

## Computer Related Crime Investigations (2319) | A.S. Degree

### PROGRAM DESCRIPTION

This Computer Related Crime Investigations Associate in Science (A.S.) degree provides crime investigation coursework as it relates to those committed using computers and the internet, along with the technical skill proficiency, competency-based applied learning, problem-solving, work attitudes and occupation-specific skills and knowledge needed to prepare students for careers in public safety and private security careers.

Program graduates can look forward to careers as computer related crime investigators, computer forensics specialists, security consultants or security auditors in law enforcement, public safety and corporate computer security investigation.

This program is ideal for students who have already obtained a bachelor's degree in a related field and/or who have experience in law enforcement. Most state and federal law enforcement agencies, as well as banks and other institutions hiring for computer related crime investigation positions, require a bachelor's degree or combination of education and experience for employment. It is recommended that students obtain computer certifications (such as A+ and Security+) when seeking employment in computer related crime investigation positions.
