The Associate in Science (A.S.) Degree in Architectural Design and Construction Technology program prepares students for entry-level positions in architecture, computer-aided-design, or construction management.

The program emphasizes architectural and construction theory fundamentals combined with applied laboratory instruction in the latest techniques using the most current technology as dictated by industry conventions and standards. The program is dedicated to providing a well-balanced education that enhances the experiences and employment potential for graduates.

### Career Options
This program prepares you for entry-level positions as architectural drafters or assistants. Typical places of employment are architectural or engineering firms and construction contractors.

### Advising
(904) 633-8228 or act@fscj.edu.

### Sample Roadmap
This roadmap provides general guidance about required courses. For specific guidance about your individual academic degree plan, please see an advisor. Also refer to the College Catalog and class schedules for additional information. **Full-time students will refer to the term-by-term recommendations,** and **part-time students will take courses in the order listed.**

A minimum grade of C or higher must be achieved in all professional courses, as well as courses used to satisfy the general education and civic literacy requirements. A list of Professional Elective Coursework options is available at the end of this document.

**Term 1**

Important for You to Know
This academic roadmap does not include developmental education courses in reading, writing, and/or mathematics that you may be required to take. Students who place into developmental education courses are required to complete designated developmental education courses with a grade of C or higher regardless of program of study. In addition, it does not include MAT 1033: Intermediate Algebra, which, for many students, is a prerequisite course for MAC 1105.

Related Roadmaps
Embedded Technical Certificate(s)
Technical certificates are available within this degree program. Students may pursue the A.S. degree and earn technical certificates while completing the requirements for the degree or pursue one or more certificates to develop or upgrade their skills in a particular field. Contact an advisor to determine the career education path that is best for you. Embedded technical certificates include:

- Computer Aided Technical Design
- Advanced Computer-Aided Technical Design
- GIS (Geographic Information System) Technician

Program Learning Outcomes
Upon completing this program, students will be able to demonstrate proficiency in the following program learning outcomes:

- Students will identify construction materials,
- Students will use Computer Aided Drafting and Design software
- Students will learn the construction materials
- Students will get information about surveying
- Students will learn technical drawing

Term 5
Note: All other program courses should be completed prior to registering for TAR 1942: Internship.

Total Program Credit Hours
The Architectural Design and Construction Technology A.S. degree program requires a minimum of 66 credit hours. Total program hours may vary based on the student's individual degree plan. Please see an advisor for individual guidance. This program is eligible for financial aid.

Professional Elective Coursework Options
Required Credit Hours: 18
Students can specialize by taking selecting courses from one of the suggested tracks:

- **Drafting and Design Track**: select BCN 2614, ETD 2350, ETD 2395, ETD 2536 and ETD 2551.
- **Architectural Track**: select BCN 2226, BCN 2614, BCN 2760, ETD 2395.
- **Civil Track**: select BCN 2226, BCN 2721, BCN 2760 and ETD 2551.
- **GIS Track**: select CGS 1100C, CGS 2542, GIS 2040, GIS 2045 and GIS 2046.
