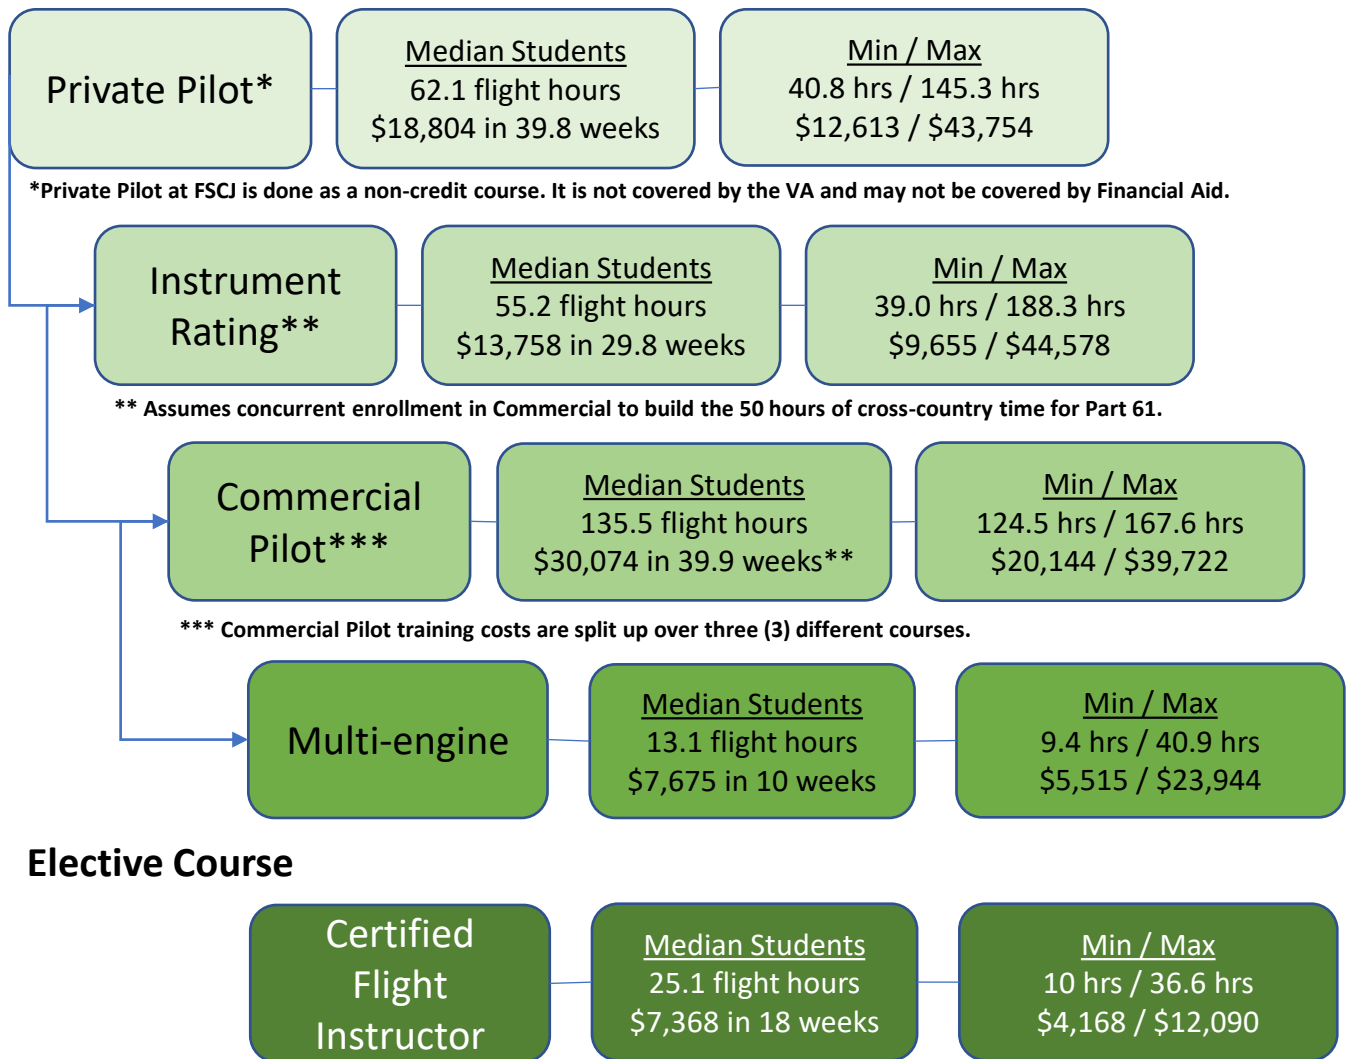

Flight training costs will vary from student to student for many factors, including individual study habits, hand-eye coordination, personal ability, as well as weather and other air traffic.

The middle boxes below provide the median totals for each flight course. 50% of students will do better and 50% will do worse, so the times and costs are what a “typical” student can expect.

For added context, we also list the minimum and maximum times and costs we have seen.

## JaxAero @ Jacksonville Executive Airport\*

\* FSCJ’s contract with JaxAero is new, so the amounts shown are estimates based on historical student training data.

### Median Totals:

- 290.7 flight hours (265.6 without CFI)
- \$77,689 (\$70,320 without CFI)
- 139 weeks (121 without CFI)

### Notes:

- Most students take 6-7 terms to complete training and the degree.
- **JaxAero is Part 61 and NOT ELIGIBLE for Post 9/11 GI Bill™ funding. See the next 2 pages for options.**
