

About the Program

The Associate in Science (A.S.) Degree in Aviation Administration (Air Traffic Control) provides a broad overview of many “behind-the-scenes” operations that make the aviation industry function every day. Graduates may pursue work in airline and air cargo operations, business aviation, airport fixed-base operations (FBO), airport operations, unmanned aerial systems (drones) or air traffic control.

Students may focus one of the following areas: Aircraft Dispatch, Air Traffic Control, or Unmanned Aerial Systems.

Aircraft Dispatch Track

With this track, students can go on to earn the FAA's Aircraft Dispatcher certificate and work for business and/or charter operations, air ambulance, airlines, and aircraft dispatcher. Passing both a written and practical test is required, and there may be additional costs outside FSCJ.

Although FSCJ is seeking FAA-approval, the program is not currently an authorized dispatch school. However, courses may be accepted as transfer credit towards FAA dispatcher training requirements. Interested students should check with dispatch schools to determine what may or may not transfer.

Air Traffic Control

Graduates of this track who complete the AT-CTI requirements will receive an endorsement to apply to the FAA as an Air Traffic Controller. Note: AT-CTI has specific course and GPA requirements. Students should be familiar with the FAA's hiring policy as well as hiring requirements such as medical, psychological, and background checks prior to employment.

Unmanned Aerial Systems (UAS)

Graduates of this track will be ready to take the FAA's Part 107 Remote Pilot exam and earn the certificate needed to conduct commercial “drone” flights and operations.

Program Requirements

This program requires a **minimum of 60 credit hours**. Total program hours may vary based on the student's individual academic degree plan. This program is **eligible** for financial aid.

This program includes an **Algebra Through Calculus math pathway**. This pathway is intended for students whose academic program requires a foundation of algebra, followed by a sequence of courses that may lead to calculus.

Placement Testing

College placement testing assesses incoming students' skill levels in English, mathematics, and reading. Students are exempt from placement testing if they meet any of the following conditions:
