

The Associate in Science (A.S.) Degree in Environmental Science Technology prepares students for entry-level positions in the fields of assessment and safety compliance, hazardous materials, and water quality.

Students will learn environmental data collection, data analysis, and report writing through conceptual and hands-on learning. Students may also acquire skills to prevent pollution and mitigate polluted sites. Students will attain these skills in accordance with all federal and state guidelines. Program graduates will acquire the necessary skills to play a vital role in protecting our environment.

Recommended Roadmap

This roadmap provides general guidance about recommended courses. For specific guidance about your individual academic degree plan, please see an advisor. Also refer to the College Catalog for additional information. **Full-time students will refer to the term-by-term recommendations, and part-time students will take courses in the order listed.** A minimum grade of C or higher must be achieved in all courses used to satisfy the general education and civic literacy requirements.

A list of Professional Elective Coursework options is available at the end of this document.

Important for You to Know

This academic roadmap does not include developmental education courses in reading, writing, and/or mathematics that you may be required to take. Students who place into developmental education courses are required to complete designated developmental education courses with a grade of C or higher regardless of program of study. In addition, it does not include MAT 1033: Intermediate Algebra, which, for many students, is a prerequisite course for MAC 1105.

Related Roadmaps

Embedded Technical Certificate(s)

Technical certificates are available within this degree program. Students may pursue the A.S. degree and earn technical certificates while completing the requirements for the degree or pursue one or more certificates to develop or upgrade their skills in a particular field. Contact an advisor to determine the career education path that is best for you. Embedded technical certificates include:

- Environmental Science Technician
- Hazardous Materials Specialist

Program Learning Outcomes

Upon completing this program, students will be able to demonstrate proficiency in the following program learning outcomes:

- Apply knowledge of the principles of managing water pollution through prevention and remediation
- Sample, analyze and calculate data related to air, water and soil pollutants
- Operate and calibrate laboratory and field instruments used in quantitative and qualitative analysis of pollutants.
- Students will practice employability skills including resume writing, interviewing, and professionalism.
