The Associate in Science (A.S.) Degree in Dental Hygiene creates entry-level dental hygienists who are prepared to immediately seek employment in dental offices.

The program combines classroom and laboratory instruction at the College and clinical instruction in the College’s Dental Hygiene Clinic and affiliated dental clinics in the community.

**Certification/Licensing**

Graduates must pass both computerized and clinical exams prior to licensing. This program prepares students to take the State of Florida licensing exams, thus preparing students to work in the State of Florida only.

**Note:** If you are considering employment in a state other than Florida, please visit [https://www.fscj.edu/academics/license-disclose](https://www.fscj.edu/academics/license-disclose) to determine if this program will meet the selected state's requirements to sit for licensure or certification testing.

**Application Procedure**

This is a Limited Access Program. Students must follow the application procedure outlined in the current College Catalog. The application deadline is May 15 of each year with classes starting in the fall term.

**Advising**

(904) 646-2300 or [hcic@fscj.edu](mailto:hcic@fscj.edu).

---

**Sample Roadmap**

This roadmap provides general guidance about required courses. For specific guidance about your individual academic degree plan, please see an advisor. Also refer to the College Catalog and class schedules for additional information.

A minimum grade of C or higher must be achieved in all prerequisite, natural science and dental hygiene courses, as well as courses used to satisfy the general education and civic literacy requirements.

**Prerequisites to be Completed Before Applying to the Dental Hygiene Program**

Important for You to Know
This academic roadmap does not include developmental education courses in reading, writing, and/or mathematics that you may be required to take. Students who place into developmental education courses are required to complete designated developmental education courses with a grade of C or higher regardless of program of study. In addition, it does not include MAT 1033: Intermediate Algebra, which, for many students, is a prerequisite course for MAC 1105.

Program Learning Outcomes
Professionalism
The new graduate of the Dental Hygiene program must be able to:
- discern and manage ethical issues of dental hygiene practice in a rapidly changing environment;
- contribute to improve the knowledge, skills and values of the profession; and
- acquire and synthesize information in a critical and scientific manner.

Health Promotion/Disease Prevention
The new graduate of the Dental Hygiene program must be able to:
- provide planned educational services using appropriate interpersonal communication skills and educational strategies to promote the optimal health of the individual; and
- initiate and assume responsibility for health promotive and disease preventative activities for the community.

Patient Care
The new graduate of the Dental Hygiene program must be able to:
- systematically collect, analyze and accurately record baseline data on the general, oral and psychosocial health status of patients using methods consistent with medico-legal principles;
- use critical decision-making skills to identify existing problems, potential problems, etiologic factors, contributing factors, as well as establish realistic goals and treatment strategies to facilitate optimal oral health;
- provide treatment that includes preventive and therapeutic services designed to achieve and maintain oral health and assist the patient in achieving oral health goals; and
- evaluate the effectiveness of planned clinical and educational services and modify services as necessary for optimal oral health.

Term 3: Summer
